CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

E. NARRATIVE/REMARKS/COMMENTS

This system makes use of a wastewater ditch that flows along its property line. As the ditch comes down the NE corner it is then placed into a pond where it is pumped out to irrigate pastureland. The pump is a $\frac{3}{4}$ horse that is hooked into a mainline of risers. Hand lines then are moved to various locations. There are 5 rows : around 30 cattle that use the system. Only 4 acres of pastureland is irrigated under this system.

Mr. Skelton called to inquire about removing Condition #3 from the permit. He believes that his operation under this right will not interfere with other users' systems.

I informed him that the best way to handle this would be to contact the watermaster, (WM) Gerry Meyers (355-2345), & have the WM evaluate the diversion. The WM could write a letter to IDWR with a recommendation concerning Condition #3.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 67-07818

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck

Dear Ms. Fleck,

This letter is in regard to Permit # 67-07818 and in reference to a waiver for locked headgate diversion of water for our pond built in 1983.

The pond sits at the west end of our property adjoining a slough. The slough fills by accumulation of waste water from Mill Creek primarily used by our neighbors. We installed a drain ditch through the middle of the slough, hence the origin of our pond water. There is no actual ditch to install a locked headgate on.

In 1989 we purchased a pump and sprinkler pipe, this enabled us to sprinkle a small portion of our property from the waste water in the pond. The pond is used consistently for stock water throughout the year.

Please advise us if we need to have the existing pond inspected and what the fee requirement would be to finalize the above permit.

Sincerely,

Earlene Shelton

RE: PERMIT NO. 67-07818

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: PERMIT NO. 67-07818

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.
