CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. Place of use is located within Lot 2, Block 2, Sage Mesa Subdivision.

MEMORANDUM

TO: File 67-07957 / Wilbert Bright
FROM: Brenda Chapman
DATE: June 7, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

Per telephone conversation today with Mr. Bright, this permit will not be recommended as a supplemental groundwater right. He stated that there has not been any surface water used on his land since the farmland was subdivided. There are no access ditches in the subdivision.

C. DIVERSION AND DELIVERY SYSTEM

2. Place of Use: The place of use entries have been flip-flopped. Section 28 place of use is in the NWSW $\frac{1}{4}$ and Section 29 is in the NESE $\frac{1}{4}$.

F. FLOW CALCULATIONS

The recommended rate has been reduced based on the Proof of Beneficial Use filed. The permit holder filed for .04 cfs and no fees were paid. That rate is adequate for 1.6 acre of irrigation and also prevents the right holder from having to update his drilling permit from a domestic to an irrigation one.
