RE: Name Change for Permit No. 67-07798

Dear Mr. Papineau:

Permit 67-07798 is currently being reviewed for licensing. In the 1994 field exam conducted on the property, the examiner mentions that, because of a divorce, you wish to have the license issued in your name only. When a right is in the permit stage, it is classified as personal property and we cannot make any ownership changes.

Since the permit lists the ownership being in Kevin or Christine Papineau's names, you may assign the permit to yourself. I will enclose a partially completed assignment form for you to complete and have notarized. Please direct it to my attention along with the \$25.00 assignment filing fee. If I do not receive the assignment within 30 days, the permit will be licensed in both your names.

In Idaho, a licensed water right is considered real property; therefore, proof of ownership of the land would be proof of owning the water right unless it was specifically excluded in the divorce.

If you have any questions regarding this matter, please feel free to contact me.

Sincerely,

BRENDA L. CHAPMAN
Water Resource Agent

RE: PERMIT NO. P67-07798

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of
