WATER RIGHT LICENSE

License of Water Right No. 75-7030 Priority August 8, 1972 Amount 0.032 cfs

THIS IS TO CERTIFY, that Louis R. Cunan & Elizabeth Cunan
of Salmon, Idaho, have ~~xxx~~ complied with the terms and conditions of Permit
No. 75-7030 issued pursuant to Application for Permit dated August 8, 1972,
and has submitted proof to the Department of Water Resources on November 15, 1973,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.08 cfs of water from Williams Creek,
tributary to the Salmon River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

Mr. Louis R. Cunan
Route #1, Box 239
Salmon, ID 83467

Dear Mr. Cunan:

We have received your May 9th request for increasing the amount of water on your water right License No. 75-7030.

This license was issued for the use of one cubic foot per second of water for each 50 acres of land, or one miner's inch per acre as limited by the Idaho Code without justification for a greater amount. We feel justification would be difficult in light of possible injury to the many other water users on Williams Creek. Your original permit was also issued for one miner's inch for each irrigated acre of land.

Because of these factors, we felt that your license could not be issued for a higher rate of diversion, and in time of scarcity your diversion rate should be reduced to that amount.

If you have any questions, please do not hesitate to contact us.

Sincerely,

BOBBY D. FLEENOR

Dear Sir:

I was not able to contact your office within ~~40~~ days (After Feb 21, 1975) regarding the permit since I was out of the country at the time, and the permit, inadvertently, was not forwarded to me.

The permit states that the "Amount of water that can be recognized as beneficially used under Idaho law: 0.032 cfs." when William Rhodes of your department made an examination of the site he said that he was going to recommend 219 gpm (7 sprinkler @ 33 gpm) or 0.47 cfs.

Could the amount of water be increased to that amount?

Sincerely,

Dear Mr. & Mrs. Cunan:

A representative of this Department has made an examination of the works covered by your Permit No. 75-7030 and has found the following:

Quantity of water diverted: 0.08 cfs Source: Williams Creek

Amount of water that can be recognized as beneficially used under Idaho law: 0.032 cfs

The maximum quantity diverted shall not exceed 4.8 acre feet per year.

Beneficial use: For irrigation of 1.6 acres within the SE1/4, Sec. 12, Twp. 20N, Rge. 21E

Point of diversion: SE1/4, Sec. 12, Twp. 20N, Rge. 21E, B.M.

Priority date established: August 8, 1972

If you do not concur with these findings, please advise us within 10 days; otherwise a license will be issued as set forth in this letter.

10. Remarks - Continued

the system will, theoretically, at least, discharge at approximately the application amount of 0.052 c.f.s. No actual measurements were taken. If necessary this will be done next year when additional piping will be used. The 0.052 c.f.s was based on the whole acreage of 2.6 acres. Actually, only about 1.0 acres will be irrigated. About $\frac{1}{2}$ of the 1.0 acres was irrigated in 1972.

Route #1, Box 239

Dear Mr. & Mrs. Cunan:

One of the conditions of approval of your water Permit No. 75-7030 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

MEMORANDUM

Re: Application No. 75-7030

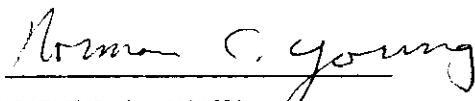

A conference was held at Salmon, Idaho, on October 16, 1972, to consider the protest against issuance of permit on the above referenced application. The applicant, Louis R. Cunan, was present and represented himself. The following protestants were present and represented themselves: Paul A. Hodges, Gar L. Hodges, George A. Rice and Don G. Grayot. Protestant Richard E. Banks, although not present, was represented by his wife, Virginia Banks.

The informal conference brought out that Mr. Cunan has a shallow well that is not adequate to irrigate his 2.6 acres of land. Mr. Cunan believes his land is included in the 1919 Williams Creek Decree, and may file a transfer to try to establish this. The protestants also have Salmon River canal water. They use the Williams Creek water first and supplement it with the Salmon River water. They are not concerned about high water from Williams Creek above the decreed rights. They use high water only to reduce stream flow to reduce flood damage. The protestants were mainly concerned about not losing their decreed rights. Formal home development of approximately 20 houses is planned for the Williams Creek Area, and they are concerned that each of these houses might try to use Williams Creek water. They were under the impression that they had to protest or they ran a risk of losing their decreed right. Williams Creek is already organized into a Water District (75-B), and has a watermaster.

The protestants agreed to withdraw their protests against this application and Application No. 75-7034 (Dale E. & Patricia K. Long) with the understanding that their decreed right would be filled prior to filling any new rights. An agreement to this effect was drawn up at the conference for each of the above mentioned applications and signed by each of the protestants.

Dear Mr. Cunan:

A search of our records for water rights in the drainage of Williams Creek has revealed the following:

1. Permit No. 75-7023, issued on May 17, 1972, to Albert D. &/or Lana Hutchinson for the diversion of 0.08 cfs of water from a ground water source within Gov't. Lot 2, Sec. 11, Twp. 20 N, Rge. 21 E, B.M. The water is to be used for irrigation and domestic purposes.
2. License No. 75-2104 with a priority of November 15, 1947, was issued to F.W. Moultrie for the diversion of 0.20 cfs of water from an unnamed spring within the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12, Twp. 20 N, Rge. 21 E, B.M. The water is for the irrigation of 10 acres of land.
3. License No. 75-2114 with a priority of April 25, 1951, was issued to the U.S. Forest Service for the diversion of 0.027 cfs of water from Cougar Point Campground Spring within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 1, Twp. 20 N, Rge. 20 E, B.M. The water is for domestic use at the Cougar Point Campground.

The above are the only rights that we can find that have been recorded.

Dear Mr. Cunan:

In response to your letter of September 19, 1972 I have read the decree you mentioned and find that the decree lists the land as being in Section 12, T 21N, R 21E and Sections 6 and 7, T 21N, R 22E. Your permit says your land is in Section 12, T 20N, R 21E.

If the decree is wrong on the township description only the District Court can correct the location of the decree.

You should reread your deed to see if it mentions including any existing water rights.

If the land adjacent to yours is irrigated under this decree then your land should have equal rights provided the water was not withheld in the transfer of that portion of the land to you.

If the water rights were not withheld perhaps the enclosed copy of a memorandum of a similar situation would be of use to you.

If we can be of further assistance to you please do not hesitate to call or write.

Re: Application for Permit No. 75-7030

Dear Mr. & Mrs. Cunan:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 75-7030. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required. (Section 42-202, Idaho Code)

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Re: Application No. 75-7030

Mr. Gar L. Hodges
Route #1
Salmon, ID 83467

Dear Mr. Hodges:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Very truly yours,

Department of Water Administration
Eastern District Office

A PROTEST

We the under signed water users and owners of a 1st water right decree of 760 inches of water from Williams creek within Lemhi County, water district #75B, do hereby give notice of a protest in regard to an application by Louis R. and Elizabeth Cunan, application #75-7030 for a permit to appropriate 0.2 cubic feet per second of water from Williams creek tributary to Salmon River by means of Pump, within the SE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 12 T. 20N. R. 21E, B.M. Lemhi County, to be used from April 1 to Dec. 1. for irrigation of 2.6 acres within Lemhi County.

This protest is being made for reasons that there is not nearly enough water to fill the decreed rights. There are about 20 new homes built or will be built on Williams creek, and if this is permitted for one or all we would not have any water for our farms. When the creek gets low their is not over 100 to 150 inches of water in the creek.

Re: Application for Permit No. 75-7030

Mr. Louis R. Cunan
Route #1 - Box 239
Salmon, ID 83467

Dear Mr. Cunan:

During the processing of your Application No. 75-7030, we noted that you have requested 0.2 cubic feet per second of water for the irrigation of 2.6 acres. The Idaho Code limits the rate of diversion for irrigation purposes to .02 c.f.s. per acre. Thus, the maximum rate of diversion for your application would be .052 c.f.s., unless you can provide us with written justification for the higher rate requested. A higher rate of diversion can be justified by unusual soil conditions or irrigation systems. We accept as adequate justification statements to this affect from the S.C.S. or other soils experts.

Please provide this office with adequate justification for the rate requested within thirty (30) days from the date of this letter, or we will reduce the rate of water to be diverted under your application to .052 c.f.s.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Dear Mr. Cunan:

We have searched our records as requested in your letter of August 25th.

Enclosed is a copy of the decreed water rights of Williams Creek. No permitted or licensed rights were found to be recorded on this creek.

If you have further questions, please let us know.

Sincerely,
