STATE OF IDAHO,

County of Lemhi

} ss.

Fitch Cochran

being first duly sworn, upon his

oath deposes and says:

That he is the owner of a decreed water right appurtenant to the following described land to-wit:

NE $\frac{1}{4}$ of SW $\frac{1}{4}$ - SE $\frac{1}{4}$ of NW $\frac{1}{4}$ - W $\frac{1}{2}$ of NW $\frac{1}{4}$ of Sec. 27

NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 34 - S $\frac{1}{2}$ SE $\frac{1}{4}$ - NW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 27 - Tn. 14 - R. 22 E.B.M.

as evidenced by the decree dated sixth day of April 1910.

in the cause entitled Lorenzo Falls et al, Plaintiffs.

vs. Uriah Wells et al, Defendant, brought

in the district court of the Sixth Judicial District of the State of Idaho, or

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho No. _____

That he intends to change the point of diversion, as described in said decree or permit, to the following described point:

about one hundred yards from the north east west quarter of the south east quarter of section 35 T. 14 R. 22 E.

That such change will be made for the following reasons, to-wit:

Because my old ditch has a old washed channel and it flows about a mile further on account of the crooks and turns and is always washing and never puddles so that it sinks a lot of water and where the new point of diversion is below the old one where over a thousand inches now flow to other parties so it will put some of the water to get together for about a mile in the main Pahsimero river. I was talking with Mr. Fairis the engineer who is in here constructing the new dam gates and he is in favor of it and he is in favor of it

risk.

And further deponent saith not.

Fitch Cochran

Subscribed and sworn to before me this

9th day of August 1921.

Miss Stella Hurst

Notary Public.

STATE ENGINEER'S OFFICE

REGULATIONS AS TO CHANGE OF
POINT OF DIVERSION

Section 3247 of the Revised Codes provides that a person entitled to the use of water, may change the place of diversion if others are not injured by such change. The Board of Irrigation has adopted the following regulations as to procedure under said section.

The person desiring to change point of diversion must file with the State Engineer an affidavit describing his water right, setting forth his intent to change point of diversion and the reasons for such change, together with an averment that no one will be injured thereby and that deponent will make such change at his own risk.

The point to which it is desired to change the place of diversion must be described as follows:

When the amount claimed does not exceed 25 cubic feet per second and point of diversion will be on surveyed land, locate same by giving the legal description of the 40 acre tract in which it will be situated. If upon unsurveyed land, give approximate distance to mouth of stream from which water is claimed or to the mouth of some creek flowing into said stream. Where there is more than one point of diversion, describe each separately and specify the amount claimed from each.

Where the water claimed exceeds 25 cubic feet per second, locate the point to which it is desired to change the place of diversion as follows:

If upon or near surveyed land, tie point of diversion by course and distance to section or quarter section corner. If said point will be more than two miles from the corner of a public survey, the tie may be made to the mouth of the stream from which the water is claimed or to the mouth of some creek flowing into said stream.

The affidavit must be accompanied by maps in duplicate, showing the following details:

1. If for irrigation and domestic use:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches, including laterals delivering water within one mile of each 160 acre tract of the lands to be irrigated.
 - (f) Lands to be irrigated to be shown by crosshatching, outlining, or coloring.
2. If for other than irrigation and domestic purposes:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches.
 - (f) Points or points of use.
 - (g) Point or points of return to stream after use.

If application is for more than 25 cubic feet per second, the maps must be prepared from actual survey and must be certified to by the engineer in charge of survey, in the following form:

I hereby certify that this map was prepared from an actual survey made by me 191..... and correctly shows position of points indicated thereon.

.....
Engineer.

Mr. Fitch Cochran,
May, Idaho

Dear Sir:

Reference is made to your letter of August 10th transmitting a notice of intention to change the point of diversion of your decreed water right. Under the statutes, such notice is simply recorded in this department and is neither approved nor disapproved. In case there is any objection to the change, action must be brought in court and you must defend your right. Under the circumstances you relate, it is probable that there will be no objection. At any rate, since you have duly filed notice of the contemplated change, Mr. Paris can install the gate at the place you may desire to divert your water, and he will be advised accordingly.

Very truly yours,

H. G. SWENDBERG
Commissioner of Reclamation

State Engineers
Boise Ida

Dear Sir,

I am sending in an affidavit to have my point of diversion changed. I am not sure as the maps are exactly right and if they are not and it is going to take very much time and it will be satisfactory with your office please write to Mr. Ferris the deputy State Engineer who is here and explain to him ~~the~~ whether he can go ahead and put in my new damment ~~has~~ head gate ~~at the same~~ at the place I wish to have my new point of diversion. I may have time to get it all straightened up before the crew of men start to work on my head gate.

MICROFILMED
I had Mr. Ferris look the proposition over and he thinks it would ~~be a water saving~~ save quite a little water also the water master John Cullers of water district (no 19) thanks

that it would be a benefit.

We expect the crew to start work right away
so wish you would be as prompt as possible
in answering.

Hoping this is satisfactory.

And Diligent

Fitch Bohron

May

Isla

R.S. As I can't find the Permit numbers ~~for the~~
~~water that is described~~

of the water that is long to the described
land and it is necessary please let me
know where I can get them and from what
office.
