CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

RE: WATER RIGHT NO. 74-07270

Dear Water Right Holder(s):

Enclosed is a copy of the Water Right License issued on the above referenced permit. If you have any questions, please contact me within 10 days of receipt of this license.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

MEMORANDUM

TO: File 74-07270

FROM: Sharla

DATE: September 17, 1996

RE: Recommendation Adjustment(s)

The final license recommendations for Right 74-07270 are based on the following:

H. RECOMMENDATIONS

1. Recommended Amounts

Irrigation	4/15 - 10/15	0.48 cfs	84.0 afa
Stockwater	1/1 - 12/31	0.02 cfs	0.7 afa

TOTALS		0.49 cfs	84.7 afa
--------	--	----------	----------

The rate of diversion standardly used for 50 head of stock is 0.02 cfs. This rate plus the rate for irrigation is limited to a combined total of 0.49 cfs as originally permitted.

A condition of the original permit required a lockable device on the diverting works which would provide the watermaster with suitable control of the diversion. An order was sent removing a condition requiring the installation of a flow measurement port or other device. The order is in error; the condition requiring such a device will be retained on the license.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 74-07270

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

Re: Permit No.'s 74-07268, 72-07269, and 74-07270

Dear Permit Holder:

Returned are the proofs of beneficial use you submitted in connection with the above referenced permits. Unfortunately, they are unacceptable as filed.

The Department has determined, from pertinent sections of the Idaho Code, that the permit holder must meet two requirements in order to be exempt from the license exam fee. They are:

1. The water right must use a groundwater source.
2. The rate of diversion must be .04 cfs or less.

As you can see, you do not meet requirement #1 since you use a stream (surface) for your source. Therefore, a license examination fee of \$50 applies to permit no.'s 74-07268 and 72-07269, and a license examination fee of \$100 applies to permit no. 74-07270. I have enclosed a copy of the Instructions for the Proof of Beneficial Use for your convenience.

Also, we can probably issue an order to delete the condition of your permits that requires a lockable device. We will address that issue when we have received acceptable proofs of beneficial use.

Please return the proofs of beneficial use and the applicable license exam fees as soon as possible. Since the proofs were not acceptable as filed, they lapsed on June 1, 1992, and are of no further force nor effect. Your priority date is being penalized one day for every day that they are late.

If you have any questions or if I can be of any further assistance, please feel to contact me.

Sincerely,

Karen L. Gustafson

Department of Water Resources

Dear Sirs:

This is in regard to my application for Proof of Beneficial Use permit ID #74-07268, #74-07269, #74-07270. Proof of Beneficial Use addresses source water of three unnamed streams noted on the enclosed forms. ALL streams are seasonal; no water presently flows. During months of usage the water flow fluctuates according to amount of rainfall and time of year. Stream water is used only at times of increased water flow to irrigate approximately 10 acres and stock-water 50 head. There is NO possible way to utilize a lockable device on said springs due to the variance and development of groundwater. These facts prohibit the usage of such a device.

During the upcoming field examination with your Department representative I would like to discuss the above situation. Please Contact me as to the time and date of the field examination. Thank you for your consideration.

Sincerely,

Garry D. Merritt

PROOF DUE NOTICE
RE: PERMIT NO. 74-07270

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P74-07270

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.
