ADAMS CO
WASHINGTON CO

MICROFILMED
DEC 23 1996

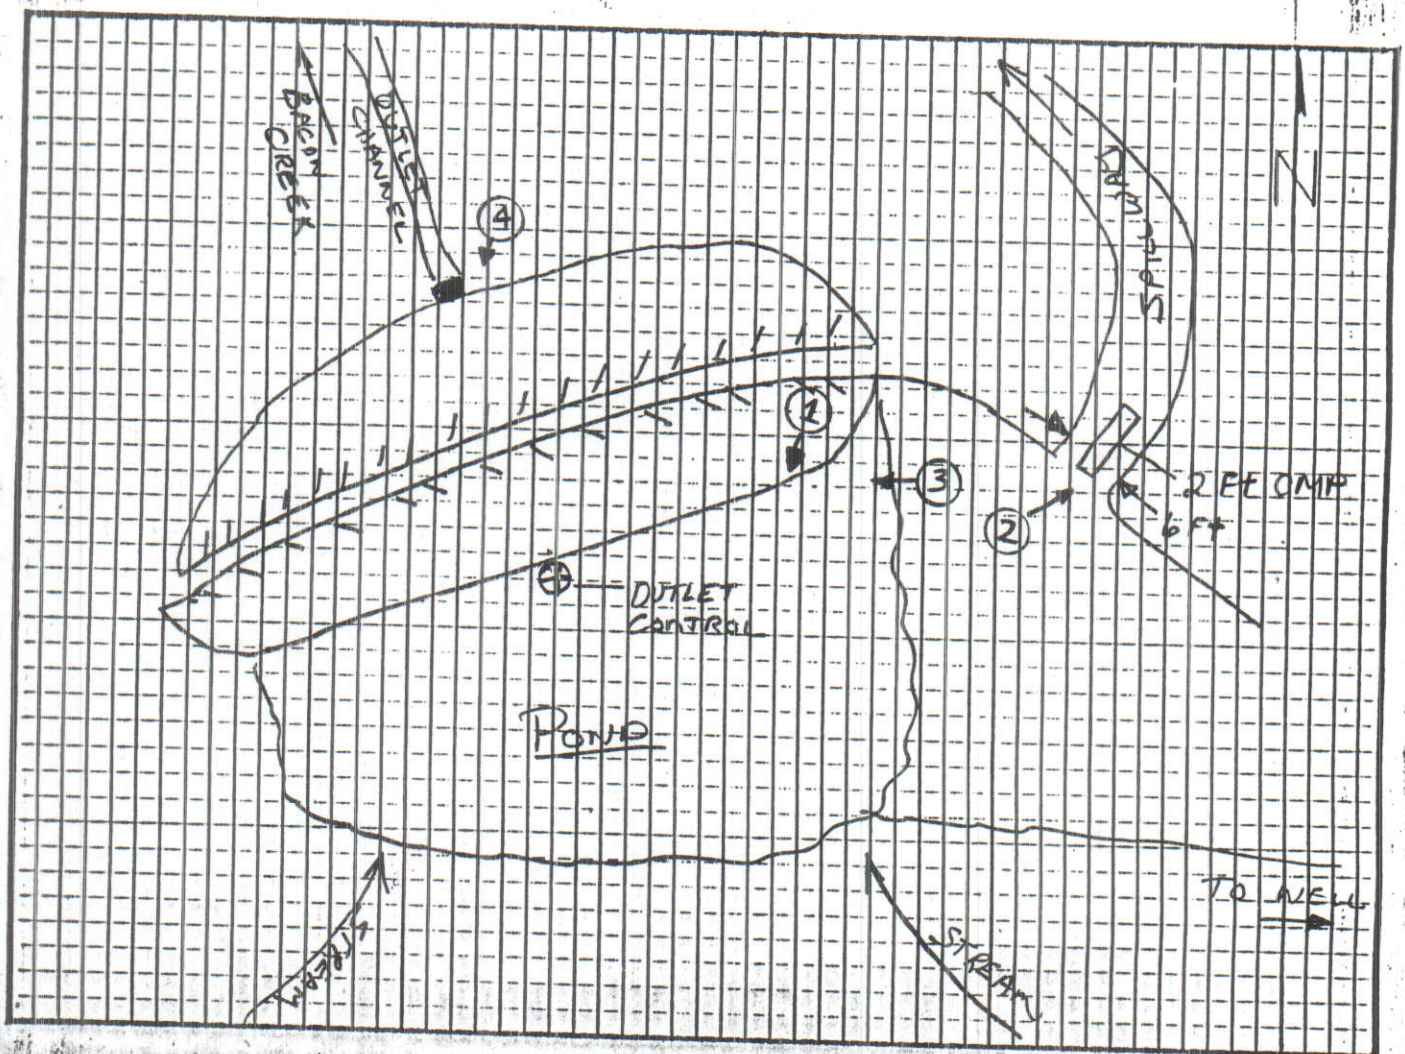

GENERAL CONDITION AND DESCRIPTION OF DAM: Dam is well maintained.

The source is several unnamed streams, spring runoff. Appears to be a small spring in the pond center. Fill around spillway culvert has been dug away, appears OK.

INSTRUMENTATION READINGS (Piezometer, Seepage measurement, Alignment, Elevation, etc.)

Elevations shot with a hand level.

SKETCH OF DAM SHOWING LOCATION OF SPILLWAY AND OUTLET WORKS AND ANY MAINTENANCE PROBLEMS:

RECOMMENDATIONS: The dam is too small to be under Department regulation. Continue maintenance, no problems noted.

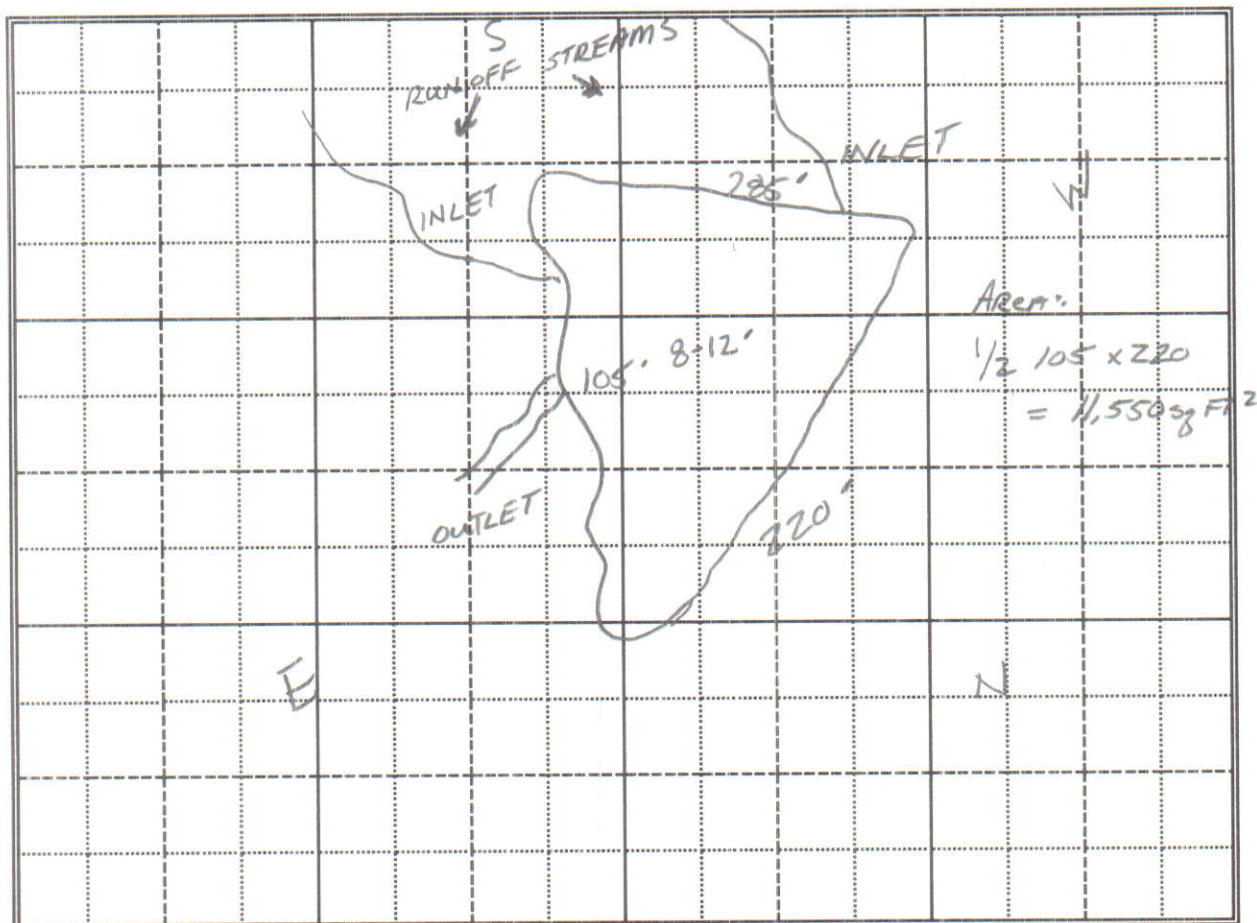

Remarks:

Dear Water Right Holder(s):

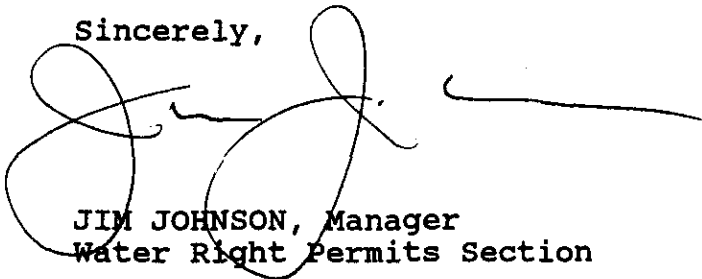

We acknowledge receipt of the correspondence changing ownership of the above referenced water right to you. We have modified our computer records to reflect this change in ownership.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address **PRIOR TO** July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

If you have any questions, please feel free to contact us.

Sincerely,

JIM JOHNSON, Manager

**FERREL CROSSLEY
BACON VALLEY RANCHES INC
1684 GOODRICH CREEK RD
COUNCIL ID 83612**

RE: Water Right No. 67-07838

Dear Mr. Crossley:

Rob Whitney called me earlier this week to say that you had spoken to him about the amendment request I sent you for Permit 67-07838. He told me that you wanted to discuss (1) the maximum storage volume recommended and (2) the location of the point of diversion and place of use.

The maximum storage volume was calculated by the field examiner to be 1.3 acre feet. However, Rob sent me information showing that Western Region Dam Safety Inspector John Westra determined your storage volume to be 8 acre feet in 1990. I have changed the recommendation for your license to show a maximum storage volume of 8 acre feet.

The amendment was requested because the examiner reported that your dam and reservoir extend across the line between the SW $\frac{1}{4}$ SE $\frac{1}{4}$ and the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 15, Township 15 North, Range 2 West. Your application indicated only the SW $\frac{1}{4}$ SE $\frac{1}{4}$. I checked the USGS 1:24000 topographic quadrangle, and it shows your reservoir in both the SW $\frac{1}{4}$ SE $\frac{1}{4}$ and the SE $\frac{1}{4}$ SW $\frac{1}{4}$.

I have enclosed a new amendment form with the revised volume figure. Please sign and return it with the \$50.00 filing fee within 14 days. If you have any questions, please contact me at 208-327-7946.

Respectfully,

Shelley Walter Keen
Water Rights Supervisor

Mr. Ferrel Crossley
Bacon Valley Ranches
HC 62; Box 1840
Council, ID 83612

Ref: Bacon Valley Ranch Dam

D67-7838

Dear Mr. Crossley:

The Department appreciates your cooperation and help in the recent inspection of your dam. As discussed with you, the dam has a hydraulic height of 7 feet, and a storage capacity of 8 acre-feet. The hazard evaluation placed the dam in a low risk classification.

Certain dams in a low risk area, and that store less than 10 acre-feet of water are not subject to the Department jurisdiction. (Idaho Code Chapter 17, Section 42-1714, Rule 2,6,4.). Your dam would fall under this category, and will not be regulated and inspected by the Department.

Approximately every five years the Department will re-examine the site to determine whether changes in the hazard class or dam size have occurred. Please notify the Department of any further development of the area below the dam, or of an increase in the reservoir storage capacity.

The inspection revealed the dam is in good condition and adequately maintained. Please continue proper maintenance and operation for safe future operation.

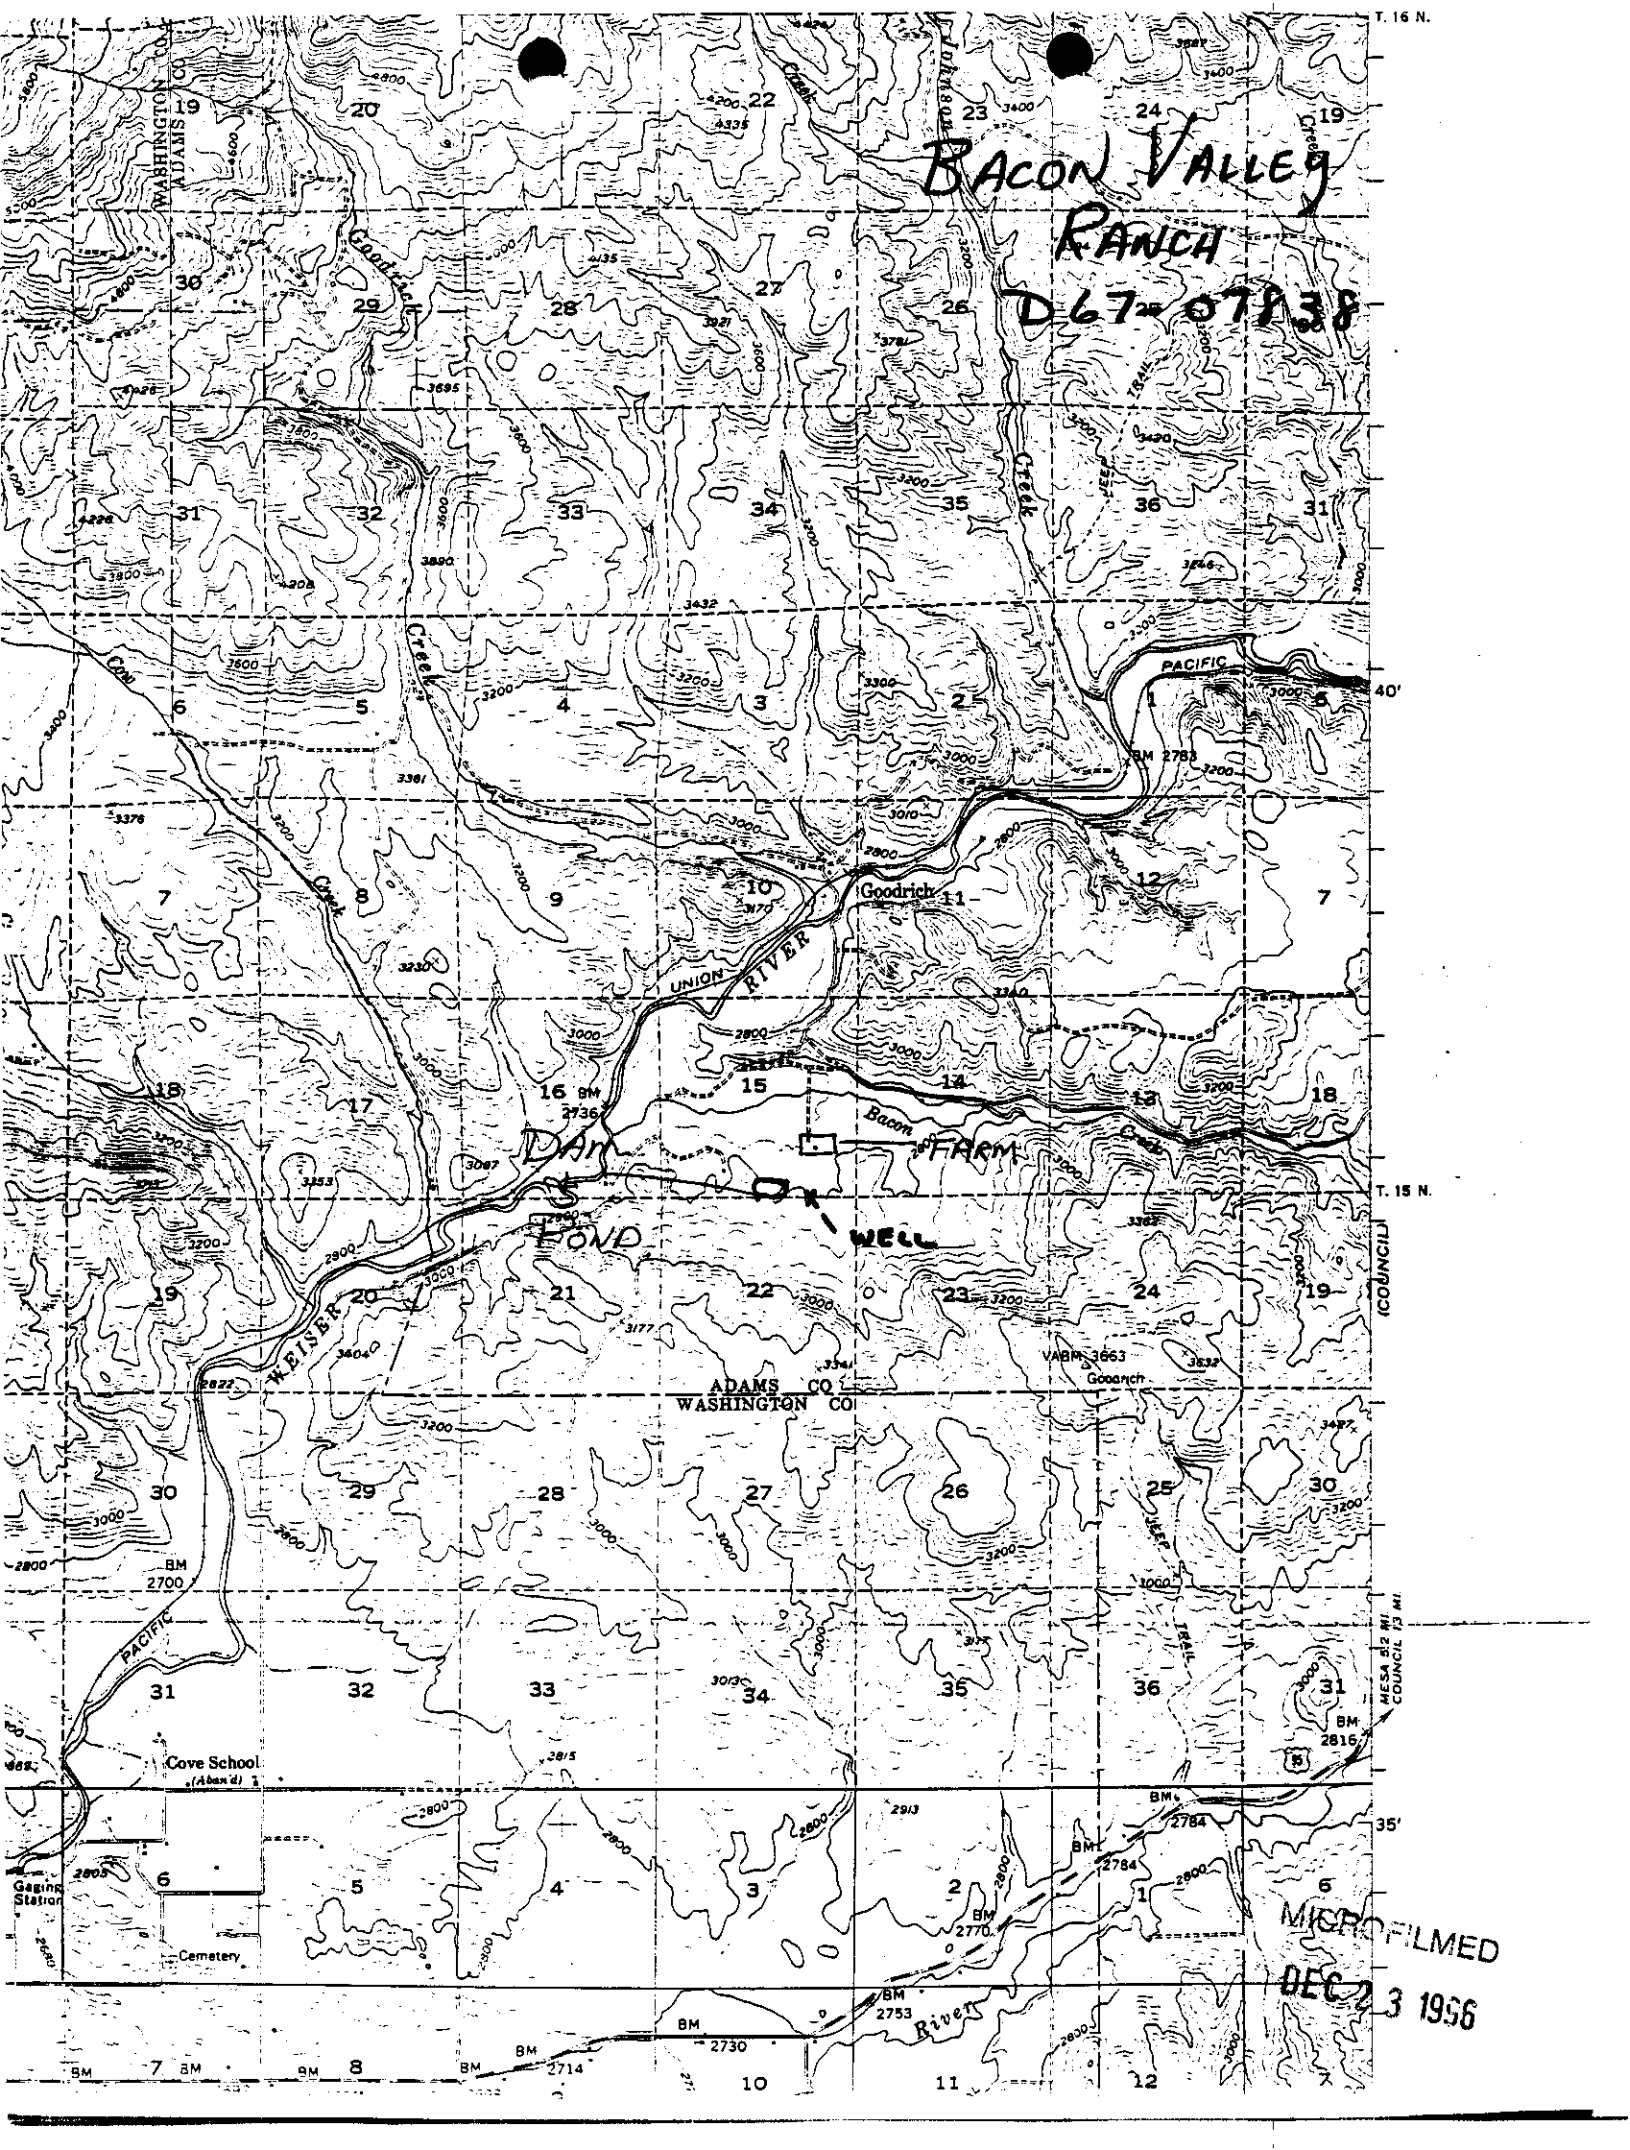

Should you have any questions, feel free to contact me.

Sincerely,

John Westra
Western Region

GENERAL CONDITION AND DESCRIPTION OF DAM: Dam is well maintained

The source is several unnamed streams, spring runoff. Appears to be a small spring in the pond center. Fill around spillway culvert has been dug away, appears OK.

INSTRUMENTATION READINGS (Piezometer, Seepage measurement, Alignment, Elevation, etc.)

Elevations shot with a hand level.

SKETCH OF DAM SHOWING LOCATION OF SPILLWAY AND OUTLET WORKS AND ANY MAINTENANCE PROBLEMS:

RECOMMENDATIONS: The dam is too small to be under Department regulation. Continue maintenance, no problems noted.

Remarks:

FROM: Shelley W. Keen *SWK*

RE: Response to amendment request

This afternoon Rob Whitney of Western Region called to say that Ferrel Crossley came to see him to discuss the licensing amendment request for Permit 67-07838. Mr. Crossley disputed the storage volume being recommended. Rob said that John Westra has some dam inspection information that he will copy for me. Rob also suggested comparing John's location map to our P/D and POU recommendations.

RE: WATER RIGHT NO. 67-07838

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the point(s) of diversion and the place(s) of use description. Please review carefully and if you concur, sign the amendment and return it with the \$50.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of Conditions of Approval and Remarks proposed for the license when it is issued. These conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

RE: Measuring and/or Lockable Devices

Dear Mr. Myers;

I am currently reviewing for license approval two permits, ~~67-07838~~ & 67-07895, which are located within your water district boundaries.

One of the conditions of Permit 67-07838 requires the permit holder, Bacon Valley Ranches Inc., to install a measuring device and lockable controlling works on the diversion works. A department field examiner found a 1.3 AF on stream stockwater storage pond collecting water from two intermittent unnamed streams tributary to Bacon Creek. The examiner did not find a measuring device or lockable controlling works installed on the pond.

One of the conditions of Permit 67-07895 requires the permit holders, Franklin D and Treva L Land, to install a lockable device on the diversion works. A department field examiner found 0.06 cfs of water diverted from an unnamed stream tributary to Tonnison Creek via buried pipeline (gravity flow) to two stock tanks. The examiner did not find a lockable device installed.

The purpose of this letter is to seek your input concerning the measuring and/or lockable device requirement on these two permits. I will hold processing of these rights for 14 days pending your response.

If you have any questions, you may contact me directly at (208) 327-7944.

Respectfully,

Cindy Zimmerman

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 67-07838

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

Council, ID 83612

RE: PERMIT NO. 67-07838

Dear Mr. Crossley:

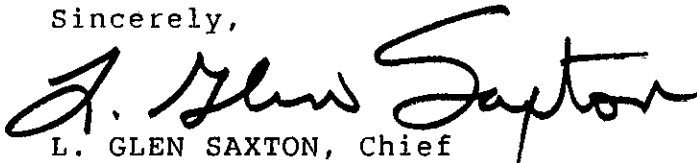

I have reviewed your letter response dated June 15, 1992, to Karen Gustafson of this office.

The license examination fee for the storage of 8.0 AF of water diverted at a maximum rate of 1.0 cfs (450 gallons per minute) is \$100. I interpret your letter to say that you will only submit a fifty dollar (\$50) license examination fee. The department will accept the proof you submitted and the \$50 fee, but you need to recognize that the license eventually issued by the department will not provide for the storage of more than 8 AF diverted at a maximum rate reduced to 0.20 cfs (90 gallons per minute). The 0.2 cfs is the upper rate limit for a license examination fee of \$50.

If you do not plan to divert groundwater (from a well) to the reservoir, you may be exempt from the flow measuring installation device requirement. As far as the diversion from the unnamed stream, the conditions of the permit require you to install controlling works of a type acceptable to the department and to the watermaster. Note that this installation was required prior to the diversion of water under terms of the permit.

The department will acknowledge receipt of the proof of beneficial use under separate cover. If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON, Chief
Water Allocation Bureau

RECORDED

JUL 30 1992

c: IDWR - W. Region

June 15, 1992

This process is getting out of hand, confusing, and you are reading more into the permit than is there.

This is a small reservoir that will at most hold 8 a.f. : to be used only for stock water - the original permit was submitted when it was part of an irrigation set up, but not used for irrigation anymore, therefore the \$50.- is sufficient and how do you lock a pond or put in a flow meter?

will not be anxiously waiting your reply.

Re: Permit No. 67-07838

Dear Permit Holder:

Returned is the Proof of Beneficial Use form submitted to this office. It indicated the total rate of water to be stored of 8 acre feet. However, the permit was also issued for a rate of flow of 1.0 cfs.

When the total maximum rate of diversion is greater than 0.04 cfs, a license examination fee is required to be submitted with the proof. A license examination fee based on a rate of flow of 1.00 cfs is \$100. Note the back of the enclosed instruction sheet/fee schedule. Since you have already submitted \$50, an additional \$50 is required.

Please return the proof and fee to me within 30 days of the date of this mailing. Upon receipt of the proof form and fee, we will continue processing your proof by notifying the region that a field exam is needed.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

Karen L. Gustafson

PROOF DUE NOTICE

RE: PERMIT NO. 67-07838

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P67-07838

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device and lockable controlling works that will enable the watermaster to control the rate of diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

@: Am writing to clarify some misinformation:

This reservoir was constructed in 1974, retains spring runoff water from a couple draws that are dry when it stops raining.

There is a deep well nearby that on dry years water is pumped from to the reservoir for stock-water.

CONVERSATION MEMORANDUM

DATE 1-25-90

FILE 67-07838

NAME OF PARTY Ferrel Crossley

EMPLOYEE John Westra

RE: Application for permit

Mr. Crossley indicated the well & pond were originally
used as the source of water to irrigate ground under
WR # 67-07183. This was discontinued due to pumping costs.
Presently, the system is only used for stockwater purposes.

Dam and reservoir are well maintained. Outlet controls
are operable. For inspection and specifications see
dam safety file # D67-07838
