Re: Water Right Permit No. 67-7189

Dear Mr. Williamson:

Dave Tuthill (Manager, Western Region) and I discussed your measuring device problems in detail, and we have come up with what we feel is a workable solution. As you have stated and I observed during my visit to your property, it is practically impossible to accurately measure the quantity of water you divert from the Joslin Ditch. Therefore, rather than requiring you to install measuring devices on each of your diversions from the ditch, we propose that measuring devices be placed in four locations:

- 1) the Mann Cr. diversion into the Joslin Ditch;
- 2) the Deer Cr. diversion into the Joslin Ditch;
- 3) at the point where the Joslin Ditch enters your property; and
- 4) at the point where the Joslin Ditch leaves your property.

Measuring devices in these locations will ensure that you are capable of diverting your permitted amount of water from Mann Cr. and Deer Cr., as well as from the Joslin Ditch onto your property. As we have discussed, weirs are probably the the most practical measuring devices to install.

During our meeting on March 9, you indicated that you have used flood waters from Mann Cr. and Deer Cr. to irrigate your property for quite a few years before you filed your permit (67-7189). Since you will have to file an adjudication claim within the next two years (assuming the Weiser River drainage is included within the Snake River Basin Adjudication, SRBA), you should consider establishing a priority date determined by when flood waters were first diverted and used beneficially. This priority date must be before May 20, 1971 and after 1921 (the date of the Weiser River decree). If you file a claim establishing an older priority date than your permit, you will have to relinquish your permit when your claim is finally decreed by the SRBA.

Regardless of your decision, it is doubtful that there will be sufficient flood waters to conduct a measurement for your permit this season due to the present drought. I suggest that you contact this office in the spring of 1989 concerning the field examination on your permit.

Please feel free to contact me if you have any questions.

Sincerely,

Brad E. Dingee
Sr. Water Resource Agent

FROM

Glen

TO

To: Permit No. 67-7189, W.M. Williamson
From: Brad Dingee
Date: March 28, 1988
Subject: Results of "Pre-Field Examination" Inspection

On March 9, 1988 I met with Mr. Williamson to examine his irrigation system and to determine how to measure his system. Mr. Williamson showed me his irrigation system, and we also visited his diversion points from Mann Creek and Deer Creek into the Joslin Ditch. I have attached a simplified sketch map of the system and a photocopy of the USGS topographic map for the area.

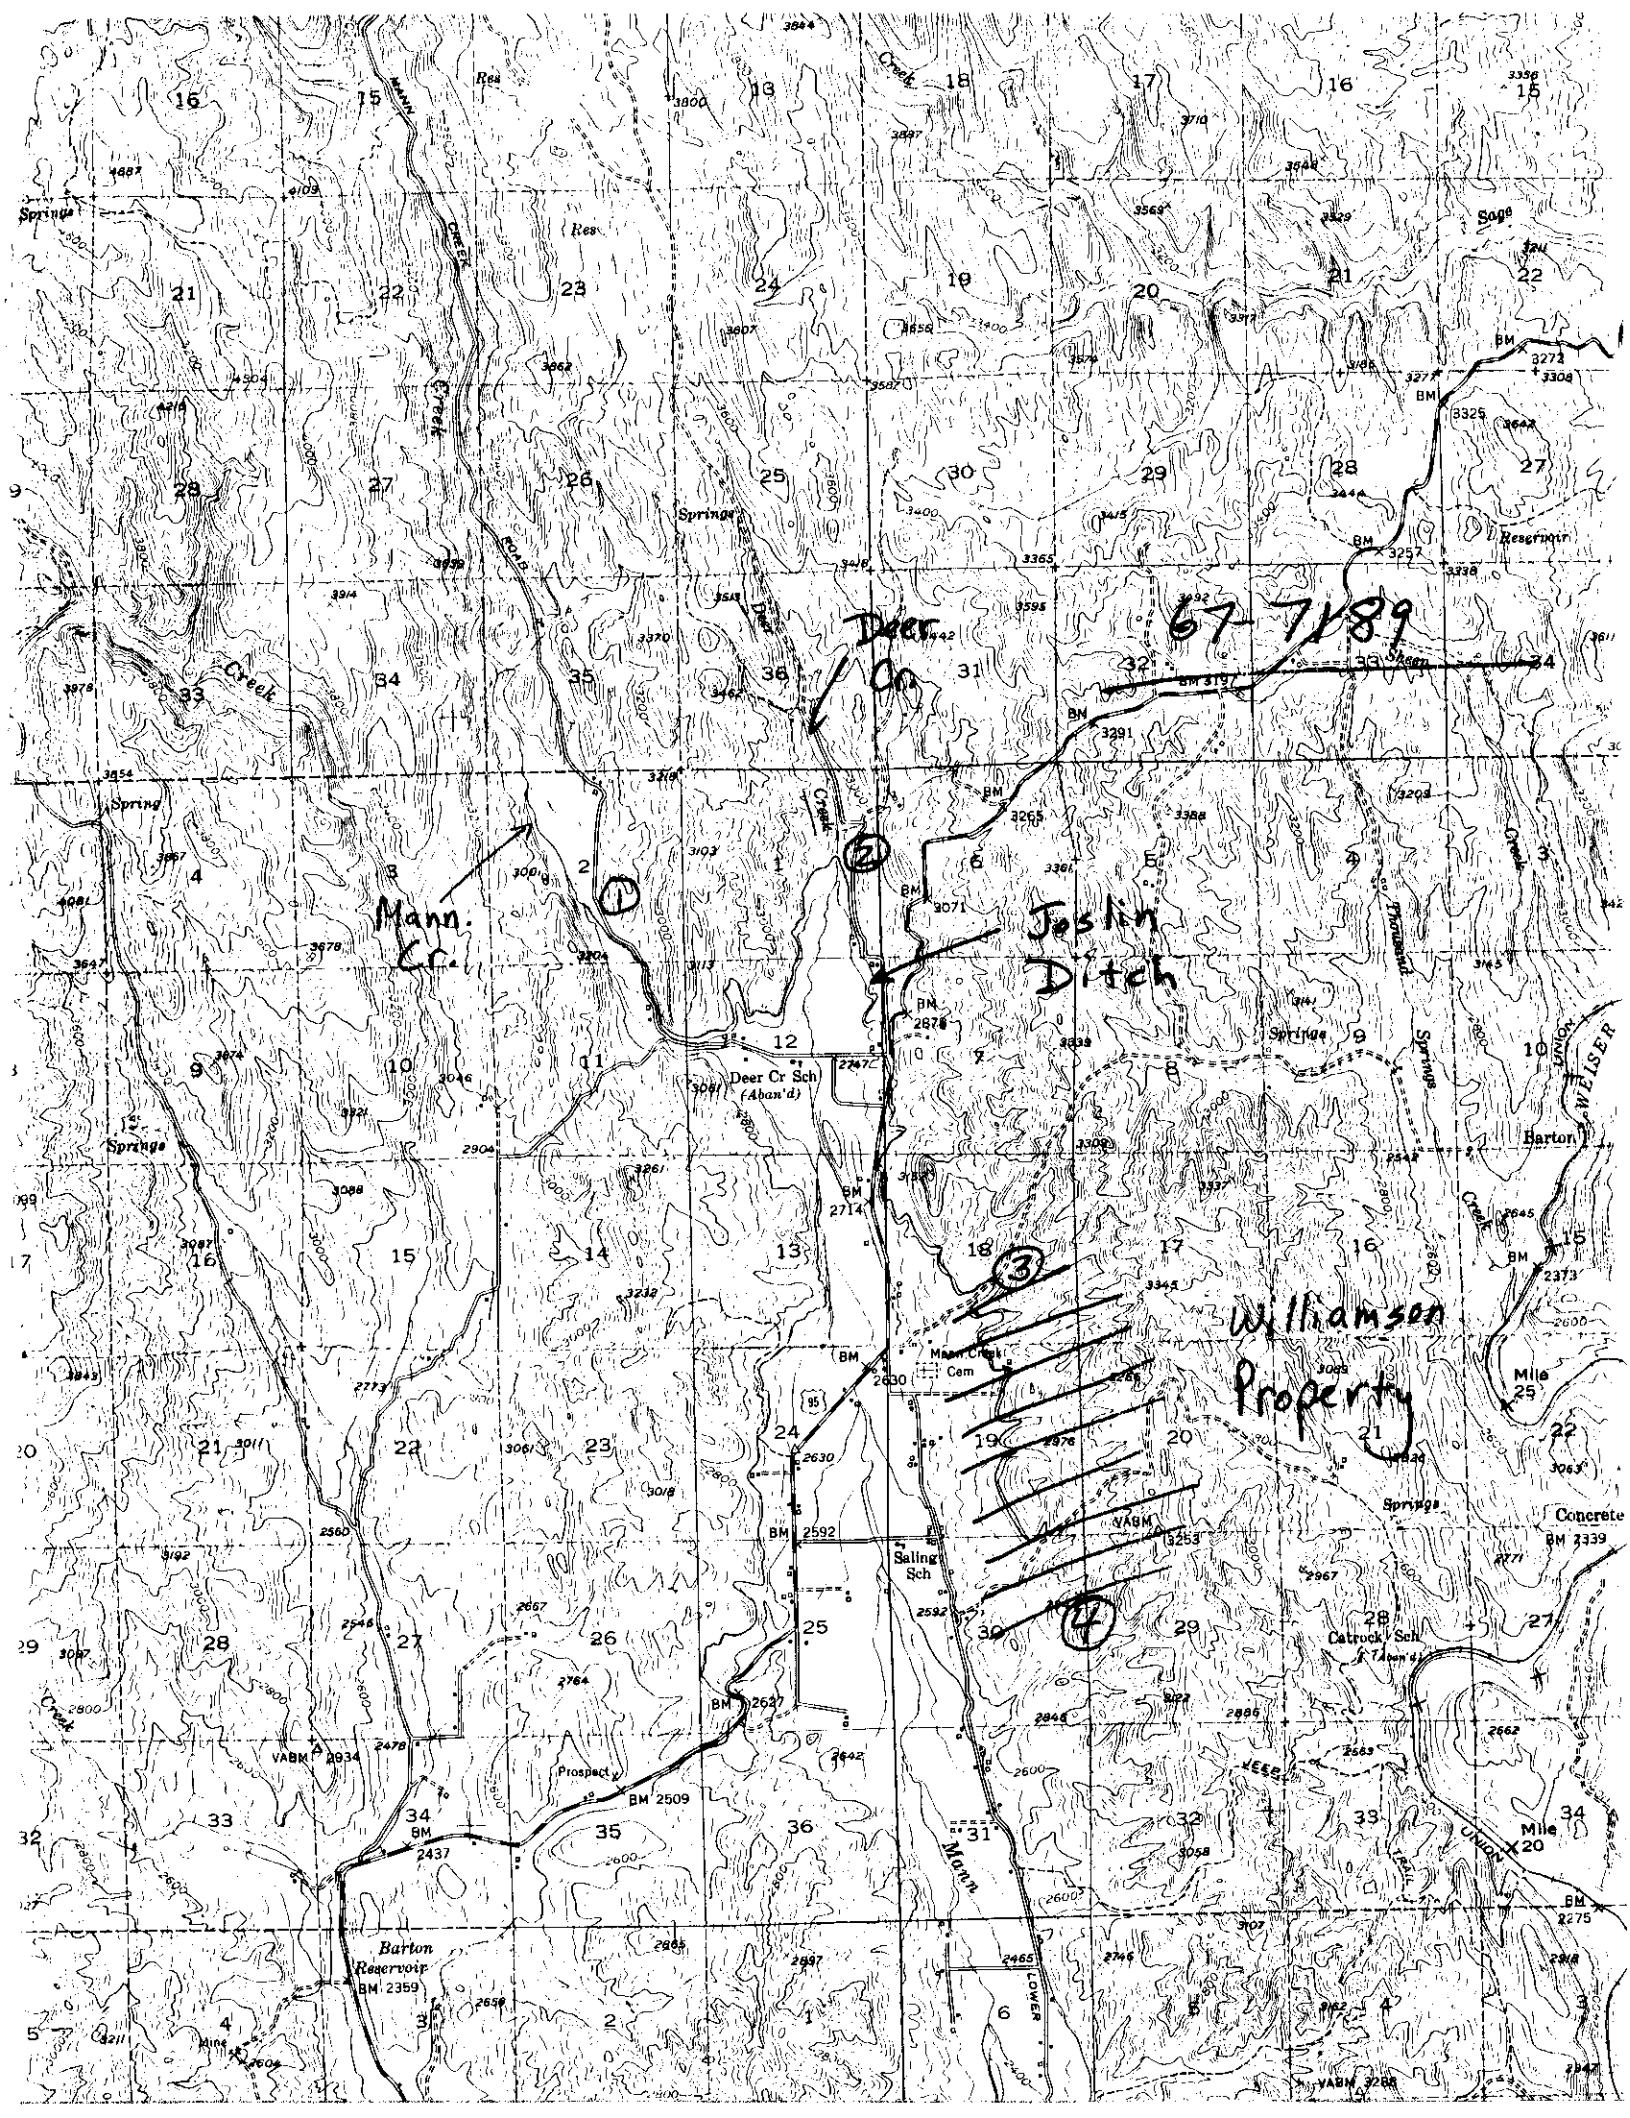

It should be noted that the diversion from Mann Creek is the outlet from Mann Creek Reservoir to the Joslin Ditch. The Joslin Ditch carries water from Mann Creek Reservoir to users located above and below Mr. Williamson's diversions. In addition, several water users with adjacent property share diversions from the ditch with Mr. Williamson.

Mr. Williamson has numerous diversions from the Joslin Ditch; these consist of pump/sprinkler system diversions as well as direct, gravity flow (flood irrigation) diversions. The variety and number of diversions make an accurate flow measurement impractical, if not impossible. A simple measurement of the diversions from Deer Creek and Mann Creek would perhaps satisfy the permit measurement requirements, yet such measurements would not prove that Mr. Williamson can divert his permitted amount of water from the Joslin Ditch to his fields.

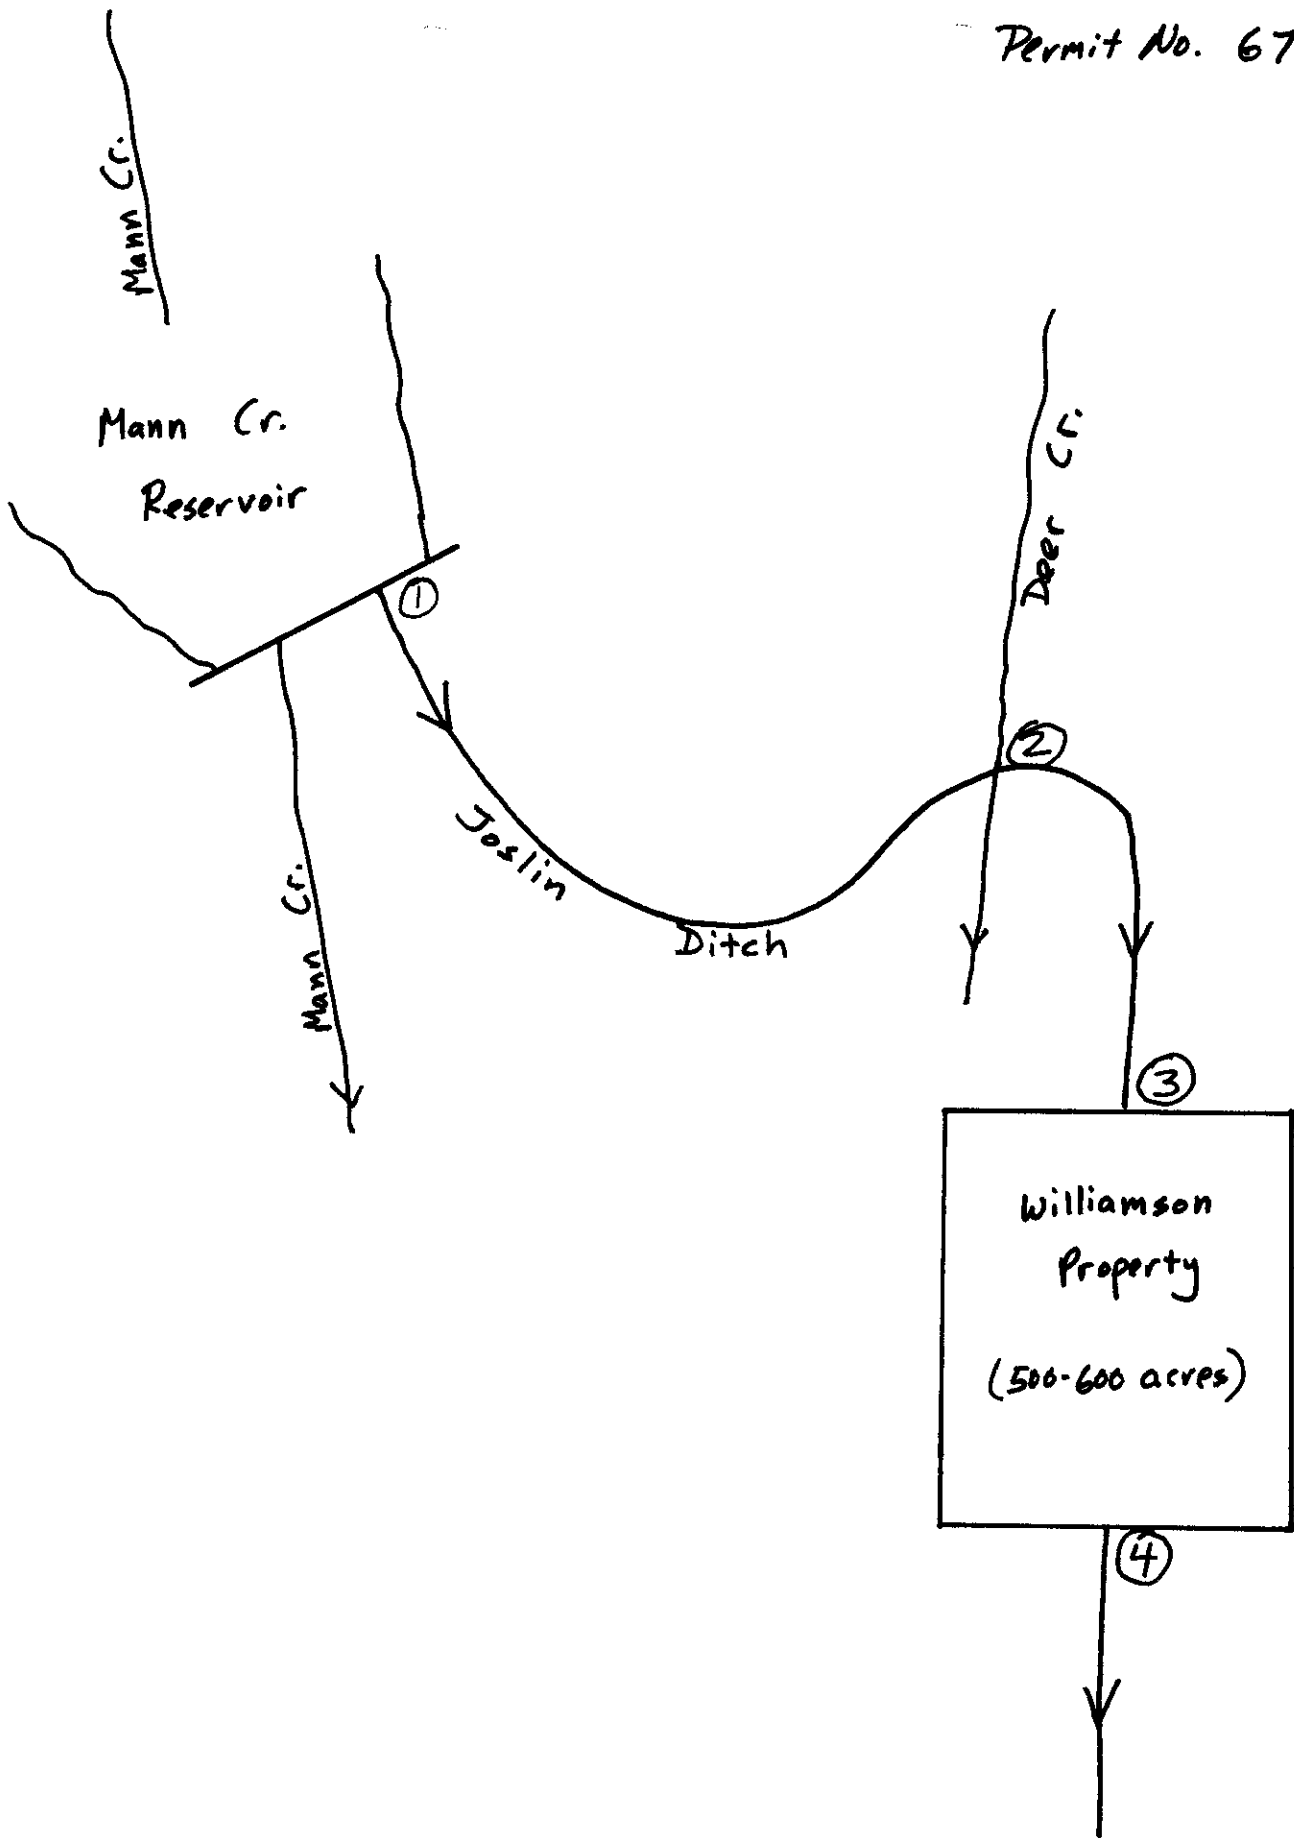

After discussing this with Dave Tuthill, we agreed that measurements should be made at the following locations:

- 1) at the outlet from Mann Creek Reservoir to the Joslin Ditch;
- 2) at the Deer Creek diversion into the Joslin Ditch;
- 3) at a point located just upstream from Mr. Williamson's diversions from the Joslin Ditch; and
- 4) at a point located just downstream from Mr. Williamson's diversions from the Joslin Ditch.

These locations are indicated on the attached sketch map. Measuring devices at these locations would ensure that adequate water can be diverted from the sources as well as from the Joslin Ditch. The examination for this permit should be conducted during the spring when flows are sufficient to meet Mr. Williamson's combined decreed (270" or 5.4 cfs) and permitted (5.0 cfs) rights. Mr. Williamson said that he can divert 10.4 cfs from the Joslin Ditch. Alternatively, measurements could be made at a time when flood waters are being sent down the Joslin Ditch without decreed storage water from the reservoir. Due to the current drought, it is doubtful that an examination can be conducted this year.

Permit No. 67-7189

INTER-DEPARTMENT MEMO — 1

DATE 2/5/1988

FROM Kay Walker

TO Western Region

SUBJECT Water Right No. 67-7189

Today Mr. Williamson came into the office because of some correspondence he received (we don't know who the correspondence was from) regarding installation of measurement ports on his water system under this permit. In talking with Mr. Williamson, it seems he has such a complex system that even if he did put access ports in it would still be impossible to get an accurate measurement of the system. He has four pumps, some sprinkler lines and some gravity flow ditches that all come from a ditch that he and his neighbors all use; also, the ditch that they all divert from is a comingliation of three different sources of water - Mann Creek storage water, Mann Creek flow, and Deer Creek flow.

In talking with Glen Saxton about requesting measuring device removal it was determined that a field agent should go out and look at Mr. Williamson's system and make a "pre-field examination" determination of the feasibility of the installation of measuring devices. Please contact Mr. Williamson at Weiser (549-1981) to look at this system. Good luck!!

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Meeting called 8/11/74

Meeting called to order by Gerald Hagan
The minutes were read and approved

Gerald Hagan presented a Demosning bill of \$374.
this was much larger than we had expected.

E. L. Farter made a motion we assess another 30¢
per acre to cover this bill.

Seconded by George Farter carried
several other things were discussed, but no action
taken at the meeting.

Later I talked to the other two directors about
how much I should pay for the ^{flood} water I was using
on the new ground. Gerald Hagan said that
since I was only getting part season water I should
only have to pay about $\frac{1}{2}$ as much as the other full
season water. I said this was probably right, but
since the ditch was already heavy new people com-
ing in should pay equal even for part season water.
In talking to Ray Rust, I told him I was willing
to pay equal. He said he really didn't want to be
the one to say, but this sounded reasonable enough
to him. Being a director myself and having agreed
with the other two, I paid \$1.40 per acre on 100
acres which equals the total of \$1.10 + 30¢ for the
year 1974.

Mardell Williamson secretary

Gerald L. Hagan

11-25-74

Above is a copy of the minutes of the Joselyn Ditch
Meeting showing M. Williamson has authority
to carry flood water in ^{system} ditch. Flood water is not
under Irr. Dist. control. R.W.H.

INTER-DEPARTMENT MEMO — 1

DATE July 25, 1974

FROM Robert Hamilton

TO Ken Foit

SUBJECT Irrigation of land outside the boundary of the Mann Creek Irrigation District

We have received a complaint from Raymond Hust, director of Joslyn Ditch Co., stating that Mardell Williamson was irrigating land outside the district boundaries. On July 24, Mr. Williamson was in the office and admitted that he was irrigating said land, but under an application he had made from Deer Creek. I advised him the application had not yet been approved and advised him no to irrigate said land. I visited Clarence Bluemer, director of the Mann Creek Irrigation District, and suggested that they might annex the land and let Mr. Williamson use waste water to irrigate this land as he is on the end of the Joslyn ditch. He is of the opinion that if they allow Mr. Williamson to bring in new land, then they would have to allow others to do the same thing and this would soon cause a hardship on existing lands within the District. He asked the procedure to follow in stopping Mr. Williamson from irrigating this land. I advised him that I would see if our department could take action against Mr. Williamson to prevent this irrigation of lands outside the district boundaries or if the district would have to resort to legal action against Mr. Williamson. Will you please advise me so I can contact Mr. Bluemer.

INTER-DEPARTMENT MEMO — 1

DATE July 25, 1974

FROM Robert Hamilton

TO 67-7189

SUBJECT Approval of application for permit

Mr. Williamson has applied for flood water from Mann Creek and the water from Deer Creek which has emptied into the Joslyn ditch for many years. The ditch company has had the use of this water and if we allow the Williamson application, we may create some problems. He plans to irrigate new lands within the Mann Creek irrigation district and this also can cause problems. Enlargement of the outlet pipe from the dam and a siphon will be necessary to carry the flood water applied for under this filing. Please review this application carefully before approving.

INTER-DEPARTMENT MEMO—1

FROM R. Hamilton

DATE 7-25-74

TO W.D. Fite #67 appl. no. 67-7189

SUBJECT Complaint against Mardell Williamson. appl. no. 67-7189.

I met with Mr. Williamson and reviewed his project which is in operation even though the permit has not been approved. He was advised that he was not to use water as applied for until the permit was approved. He is also in bond outside the Dr. Dist. and was also advised to stop doing this unless the **MICROFILMED** was annulled by the District!

Attention: R. Keith Higginson

Dear Sir:

The Board of Directors of Mann Creek Irrigation District have been advised that Mardell Williamson has filed for flood water with the intention of conveying it to his property through the Joslin Ditch.

The outlet from the dam and the siphon are filled to capacity now and cannot hold any more water at this time so the Directors do not think this is feasible.

If you have any questions, please contact us.

Very truly yours,

MANN CREEK IRRIGATION DISTRICT

Re: Application for Permit No. 67-7189

Dear Mr. Williamson:

The advertising of your application for permit was completed without protest, however, before we can issue the approval, we must have a copy of your agreement with the ditch company to carry the water.

If you plan to irrigate this season, we should have the agreement as soon as possible to allow time for the approved permit to be issued.

If we can be of any assistance, please do not hesitate to contact this office.

Very truly yours,

ERVIN E. BALLOU

Re: Application for Permit No. 67-7189 - W. M. &/or Deloris L. Williamson

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Sincerely,

Bill submitted 1-3-74 by df
