RE: License No. 67-07986 – Issuance of License

Dear Water Right Holders:

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

Also, your water right is limited to an annual diversion volume of 0.3 acre-feet, which is the amount you requested in your application. The field examiner who verified your use of water reported that your pond holds 6.4 acre feet. You must either limit your diversion to 0.3 acre-feet or acquire another water right to cover the additional volume. I have enclosed an application form for you.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

SHELLEY W. KEEN

PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) : the petition for reconsideration is disposed of; or
- (b) : the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,

- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Permit No. 67-07986

Dear Permit Holders:

We are reviewing the above referenced permit so we can issue a license for the use developed. In a review of our files, we noticed that you have not complied with a condition of approval of the permit. The condition we are referring to is on the permit as follows:

A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion prior to diversion of water under this right.

Our field examiner found no lockable device on your system and we must resolve this issue before the license can be issued. Pursuant to Section 42-219(6), Idaho Code, "if the conditions of approval on a permit are not complied with, we may issue an order voiding the permit or issue a license for only a portion of the use developed under the permit".

There are a couple of options that you can take to resolve this problem. You could submit documentation that you have complied with the condition after the field examiner had completed his exam, or install the lockable device as required on the permit. I have enclosed a listing of "minimum acceptable standards for measurement and reporting of surface and ground water diversions" which discusses different types of acceptable measuring devices. Since this permit is under the control of the watermaster of Water District No. 67, you may be able to discuss what type of lockable device would be acceptable to him. If the watermaster determines that a lockable device would not be necessary for your system, you could request removal of the condition along with a statement from the watermaster that he is in agreement with the request.

We will withhold further action on this permit for 30 days from the date of this letter in order to allow you time to respond. If we do not receive a response from you within this time period we will assume you are not interested in pursuing a water right license for this permit.

If you have any questions in regard to this matter, please do not hesitate to contact me.

Sincerely,

KAY WALKER

E. NARRATIVE/REMARKS/COMMENTS

1. This permit is for a wild life pond. The dike for the pond was constructed as a road fill for the lane to the house. The dike has a gated 15" outlet pipe, 2-12" crop overflow pipes, and a road way on top. The pond has two nesting islands, and 2 Nest boxes.
2. An inflow channel to the pond appears to be a constructed drain, and most of the water is probably irrigation runoff from the farm land to the East. Sheet runoff from an irrigated pasture adjacent to the pond (SE) was the only inflow at the time of the exam. It's possible that the inflow channel also conveys natural flows during wet periods.
3. There is no lockable device on the diversion; Cond. 5. This may not be practical as most of the water enters from the drain channel, but some inflow enters the pond from the nearby pasture.
4. No measurement was taken as the inflow and out flow was very small.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 167-07986

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form and license examination fee submitted for the above referenced permit.

Condition No. 5 of your water right permit requires that you install a lockable device to provide the watermaster suitable control of the diversion. Your proof submittal shows that you have not installed this device. Please be aware that your failure to have the device installed and operable at the time the department conducts the field examination may jeopardize the validity of the permit. You may request, in writing, a waiver of the condition by the department.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination or the measurement device condition, please contact the **WESTERN** Regional Office of the department in Boise at (208)334-2190.

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time submitted in connection with the above referenced permit. The time within which to submit proof of beneficial use is extended to **June 1, 1999**. Please note that the department has granted this extension based on **due diligence**. RE: PHONE CONVERSATION

SUBJECT: PLEASE REDUCE CFS AMOUNT FROM 1 CFS TO 0.2 CFS

1. I received a call from Curtis this morning, he had gotten a call from a neighbor that was concerned about the 1 CFS applied for.
2. Curtis would like to change this amount on the application prior to it being issued as a permit.
3. I told Curtis that he could either come in and make a pen & ink change with his initial on the permit or write a letter requesting to change the 1 CFS to 0.2 CFS and mail it in ASAP.
4. Curtis said he would make the letter today and mail it in today.
