3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

This system used a spring that was surrounded by a collection box. As the collection box filled, the stream only trickled, the water fed into a buried line that gravity forced downhill 500 feet to a watering trough. The system is set up for an overflow, but at the time of the exam there was no overflow. Around 40 range cattle use this system.
