shallow wells that are described in this permit and in claim no. 67-4424. No surface water is being used for irrigation on this land. Claim 67-4518 is for use on adjacent land. Claim 67-4424 was filed to bring the total rate of diversion up to 0.60 cfs for 30 acres. However, only 28 acres were found to be irrigated. Therefore, this water right when combined with claim no. 67-4424 should not exceed 0.56 cfs and 126.0 afa.

Re: Permit No. 67-7574

Department of Water Resources

Dear Mr. Keithly:

We have received the note and check for \$125 concerning the above-referenced permit.

However, once a permit is issued for the amount applied for it cannot be increased. In order to acquire a right for the additional water used a new application for permit needs to be filed. Enclosed is an application for permit with instructions for your review.

We can only accept this check for the amount of water listed on the permit, or .40 cfs, which is a \$100 exam fee. The .40 cfs amount is a rate of diversion and does not limit you to an acre foot amount. Your exam fee is being paid on the cfs amount only, and the acre foot amount will be calculated at the time of licensing based on 4.5 acre feet per acre. Enclosed is receipt No. 44933 covering the \$100 exam fee. I have requested a \$25 refund from our state office be forwarded to you.

A letter will be mailed to you requesting you call for an appointment to conduct the exam sometime this summer. Please contact us if you have any questions.

Sincerely,

Jan Shurte

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Dear Mr. Olson:

Your water right filings have been reviewed and revised to reflect what, I believe, you intend to accomplish. If the enclosed forms are not acceptable, I would advise you to come into our office so we may accurately record your water rights. All of your materials have been returned including your receipt #22842 for \$60 in filing fees.

As best as I can figure, you have one well near a house next to Airport Road. This is a hand-dug well 4 feet wide by 32 feet deep that discharges into a cement ditch. It has a 1928 date of priority. The second diversion on the west side of the property you described as a well 4 feet wide by 20 feet deep. It was developed in 1973 that is pumped to carry water in a pipeline back to the head of the cement ditch. Do you have any other water rights that must be recorded?

Like you did, the 1928 well is on the Claim to Water Right form. Due to a 1963 law, the 1973 diversion is on the Application for Permit form to develop a new water right. Your \$60 in fees was correct for these rights. If the enclosed forms are correct, you need only to sign the application and claim with a notary public affixing her seal to the claim and to return both of the forms to this office.

If I have misinterpreted what you wanted to record, please come to our office so the matter can be settled quickly. Should you have some questions, let Jan Grover, Lee Sisco or me know. If you have not taken any action by July, we will process a refund of \$60 and erase the matter from our books.
