Dear Mr. Tutthill,

I believe this water right affects our operation. I would protest the irrigation part of this right trying to be established. I utilize stock water also out of this source and if this person would irrigate at dry times it would dry my stock water up.

Sincerely,

E. NARRATIVE/REMARKS/COMMENTS

This system diverts water from HANSEN CREEK to irrigate @ 6 acres of pasture. The permit holder uses a MOVABLE DAM TO irrigate this pasture. There is NO POSSIBLE MEASUREMENT BECAUSE OF THE NATURE OF THE WORKS. The Field is corrugated with ditches and the flood waters spill either back into HANSEN Creek or further down into Hermet Creek. A lockable device, a permit condition, has not been installed, Therefore the conditions of the permit have not been met. Around 10 head of horses use this system for stockwater purposes

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 67-07800

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 67-07800

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Nina Shields
Secretary/Records Manager

RE: PERMIT NO. P67-07800

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor

Re: Application for Permit 67-07800 in the Name of Kenneth Dale Ivey, Jr.

Dear Mr. Yates:

We are in receipt of your letter dated November 18, 1989, in which you protested the approval of the above-referenced application for permit. Please be advised, however, that the final protest date was November 20, 1989, and that the letter was not received by this office until November 22, 1989. Pursuant to Idaho Code, we cannot officially accept the protest as valid.

The concerns that you have noted have been reviewed by this office. Please be advised that any water right issued by this office is conditioned to be "subject to all prior water rights." This does offer protection to any senior water rights you may have.

At this time we will proceed with processing of the application. If you have any questions in this matter please call this office.

Sincerely,

DAVID R. TUTHILL, JR., P.E.

Dear Mr. Tutthill,

I believe this water right affects our operation. I would protest the irrigation part of this right trying to be established. I utilize stock water also out of this source and if this person would irrigate at dry times it would dry my stock water up.

Sincerely,

Mark Yates
