BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PERMIT)
NO. 67-7554 IN THE NAME OF)
EDWIN V. & LINDA M. SVANCARA)

ORDER OF REINSTATEMENT

This matter having come before the Idaho Department of Water Resources (Department) the Department finds as follows:

FINDINGS OF FACT

1. On March 4, 1982 the Director of the Department of Water Resources issued Permit No. 67-7554 with a condition of approval that proof of construction of works and application of water to beneficial use be submitted on or before March 1, 1987.

2. On December 31, 1986 the Department sent a proof due notice to the permit holders.

3. On March 10, 1987 the Department sent a lapse notice to the permit holders since neither proof of beneficial use nor a request for extension of time had been received from the permit holders.

4. On May 20, 1987 the Department received a proof of beneficial use statement from the permit holders.

5. Section 42-218a, Idaho Code, authorizes the Department to reinstate a lapsed permit, with the priority date advanced to the date that proof of beneficial use was received, upon submittal of evidence

MICROFILMED

MAY 13 1989

clearly establishing the extent of beneficial use prior to the proof due date and a showing of reasonable cause why the proof was submitted late.

6. The permit holders submitted evidence to confirm that water has been put to beneficial use. The evidence includes an affidavit from an adjacent property owner attesting to the beneficial use of water as described under the permit continuously throughout the permit authorization period, a second affidavit from an individual who had participated in irrigating the land described under the permit in at least one year of the authorized permit period and had witnessed irrigation in at least two other years within the same period.

7. The permit holders stated that proof of beneficial use was submitted late because they had been in the process of moving from one state to another at the time proof was due and subsequently overlooked the matter.

CONCLUSIONS OF LAW

1. The permit holders have submitted proof of beneficial use along with supporting evidence which establishes that water was in fact beneficially used as identified on the permit.

2. The permit holders have shown sufficient cause why the proof of beneficial use was not submitted in a timely manner.

3. The permit can be reinstated with the date of priority advanced to the date proof of beneficial use was received by the Department.

ORDER

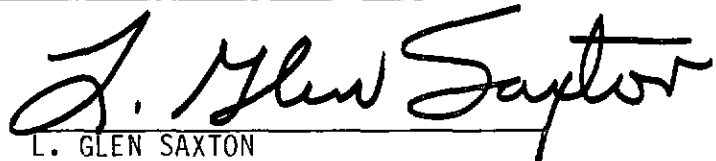

IT IS HEREBY ORDERED that Permit No. 67-7554 is reinstated.

MICROFILMED

MAY 15 1989

IT IS FURTHER ORDERED that the date of priority of this permit is
advanced to May 20, 1987.

DEAR TIM,

Please find enclosed two original notarized affidavits of use for water permit 67-7554. I only specified irrigating season, and no specific dates on one affidavit. In 1987 we used the system from August until October. In 1988 we used the system from March until October. During the period June 1986 until ~~June~~ August 1987 renter occupied the property, who have since moved to Montana. When we moved in in August 1987 the lawn was green, orchard growing and was obvious the water was being used.

Also find enclose an Assignment of Permit from Victor Barton to use. If you need the original, please return the copy and we will furnish the original.

If you have any questions please give me a call at 549-0520 during the day time.

RE: Permit No. 67-7554

Mr. & Mrs. Ed Svancara
Route 2
1323 Long Road
Weiser, ID 83672

Dear Permit Holders:

The Department received a proof of beneficial use statement for the above referenced permit from Mr. Victor Barton on May 20, 1987. The permit lapsed on March 1, 1987, so the 60-day late period during which the permit can be readily reinstated has passed.

Pursuant to Section 42-218a, Idaho Code, (copy enclosed) the permit can now be reinstated only if you submit the following:

- a) Evidence to show that beneficial use of the water did commence and to show the extent of the use of water during the authorized permit period from the time the permit was issued until the proof due date.
- b) Reasonable cause why the proof of beneficial use was filed late.

Examples of evidence to show commencement and extent of use for the type of use represented by your permit may include any well pump or well equipment receipts, well drillers log, well power records, and affidavits from persons knowledgeable of your system and dates of use.

Documentation within the file for this permit indicates that you are now the holders of this permit and that an assignment form was sent to you by the Department approximately one year ago. Further action by the Department concerning this permit was apparently being upheld until the proper assignment form was received. An assignment form is being provided to you once again. This form should be sent to the Barton's so that they may make the full assignment of the permit to you.

Within the past month, the Department has changed its policy in regards to reinstating permits for persons other than the permit holder of record. In particular, the Department may receive proof or evidence for reinstatement from parties other than the original owner if the original owner can not be contacted or is estranged from the present owners. The Department prefers at least to have a statement from the present permit holders if this is indeed the case. Therefore, please inform us at your earliest convenience if it is not possible to have the Barton's make the assignment.

Your proof of beneficial use statement along with any information which may have been submitted with it will remain on file in this office for 60 days to allow you an opportunity to assemble and submit the additional required information.

Please feel free to contact this office if you have additional questions.

Sincerely,

Dear Mr. Burton:

In reviewing your recently submitted water right filings, we have come across some problems and questions which need to be resolved before processing can continue.

On your claim to a water right for groundwater source we have added the point of diversion to your application based on the map submitted, however, the form you completed is an old form and since it was printed the filing fee has gone up to \$30.00. Therefore, we must have the additional \$10.00 filing fee before we can advertise this claim.

On the application for permit submitted, it appears the source should be groundwater rather than springs listed. In order for the source to be called a spring, it must actually be coming out of the ground at the ground surface level. If you have to dig down to the tap water, then it is considered a groundwater source. We have also filled the point of diversion for this source per the attached map. The use of the water needs to be completed along with the place of use if it is for domestic purposes. It appears to be for irrigation only, and in this case the 3.5 acres are already listed correctly. If you are irrigating 3.5 acres then you can apply for up to 0.11 cfs for the same fee. The fee for this application is \$30.00 per the enclosed fee sheet. Therefore, we also need an additional \$10.00 filing fee for this application. We cannot process these water right filings until the additional \$20.00 is submitted along with the information concerning the use and amount of water for the groundwater application.

Please contact us with this information as soon as possible.

Sincerely,

Jan Grover
