Re: Permit No. 31527

M. M. Melton
c/o Charles Herndon
Box 206
Salmon, Idaho 83467

Dear Mr. Melton:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with those rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Dear Mr. Tappan:

We have been informed that the owners of the Williams Lake Development Company have filed on a spring for which we have Application No. 38475 and Permit No. 30410. It is our understanding that this has been done without Forest Service approval or permission to file on the spring.

When the ultimate development of the recreation area by the Forest Service is completed, it will require the entire flow of water from this spring. Our development is in Section 33, T. 20 N., R. 21 E.

It would be appreciated if you would give us any information regarding a filing by the Williams Lake Development Company and the status of both permits.

Re: Permit #31527
Melvin M. Melton

Dear Mr. Tappan:

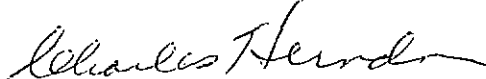

We received the order to show cause in connection with the above entitled permit.

We enclose herewith application for extension of time for completion of works which was originally dated in November. Mr. Melton was in California and it has been extremely difficult for me to get in touch with him. Hence the delay in forwarding this application.

Will it be necessary for us to make a further showing under your order of December 22nd in order to secure an extension of time? If such is necessary I'd appreciate having you call me collect at 756-2412.

With kindest personal regards and best wishes for the holiday season, I am,

Sincerely yours,

CHARLES HERNDON

Dear Mr. Herndon:

Returned herewith is Proof of Completion of Works which is not acceptable. Also enclosed is a supply of form 4 to apply for extension of time for completion of works.

Kindly complete one form 4. This is a distinctive form which is readily observed in the permit file and assists in preventing errors in this office. I suggest you request an extension to November 18, 1968, full five years time. Proof can be made at any prior time. This also applies to the application for permit.

I do not understand your letter of November 18th referring to Receipt No. 31918. That was for filing fee for the application for permit and will not serve double duty as also fee for Certificate of Completion of Works.

Very truly yours,

RALPH W. THOMAS, Deputy

Dear Mr. Melton:

Under the terms of your Permit No. 31527 you are required to complete your diversion works on or before Nov. 18, 1964. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

CARL E. TAPPAN

Attention Ralph W. Thomas, Deputy Engineer

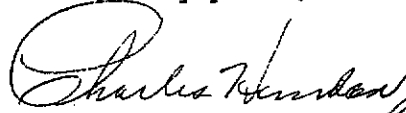

Dear Mr. Thomas:

Thank you for the return of the Melton Water application.

We have corrected it and are returning One application with two maps and our Check for \$5.00.

The actual Point of Diversion is in a stream which is a short distance down the stream from a spring, and, of course, the stream runs into Williams Lake.

Dear Mr. Horndon:

Returned herewith is the application for permit, in duplicate, with attached check for \$5.00 filing fee.

The source of water supply is shown as tributary of Williams Lake. The map indicates that there is a spring in that area. Is it the intention to obtain the water from the spring or unnamed stream?

The point of diversion is described as in the SE 1/4, Sec. 33, whereas the map shows it in the NW 1/4, Sec. 33.

Kindly show the source of water supply with Williams Lake on the next line.

Return one (1) completed application with two (2) sketch maps with the filing fee.
