License of Water Right No. 75-7006 Priority November 3, 1969 Amount 0.25 cfs

THIS IS TO CERTIFY, that WAYNE ENGLAND
of North Fork, Idaho, has complied with the terms and conditions of Permit
No. 75-7006 issued pursuant to Application for Permit dated November 3, 1969,
and has submitted proof to the Department of Water Resources on November 9, 1969,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 3.95 cfs of water from unnamed springs,
tributary to Indian Creek, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>June 1</u> to <u>September 1</u>	at <u>0.25</u> cfs and	<u>39</u> acre feet
	from _____ to _____	at _____ cfs and	_____
	from _____ to _____	at _____ cfs and	_____

(both dates inclusive)

Subject, however, to the condition that no more than 0.25 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
39 acre feet per year, said waters to be diverted within the NE $\frac{1}{4}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 20,

ORDER

WHEREAS, on November 13, 1969, Wayne England applied to the Department of Water Resources (formerly the Department of Water Administration) for a permit to appropriate 8.29 cubic feet per second of water from two springs, tributary to Indian Creek, within the NE $\frac{1}{4}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 20, Twp. 25N, Rge. 20E, B.M., Lemhi County, to be used for fish propagation, irrigation, and domestic purposes; and,

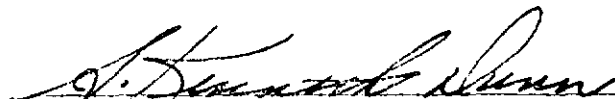

WHEREAS, on January 12, 1970, the Department approved said application and issued Permit No. 75-7006 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before January 1, 1975; and,

WHEREAS, on December 19, 1974, the Department received a request for an extension of time for said permit; and,

WHEREAS, it appears to the Department that under the circumstances the permit holder has been proceeding with reasonable diligence and has given good cause for delay;

IT IS, THEREFORE, HEREBY ORDERED that the time within which to submit proof of beneficial use of water under Permit No. 75-7006 be extended to January 1, 1977.

Dear Mr. and Mrs. Black:

Thank you for your letter of September 24, 1982 in regards to the above referenced license. Enclosed is a copy of the license we issued on September 28, 1979.

In Idaho, a licensed water right is considered real property and can be acquired when the land to which it is appurtenant to is purchased. Proof of owning all or part of the water right would be proof of owning the land.

If in the future you should have any other questions, please feel free to contact me at 334-4123.

Dear Mr. England:

A representative of this Department made an examination of the works covered by your Permit No. 75-7006 on May 4, 1978, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 0.25 cfs Source: unnamed springs (2)

The maximum quantity diverted shall not exceed 39 acre feet per
year.

Point of diversion: NE $\frac{1}{4}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 20, Twp. 25N, Rge. 20E, B.M.

Beneficial use: Irrigation of 13 acres within the E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 20, Twp.
25N, Rge. 20E, B.M.

Priority date established: November 3, 1969

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

SYSTEM DESCRIPTION:

Upper springs - water is stored in a small reservoir
for recreational type fishing. However, no fish are
presently being kept. Water passes thru a truckle tube outlet
and is used for flood irrigation. Reservoir has a .25 ac surface
area and is 30 deep (deg note) in the center.
Lower springs - water is collected by a 300' long trench and
is directed for flood irrigation.
REMARKS: No domestic uses of division nor are any fish
being propagated. No fish are grown except naturally.

Dear Mr. England:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this examination will be made, but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Idaho Falls.

Dear Mr. England:

One of the conditions of approval of your water Permit No. 75-7006 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

RE: Permit No. 75-7006 - Wayne England

Dear Mr. Higginson:

The purpose of this letter is to serve as a request for an extension of time in which Mr. Wayne England of North Fork, Idaho has to complete the proof of application of water to beneficial use.

The request for the extension is made under the provisions of Section 42-204 of the Idaho Code. The reason the extension is needed is that the high waters of 1973 and especially above normal high waters of 1974 washed out a point of diversion, changed the stream channel and washed out the location where the waters returned to the stream. The applicant was unable to complete all of the repairs in the late summer and fall of 1974 and needs an additional two years in order to complete the project in 1975 and check during the high water in 1976 to make sure that the diversions and the return areas are withstanding the high waters of Indian Creek. The grounds for the extension are more particularly set forth in the Affidavit which is attached hereto and made a part of this request for an extension of time.

Very truly yours,

James C. Herndon

WAYNE ENGLAND, being first duly sworn according to law,
deposes and says:

That he is over the age of 21 years, a citizen of the United States, and resides at North Fork, Idaho. That he is the owner of certain real property situated on Indian Creek, Lemhi County, State of Idaho.

That on January 12, 1970, he applied and made application for permit to divert 8.29 cubic feet per second of Indian Creek, a tributary of the Salmon River, for the following beneficial purposes:

Fish rearing
Irrigation and Domestic

That application was subsequently approved and given identification number 75-7006.

That pursuant to said application, he diverted the waters of Indian Creek, coming from two springs, constructing two lateral ditches for irrigation purposes and a storage pond which doubled as a private fish pond. That he obtained a permit from the Fish and Game Department for fish rearing and planted fish in the fish pond.

That the high waters of 1973 washed out his point of diversion and required extensive work on the point of diversion and the irrigation system. That the extreme high waters of 1974 washed out the point of diversion, the fish pond and the return channel. That measures are being taken to prevent the washout from reoccurring and new weirs are being installed at the point of diversion and at the place where the spring waters return to the creek. However, due to the weather conditions, the project has not been fully completed and an additional year

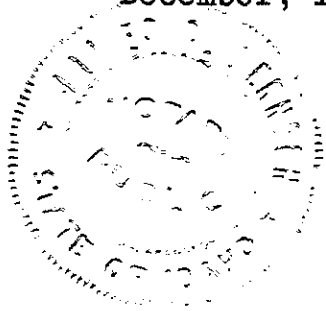

is necessary to complete the installation and another year or at least another high water is necessary to test the system.

This Affidavit is made in support for an application for extension of time.

Dated this 18th day of December, 1974.

Dear Mr. England:

In order to further consider your application for permit, we will require additional information not included with your application.

1. A financial statement indicating the resources available to complete the project as described in the application (see Section 42-203, IC).
2. A preliminary design of the hatchery facilities, indicating the size of raceways, general layout, the size of pipelines or other diversion works and such other information as will fully describe the method and means of diversion and verify the need for the quantity of water you have asked to appropriate.
3. A justification, based upon the preliminary design and the estimated production of the hatchery, for the amount of water requested.
4. An estimated schedule of construction giving dates for the start of construction, the finish of construction, and the date that full operation of the hatchery is anticipated.

You should be aware that all applications, if approved, will require the installation and maintenance of adequate measuring devices, both at the point of diversion and the point of return of the water to the creek. These devices must be of a type approved by the Department of Reclamation; they can be of any generally recognized standard measuring device type. You should include the installation of these devices in your preliminary plans for construction.

I would appreciate receiving this information by January 6, 1970. Thank you for your cooperation.
