Gentlemen:

You have thirteen permits ready to be licensed. As you know, under Utah law, an inspection is required by an engineer from this department before license can be issued.

I am wondering if we could not better make this inspection by having someone from your department that is familiar with these various permits to accompany us on a tour of inspection and make them all at one time rather than for us to try to contact a ranger at each station to make the inspection during the busy season.

Due to the extremely heavy load of well inspections that must be made during the irrigation season, I would like to arrange with you to make this inspection sometime before the irrigation season opens or after it has closed in the fall.

Please let us hear from you regarding this.

Very truly yours,

Dear Mr. Olsen:

We return your application for Permit to appropriate water from Wagon Hammer Spring, for the following corrections:

Question 4 gives the point of diversion in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 22, but the sketch map seems to indicate that it is in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of this Section.

Please also clarify the place of use, as we are not sure from the sketch map whether the place of use is the SW $\frac{1}{4}$ SE $\frac{1}{4}$ or NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 22.
