Dear Ms. Dixon:

As a follow-up to your phone call today relative to water rights for your property near Gibbonsville, we have researched Department records.

Enclosed are copies of three (3) claims and a license for property in the vicinity of your parcel of land. As I advised you on the phone, it is often not possible to determine if a recorded water right includes a small tract of land, since the place of use is usually described only to the nearest 40-acre tract on water right documents. Such is the case here.

If any of these rights do include your land, the most likely ones are Water Right Claim Nos. 75-4041 and 75-4042 in the name of the Gibbonsville Improvement Association. Sources of water for these claims are Anderson Creek and Dahlenega Creek. You may wish to inquire locally to determine if the original intent when the claims were filed was to include tracts such as yours.

Please feel free to contact this office if you have additional questions.

Sincerely,

Dear Mr. Peters:

During a review of claims, it was noted that your association has claimed a priority date of "early 1880's." If an adjudication of water rights happens you will be required to have a specific day, month, and year for a priority date. I have enclosed two typed copies of your association's claims. Please type the correct year in Item 4. If the day and month are known put them in. If the year is known but not the day or month, use June 1 (year). If an adjudication does occur, you will be required to show evidence of this date.

Sign the copies, have them notarized and return them to me.
