E. NARRATIVE/REMARKS/COMMENTS

(from Farm Services)

POND SIZE 3.82 ac Surface x 15' max depth when full.

Has been deepened slightly since permit issued; is about 4' low now even though it filled this spring, due to leakage. Planted ~22 ac winter rye last fall & irrigated once - mostly harvested and have had problems w/ frost & morning glory but plan on re-seeding this fall.

Prior to grain, had trees in but they failed (poor soil which has slowly been improved).

An 8 HP pump may be positioned in 2 spots, at either end of embankment, for pumping to gated pipe. Tailwater may all return to pond. Stream dry & irrigation system dismantled at time of exam.

Same pond as described in 67-7835B except depth has been modified. Pond has an overflow pipe but no controlled outlet. This drainage dries up in early summer. 67-7835B is for stock water storage - this permit examined in 1993, recommendation not yet completed.

Other overlaps: 67-0080A & 0081H, decreed to Orchard Water Co. Common knowledge is that this water has not been delivered to the Mesa area for many years. Source is MF. Weiser R. and therefore not really a problem in analysis. These rights claimed in other areas except for 0081T which is claimed for 10 acres in NENE by separate owner (permit holder has 30 ac)

* No control/meas as req'd. However this area is not an active regulated area w/in WD 67. This could be waived. Condition 6 on permit is not applicable - refers to ground water.

Have conditions of permit approval been met? ☐ yes ☒ no *

F. FLOW CALCULATIONS

Additional Computation Sheets Attached

Measured Method: None.

Per pump data (I reviewed ~~but~~ no copy possible) this pump rated
 $14,220 \text{ gph} = 237 \text{ gpm} = .53 \text{ cfs @ } 40' \text{ lift}$
 $16,740 \text{ gph} = 279 \text{ gpm} = .62 \text{ cfs @ } 20' \text{ lift}$
 Check: 50 gates @ 5 gpm = 250 gpm (permit holder estimate)
 allow .42 cfs for 21 ac

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 21 \times 4 = 84$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .42 \times 214 \times 1.9835 = 178.3$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 84$$

2. Volume Calculations for Other Uses:

POND VOLUME: 4 surface acres $\times$ 10' avg depth = 40 AF

PROOF DUE NOTICE

RE: PERMIT NO. 67-07925

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1995. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

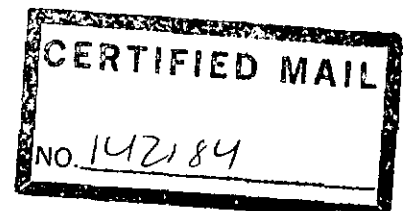

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.
