RECEIVED

FEB 24 1969

Dear Mr. Reynolds: Department of Reclamation

Inclosed find check for \$26.00,
for amendment fee, plus license for
permit No. 27515.

If the map on amendment form
needs to be filled in, I will need
more room than is supplied there,
It takes five sections, one of these
old form No. 0 would do fine.

The only question I have is in
regard to the quantity of water
diverted.

I do not understand acre feet very
well, but the way I multiply cubic
feet per second into acre feet, a 320
miners inch flow would take approxi-
mately 90 days to divert 939 acre feet.

If this is roughly right I agree, if not
I would feel that the license should
be honored as long as there was water
to fill it.

Very truly yours, Guy L. Lister

POINT OF DIVERSION

Permit No. 27515

Comes now Jeff G. Latham
and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho, No. 27515.

That the point of diversion is described in said Permit as being located:
NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec.26, Twp.15N. Rge.22E.B.M.

That he now requests that the point of diversion be changed to a point
located: NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec.27 Twp.15N. Rge22 E.B.M.

That the reason for desiring to make such change is as follows:

Error in the original discription

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Dear Mr. Lyon:

Enclosed is an indefinite extension of time in regard to Permit No. 27515. This is much simpler method than trying to out-guess the time required for the Bureau of Land Management to complete action on a Desert Entry. This office should be notified immediately on action taken by the Bureau of Land Management.

Enclosed also is a new list of fee charge by this department which is the same as in the past except there is a charge of \$1.00 for each amendment to a permit.

Kindly note the second and third items. The applications should show under remarks that the application is made in connection with a Desert Land Entry. The application should request the full 5 years for completion of works.

Re: Permit No. 27515
Jap A. Latimer

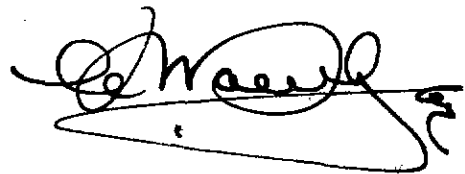

Dear Mr. Carter:

Mr. Jap A. Latimer, May, Idaho, received notice that he should complete his diversion works for the above permit on or before September 2, 1960 in accordance with the issued permit therefor. This letter is to notify you that Mr. Latimer has a constructed ditch to carry the required water to the land upon which it is to be used. In fact, the ditch runs through this property, but the Bureau of Land Management of the United States Department of the Interior has not as yet given Mr. Latimer the right to fence the land and build his lateral ditches and have not informed Mr. Latimer when they will do so.

Due to this situation and because of no fault of Mr. Latimer, we request that the time for proof of completion of works be extended to the statutory limit, September 2, 1963.

If your department is not willing to make the extension, Mr. Latimer is ready to make proof of completion of diversion works to and through the property so far as he is now able to do so.

Sincerely yours,

CWL/lc

Dear Sir:

Under the terms of your permit No. 27515 you are required to complete your diversion works on or before September 2, 1960. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion of Works will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. N. CARTER

Dear Miss Rutledge:

In your letter of July 24th you returned to me the application for permit of Jap A. Latimer for correction to show Morse Creek as the source of water supply and not the existing Latimer Ditch.

I have reconstructed the maps because, in looking up the old Grubb Ditch, records of which I think you have in the office. We find the point of diversion from Morse Creek to be in Section 26.

Returned herewith is Mr. Latimer's check in the amount of \$6.50, with new application and new maps, hoping this now meets with your approval. If you wish any changes please feel free to write my office and we will be pleased to furnish any further information.

Please send me twelve Form No. 1, Application for Permit.

Sincerely yours,

Dear Mr. Lyon:

We are returning the Application for Permit in the name of Jap A. Latimer for correction.

Source of water supply is Morse Creek and not Latimer Ditch as the ditch does not have a water right. Location of point of diversion would be the head of the Latimer Ditch or the point on Morse Creek where the water is diverted.

We could make the corrections but our Lemhi County Map does not show Morse Creek in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 27, as shown on the maps, Form No. 0.

The check for \$6.50 is correct amount for filing fee, however, we are returning it, attached to the application, and it may be returned with the corrected application.
