CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The domestic use under this right authorizes irrigation of up to 1/2 acre.
6. Domestic use is for 1 home.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 12TH day of JANUARY, 1994.

RE: Permit No. 67-07414

Dear Mr. Hooban:

This office is presently in the process of reviewing for licensing purposes the above-referenced permit. Based on the system configuration, we had some questions about the extent of beneficial use of the system for irrigation purposes. Therefore, on September 15, 1993 I conducted a follow-up field examination at the property described in the permit.

Your brother Randy had volunteered to accompany me on the examination, and when I arrived at the site at the appointed time he had already started the generator and was pumping water through the diversion system. Randy showed me the system and I took photographs of the beneficial uses of water at the property.

At the conclusion of the examination I advised Randy that I would be recommending that the permit be licensed for single household domestic use, which includes provisions for irrigation of up to one half acre. This recommendation fully covers the beneficial use noted at the examination. I also told him that you are entitled to file an application to appropriate additional ground water if you intend to more fully develop the irrigation system in the future. Presently there is no moratorium on such filings in the Weiser River Basin.

The purposes of this letter are to advise you as the permit holder of the findings at the examination, and to serve as a coverletter as I route this file back to our State Office. If you have any questions regarding the basis for the recommendations in this letter, please feel free to contact me.

Sincerely,

David R. Tuthill, Jr., P.E.

MEMORANDUM

Date: August 11, 1993
From: Jim Johnson
To: File
Subject: Field Exam Review

=====

After reviewing the recommendations on the Beneficial Use Report and the pictures taken at the time of the examination, I am of the opinion that water appropriated by the permit holder is much smaller than recommended by the examiner. A follow up conversation with the examiner confirmed my perception.

The examiner, Rick Collingswood, said he was very liberal with the acres he listed as irrigated. At the time of the examination, in late June, he could not clearly distinguish non irrigated native vegetation from irrigated vegetation, and there was absolutely no appearance of conversion from native fauna to agricultural related activity normally associated with water used for irrigation.

I see no reason to follow the liberal recommendation when the photos taken during the examination clearly depict a non agricultural environment.

E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS -- P/O -- Same parcel and use, different source.

P/U -- Same QQ same place of use (67-04078) And different areas of use.

Water is pumped from well by a 3 h.p. pump and discharged through a 1" PVC line, then reducing to a 3/4" PVC line to irrigated land and Trough. Small, approximately 1/8" diameter holes have been drilled into PVC to discharge a fine stream of water for irrigation. Water which fills the Trough is siphoned out to flood irrigated lower ground.

The domestic use is for drinking water at Trough and for toilet in small structure.

The measured flow for domestic use was 0.04 cfs. Therefore, recommend Licensing of 0.04 cfs for domestic use, not 0.12 cfs as requested on permit.

The portion of land irrigated is approximately 25 acres, not 30 as shown on permit. The maximum theoretical capacity of this system is 0.11 cfs, therefore, recommend Licensing for irrigation of 0.11 cfs, not 0.60 as requested on permit. Water Right No. 67-04078 also is used to irrigate this land, but has since been changed and is used to fill Trough and siphon over dam to flood irrigate.

$$Q(\text{THEORETICAL}) = \frac{(8.8)(0.6)(3)}{(2.31 \times 20) + 110} = 0.11 \text{ cfs}$$

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

Additional Computation Sheets Attached

Measured Method: 5 gallon bucket at Trough

$$Q = 15 \text{ gpm} \approx 0.04 \text{ cfs}$$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 25 \times 4.0 = 100 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.11 \times 124 \times 1.9835 = 40.2 \text{ AFA}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 40.2 \text{ AFA}$$

2. Volume Calculations for Other Uses:

$$V_{(\text{internal} \& \text{external})} = 1.2 \text{ AFA}$$

PROOF DUE NOTICE

RE: PERMIT NO. 67-07414

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

Homer Louis Hooban II

Dear Mr. Hooban:

Your approved copy of your Application for Permit is enclosed and we direct your attention to the conditions of approval on the fourth page.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

L. GLEN SAXTON
