WATER RIGHT LICENSE

License of Water Right No. 30215/75-2169 Priority September 27, 1961 Amount 4.0 cfs

THIS IS TO CERTIFY, that Verl Jones
of Challis, Idaho, has complied with the terms and conditions of Permit
No. 30215/75-2169 issued pursuant to Application for Permit dated September 27, 1961,
and has submitted proof to the Department of Water Resources on October 4, 1967,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 7.17 cfs of water from Otter Creek,
tributary to Panther Creek, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>April 1</u> to <u>November 1</u>	at <u>4.0</u> cfs and	<u>600.0</u> acre feet
	from _____ to _____	at _____ cfs and	
	from _____ to _____	at _____ cfs and	

(both dates inclusive)

Subject, however, to the condition that no more than 4.0 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
600.0 acre feet per year, said waters to be diverted within the SE 1/4, Section 30,
Twp 18N, Rge 19E in the County of Lemhi

Dear Mr. Jones:

We are in receipt of the application for amendment you submitted in September, 1985. We have reviewed the application and found everything in proper order.

Before the license is issued, however, the Department wanted to advise you that an additional condition will be included on the license which was not described in our letter to you dated July 29, 1985.

The condition added reads as follows:

Use of water under this right is subject to control by the watermaster of State Water District No. 72F, Morgan Creek.

The reason for adding this condition is to inform you that Morgan Creek is within a state water district and the watermaster may be required to control the diversion of water under your right in recognition of prior rights also using Morgan Creek.

If you have any questions on this matter, please let us know within 10 days; otherwise, a license will be issued as described.

SYSTEM DESCRIPTION:
Surface water is diverted from Other Creek and conveyed to the Morgan Creek drainage via open ditch. Morgan Creek then serves as a conveyance channel for the Other Creek water which is then diverted from Morgan Creek for the flood irrigation of 200 ac of land. Works of division consist of a network of field ditches.

REMARKS:
System shown & described by Verl Jones.
Two separate tracts located a distance of 13 mi from each other derive benefit of irrigation water from Other Creek.

RE: Permit No. 75-2169

Verl Jones
Challis,
Idaho 83226

Dear Mr. Jones:

Our records show that a proof examination still needs to be completed for your Permit No. 75-2169. As this exam has been in our files for many years, we are looking forward to its completion this coming irrigation season. Upon completion of this exam, a license will be issued to you for the amount of water you are actually putting to a beneficial use.

The permit describes the irrigation of several isolated tracts of land in the Challis area with surface water flows diverted from Otter Creek. If you are no longer using this water you may wish to relinquish your interest in this permit. Please contact this office and notify us of your intentions.

Thank you for any assistance you can lend me.

Very truly yours,

Dear Mr. Jones:

We acknowledge receipt of the depositions and affidavit of publication in the
Recorder-Herald submitted as proof of com-
pletion of works and beneficial use on Permit 30215.

Before a certificate and license of water right can be issued, a field
examination must be made by a representative from this department. We
cannot tell just when this examination will be made, but our field examiner
will try to contact you at the time he makes the examination so that you
may show him the system.

It appearing to the State Reclamation Engineer that the terms and conditions of Permit No. 30215 to appropriate the Public Waters of the State of Idaho, have not been complied with as to

Completion of Works Proof which was due September 28, 1962

you are hereby notified in compliance with Sec. 42-311, Idaho code that said Permit No. 30215 is hereby held for cancellation.

You are hereby required to show cause before the State Reclamation Engineer on or before forty days from date of this notice why said Permit should not be cancelled.

Said Permit No. 30215 claims the use of 4.0 cubic feet per second of the waters of Otter Creek with point of diversion located Approximately Sec. 27., Twp. 18 N., Rge. 19 E.B.M., and was approved September 28, 1961

Re: Permit No. 30215

Dear Mr. Jones:

Returned herewith is your proof of completion of works which we received without the \$5.00 fee.

Your permit shows you are to divert water from Otter Creek to Morgan Creek before you re-divert the water from Morgan Creek. Your answer to Second and Third is in error.

You show you can use this water to irrigate 10 acres of land in NW 1/4, Sec. 23, T. 15 N., R. 19 E. That land is not included in the permit. You must amend the land list on your permit. Your permit claims 4.0 cubic feet per second whereas you are only showing one in your proof, which is possibly quite correct.

Enclosed is form to amend the land list on a permit which you may complete and return with \$1.00 filing fee. Also enclosed are forms 10 and 11 with instructions, as you requested in your letter.

Return the corrected Form 6, with the \$5.00 fee for the Certificate of Completion of Works

Dear Mr. Jones:

Under the terms of your Permit No. 30215 you are required to complete your diversion works on or before Sept. 28, 1962. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
