CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 74.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.

RE: Phone call from the City of Leadore

Today I spoke with a woman who identified herself as a representative of the City of Leadore. She said the city is irrigating only two acres in the NESW of Sec. 28, not 10.7 acres as found by the examiner. I told her that my letter of 7/20/95 was intended to remind the city that this permit authorizes the irrigation of only two acres. I also reminded her that the permit amendment is still necessary before the right can be licensed.

RE: WATER RIGHT NO. 74-07179

Dear Water Right Holder:

Water right permit 74-07179 is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed application for amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the place of use location. Please review carefully and if you concur, sign the amendment and return with the \$50.00 filing fee within 14 days.

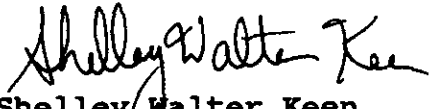

The last page of the Application for Amendment form contains a list of CONDITIONS/REMARKS proposed for the license when it is issued. These conditions/remarks may be modified upon further administrative review.

Please note that the permit, and therefore the amendment also, were issued for the irrigation of only 2 acres. Our field examiner for 74-07179 reported that water diverted from the Lemhi River is being used to irrigate about 10.7 acres of lawn in the park. A search of our database showed no permits, licenses, decrees, or Snake River Basin Adjudication claims indicating a right to irrigate the additional acres at this location.

Your additional irrigation use must be covered by a water right. The statutory process for establishing a new water right begins with the filing of an application for permit. However, we are currently operating under a moratorium order that precludes processing of applications for consumptive water uses in this area except under special circumstances. If you can demonstrate that your irrigation use began before November 19, 1987, we may be able to process an application for a new water right to cover your use. Otherwise, you may wish to consider transferring an existing water right to this location.

If you have any questions, please contact me at 208-327-7946 in Boise.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor

PROOF DUE NOTICE

RE: Permit No. 74-7179

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

RE: Permit No. 74-7179

City of Leadore
Box 154
Leadore, ID 83464

Dear Permit Holder:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please be advised that numerous prior applications for permit have been filed to appropriate water from your source, to be used on desert land entry and/or Carey Act lands. Development of these water rights is currently prevented by the U.S. Bureau of Land Management. However, if the lands are released for development, the associated water rights will receive water prior to your water right enclosed. Therefore, be sure to analyze the future impact of these rights before making a major investment in a water supply system.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section

Dear Mr. Dennis:

Enclosed is a typed copy of the application you submitted by the city and check #92-289 for \$45.00.

The application earlier submitted places the point of diversion in the SE~~1~~SE~~1~~ Sec. 28, but places the place of use in the SE~~1~~NE~~1~~ Sec. 28, outside of the city. The new application places both in the SE~~1~~SE~~1~~.

Please review the application carefully and if it is correct sign and return it to this office as soon as possible as processing will not begin until it is received.

If you have any questions, please contact me.

Sincerely,

STEVE McCORMICK
Sr. Resource Analyst
