A well with a 6" casing and one Hp. pumps discharges water through a 1" discharge pipe through a 1" buried pipe to a Catholic church 45' from the well. From a pressure tank in the basement of the church a one inch pipe provides water to two hydrants in front of the church and one hydrant behind the church for irrigation by garden hose and sprinklers. A gauge at the pressure tank registers 50 psi. A 5-gallon bucket measurement equaled 24 sec. for 5-gallons.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

The church contains a men's and women's restroom with one toilet and one sink each and a kitchen with one double sink. The facilities are used by a Catholic parish with about 150 members who have about 165 functions a year and a Lutheran parish of 50 members and 60 functions a year. Average weekly use was estimated at 4 hrs.

Diversions rate recommended at measured rate of .03 cfs.
The other rights in the same PQ do not affect this permit.

RE: PERMIT NO. P67-07812

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
