We have nothing in file to show that we made the error on the original application.

Attention: A. Kenneth Dunn

Dear Mr. Dunn;

Mr. and Mrs. Skow brought in to me your letter of May 18th advising that if reasonable grounds were not shown, Permit No. 67-7168 would be cancelled.

From the correspondence and information Mrs. Skow brought in it appears that there was a mistake in the description of the point of diversion in said permit No. 67-7168 and that Skows were asked to amend the permit to show the correct point of diversion. The Skows did not do this feeling the mistake had been made by the Department of Water Resources when the application was filled out since the department agents filled out the form for them.

In any event whatever the cause of the mistake on behalf of the Skows I would like to request instructions as to how the permit can be amended to show the correct point of diversion. The only change that is required is that in paragraph 3 of said permit a Section number should be changed from 9 to 18.

I am therefore enclosing the Skows check for \$10.00 for the necessary fee for amending said permit and further stating that if the Skows have to do anything further to implement the amendment to please advise so that such can be done.

The purpose of this letter is also to show cause why the permit should

not be cancelled as provided in Section 42-311 Idaho Code.

The permit of course was previously approved and the well has been used for a number of years.

Please advise.

Very truly yours,

Dear Mr. & Mrs. Skow:

On December 12, 1974, we requested that you amend the above referenced permit to change the point of diversion and place of use to that location actually found by our field examiner. You were advised that when such an amendment was approved your water license could be issued.

We have failed to receive said amendment and, as a result, are unable to issue your license. Therefore, you are hereby notified that under the provisions of Section 42-311, Idaho Code, as amended, Permit No. 67-7168 is hereby held for cancellation for failure to complete the permit as required, and you are required to show cause before the Director of the Department of Water Resources on or before June 22, 1975, why said permit should not be cancelled.

Permit 67-7168 claims the use of 0.15 cfs of water from a ground water source to be used for domestic, stockwatering and irrigation of two acres, and the permit was approved October 15, 1973.

Dear Mr. & Mrs. Skow:

We have received your recent answer to our request for amendment to the above referenced permit which has been prepared for licensing.

We have reviewed the original application you filed, and it appears that you visited our office, and we assisted you in preparing that application.

However, on the location of the place of use and point of diversion you must have either located it improperly on a map, or perhaps it has been changed from the place you originally intended the well to be. The point of diversion named on the application is approximately one mile east of the well you actually are now using.

Since we cannot differentiate between a typographical error, which this does not appear to be, or an actual change in the point of diversion and place of use, an amendment must be filed before a license can be issued.

The only alternative to filing an amendment is the cancellation of this permit, in which case any water you would be diverting would be diverted illegally.

We will withhold further action on the cancellation of this permit for 20 days to allow you time to submit the amendment and the \$10.00 filing fee.

Sincerely,

BOBBY D. FLEENOR

Dear Mr. & Mrs. Skow:

A representative of this Department has made an examination of the works covered by your Permit, No. 67-7168 and has found the following:

Quantity of water diverted: 0.15 cfs

Amount of water that can be recognized as beneficially used under Idaho law: 0.15 cfs

The maximum quantity diverted shall not exceed 11.6 acre feet per year.

Beneficial use: For irrigation of 2 acres and for domestic and stockwater purposes within the NE¹/₄NE¹/₄, Sec. 18, Twp. 10N, Rge. 3W

Point of diversion: NE¹/₄NE¹/₄, Sec. 18, Twp. 10N, Rge. 3W, B.M.

Priority date established: September 10, 1974

The point of diversion and the place of use differs from that found by our examiner, therefore, it will be necessary for you to amend the permit before a water license can be issued. We are enclosing a partially completed application for amendment for your use. Please sign the application and return it to this office with a \$10.00 filing fee within 20 days of the date of this letter in order that we may issue a water license as set forth above.

If you do not concur with these findings, please contact this office within the 20 day period.

Dear Mr. & Mrs. Skow:

One of the conditions of approval of your water Permit No. 67-7168 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
