RE: Water Right No. 67-07589, 67-07733, & 67-07837

Dear Mr. Jepson:

I recently received a 'New Property Owner Notice of Change of Water Right Ownership' form on the above referenced water rights.

Water Right Nos. 67-07589 and 67-07733 are licensed water rights. In Idaho, decreed, licensed, and claimed water rights are considered real property; therefore, proof of owning the land is proof of owning the water rights unless specifically excluded in the sale. Water right statute does not provide a means for changing owner of record for decreed water rights; although, I have placed your correspondence in each of the files for future reference.

Water Right No. 67-07837 is in the stage of a permit. In Idaho, a permit is considered personal property and can only be assigned by the owner of record. Our records identify Henry J. Williams as owner of the permit. The form submitted was not signed by Mr. Williams and, therefore, is not acceptable.

I have enclosed a partially completed 'Assignment of Permit' form which Mr. Williams may sign and have notarized.

If you have any questions, please feel free to contact me directly at 327-7944.

Sincerely,

A handwritten signature in cursive script that reads "Cindy Zimmerman".

MEMORANDUM

To: Gary Spackman
From: L. Glen Saxton *WGS*
RE: PERMIT 67-7589 - PRIORITY ADVANCEMENT
Date: November 1, 1988

It appears you are correct that the order signed October 19, 1988 is in error with respect to the new priority date.

Analysis is as follows:

- August 1, 1987 - proof due date.
- August 7, 1987 - 1st proof submittal, no fee due to size.
(Consider as the "first payment" which is referred to in the Nov. 7, 1987 memo).
- November 25, 1987 - Letter sent from S.O. advising amount on license would be limited.
- April 26, 1988 - Amended proof submitted with a fee.
(consider as the "supplemental partial payment" referred to in the Nov. 7, 1987 memo.

The number of days to advance the priority appears to be the difference in days from November 25, 1987 and April 26, 1988 added on to July 21, 1982.

If you agree with this analysis, please return and we will prepare an amended order.

Re: Permit No. 67-7589 (HENRY WILLIAMS)

Dear Mr. Williams:

On August 7, 1987, you submitted proof of beneficial use of water in connection with the above referenced water right permit. On October 15, 1987, the department advised you that a field examiner would contact you and arrange to examine your system.

The purpose of this letter is to advise you that the maximum amount of water that can be licensed under the permit is 0.04 cubic feet per second (cfs) which is the equivalent of about 18 gallons per minute. The reason for this limitation is that on the proof you filed, you showed a total amount of 10 gallons per minute even though for the separate uses you showed more water than the total amount. Ten gallons per minute of water does not require the submittal of an examination fee.

If the department finds that more water is being diverted and beneficially used than 18 gallons per minute and you want a right to the additional water, you will have to submit the examination fee and the priority of the permit will be advanced.

If you have only developed about ten gallons per minute, there is nothing further you need to do. If, however, you have developed more water than 0.04 cfs (18 gallons per minute) and want a right to that water, I suggest you contact the department relative to submittal of the examination fee. The fee for the amount of water authorized by the permit (0.20 cfs which equals 90 gallons per minute) would be \$50.

Please feel free to call this office if you have questions.

Sincerely,

RITA I. FLECK
