RE: Water Right No. 67-07453

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement purposes. This type of coordination could minimize the impact on

existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

PROOF ACKNOWLEDGEMENT LETTER

This office acknowledges receipt of the proof of beneficial use form along with the \$125.00 fee. Your permit was issued for the maximum diversion rate of 0.20 cfs (not 2.0 cfs) and the license exam fee is \$50. I have requested a refund of \$75.

The next step is for the department to conduct the field inspection to confirm and determine the extent of beneficial use. I cannot tell just when the representative from our Western Regional office will conduct the exam, but he will try to contact you or your representative prior to being in the area.

If you have questions, please contact me.

DEPARTMENT OF WATER RESOURCES

INSTRUCTIONS FOR PROOF OF BENEFICIAL USE

HOW TO MAKE PROOF:

In order for a permit holder to fulfill the conditions of the permit and obtain a water right license, the permit holder must submit the Proof of Beneficial Use form (proof) together with the examination fee OR submit the proof together with a completed field examination report prepared by a certified water right examiner on or before the date set in the permit for the proof. The information submitted by the permit holder will enable the department to determine the extent of beneficial use before the license is issued. The information entered on the proof form should show the extent of actual development of the project and should correspond to that authorized by the permit. If it does not, an amendment to the permit may be required.

Additional information is required for an irrigation well diverting more than 0.20 cfs (90 gallons per minute or 10 miner's inches). To complete Section 4.a., indicate the pump horsepower and the wellhead pressure in psi. The dynamic pumping level is the sum of the static or standing water level in the well and the drawdown when pumping. Do not confuse the dynamic pumping level with the pump setting depth. Provide the best estimate if unsure about the answers.

WHAT TO DO IN CASE YOU HAVE NOT FULLY APPLIED THE WATER TO BENEFICIAL USE:

If the development authorized by the permit has not been completed in the time allowed, the permit holder may submit a request for extension of time. In order for a request for extension of time to be considered without loss of priority, it must be filed prior to the date on which proof of beneficial use is due. Each request for extension of time will be considered on its own merits.

WHAT IF YOU FAIL TO MAKE PROOF OF BENEFICIAL USE ON TIME:

If you have applied the water to beneficial use, but did not submit the proof of beneficial use on or before the date set for the proof, the permit will lapse. A lapsed permit may be reinstated within sixty (60) days from the date that a lapse notice is sent. In order for the department to reinstate a permit, the permit holder must show reasonable cause why the permit should be reinstated. Submission of an acceptable proof of beneficial use form within the sixty (60) day period will be considered as reasonable cause for reinstatement.

EXAMINATION FEE:

Section 42-217 and Section 42-221, Idaho Code require an examination fee as part of the proof of beneficial use submittal if a completed field examination report prepared by a certified water right examiner is not submitted as part of the proof. The fee is based upon the rate of diversion or volume of water claimed on the proof of beneficial use form. The appropriate fee can be determined from the license examination fee schedule.

ISSUANCE OF LICENSE:

The department will issue a license of water right based on the determination of the amount of water beneficially used in compliance with existing law. The license will include specific information to describe the water right developed.

NOTE - You must address the measuring device/flow measurement port item for the proof to be acceptable if this condition was a requirement of your permit. (See the last page of the application for permit form).

RE: PERMIT NO. 67-07453

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1991.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

INSTRUCTIONS FOR REQUEST FOR EXTENSION OF TIME

TO SUBMIT PROOF OF BENEFICIAL USE

If you are planning to submit a Request for Extension of Time in which to submit proof of beneficial use of water under your permit, please read the following:

Under the provisions of Section 42-204, Idaho Code, only one extension of your proof due date can be granted and then only if you can demonstrate that you have been pursuing development of the permit with due diligence.

The Request for Extension of Time form requires that you indicate the extent of development that has occurred, the cost, and the reason(s) the work has not been completed. This information must be provided in enough detail to show due diligence. Examples of work performed are: well drilled, pump installed, 10 acres now irrigated, fish propagation ponds constructed, sprinkler system purchased, etc.

If no work has been accomplished, the statutes provide that the Request for Extension of Time must be denied. Lack of financial resources, the state of the economy or personal illness usually cannot be considered adequate reason to allow an extension of time.

EXCEPTIONS

The proof due date for a permit that has not been developed for one of the following reasons may receive one or more extensions of time even though no work has been accomplished:

1. If there is a lack of a required consent or final approval from a federal government agency (evidence of delay must be submitted with the request). i.e. right-of-way, or land classification such as Desert Land Entry or Carey Act.
2. If litigation related to title of the water has prevented development of the permit (evidence must be submitted with the request). *State*
3. If the water project is of a large size--storage of more than 200,000 acre-feet, or diversion of more than 25,000 acre-feet in one irrigation season for an irrigation project of at least 5,000 acres. *threatened with lawsuit by state Health Dept unless or until Chlorination*
4. If the permit is held by the United States of America. *MICROFILMED*

A non-refundable filing fee of \$15.00 must accompany the Request for Extension of Time form.

Note that in no case should a Proof of Beneficial Use form and a Request for Extension of Time form both be submitted at the same time. If your water development project is completed, then the proof of beneficial use form should be completed and returned. If the project is started but not completed, then the Request for Extension of Time form should be completed and returned in compliance with the guidelines above. If the project has not been initiated and does not fit into one of the exceptions listed above, then neither form should be returned and the permit will lapse and become of no further force nor effect. A new application will then need to be submitted to the department if water right development is still planned.

Dear Mr. Stovner,

RE: Permit No. 67-7453

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install and maintain a measuring device at your point of diversion. We have enclosed a description of the different types of measuring devices accepted by this office.

The exercise of this permit may also be affected by the Supreme Court's review of the case of Idaho Power Company vs. State of Idaho, et al., Ada County Civil No. 62237, currently being appealed to the Supreme Court of Idaho. Since the use of water under your permit may affect the flows in the Snake River between Milner Dam and Hells Canyon the final decision in this case may determine to what extent the exercise of your permit is subject to water rights of Idaho Power. While the Supreme Court is reviewing this case, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or subsequent license.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR. P.E.
