Dear Ms. Driessen:

NOTICE OF PENDING ORDER VOIDING APPLICATION FOR TRANSFER

On May 11, 1992, you filed with the Department of Water Resources an application for transfer of water rights, nos. 67-00714, 67-00715 and 67-00716 to provide water for irrigation located within Secs. 15 & 22, T12N, R05W.

On September 8, 1993, and on December 29, 1993, the Department corresponded with you asking for additional information. Since that time we have had no communication from you.

The purpose of this letter is to request that you withdraw your application for transfer or explain why the Department should not void your application. Enclosed is a withdrawal form that should be signed and returned to this office unless you have an explanation that would prevent the Department from voiding your application for transfer.

If you fail to respond to this inquiry within thirty (30) days from the date of this letter, the Department will act to void your application. The application will be voided on the grounds that you did not provide the information needed to continue the processing of this application.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Manager, Western Regional Office

Re: Transfer of Right Nos. 67-00714, 67-00715 and 67-00716

Dear Sharon:

The transfer application that you filed in 1992 has not been approvable yet. The purpose of this letter is to identify the concerns that have prevented final action by the department regarding your application.

The application proposed to restore and use two existing ditches from Monroe Creek, and the ditches were noted as the original diversions for the "Parker Ranch". Also, the application includes retaining the three points of diversion not found on Monroe Creek but associated with the rights. These other points are the existing diversion points for the rights and include two springs and an unnamed stream, all of which are tributary to Monroe Creek.

The question before us is this : is it your intent to abandon the existing diversions that are not on Monroe Creek and replace them with the two old Monroe Creek ditches, or do you want to retain the use of the non-Monroe creek diversions and add two ditches from Monroe Creek? In either case, the proposal cannot result in an increased amount of water used under the three rights.

To address this concern, would you be prepared to install acceptable measuring devices at the three diversions that are not on Monroe Creek? This would allow monitoring of water flows available at these sights, and the data could be used to balance the diversion of water taken directly from Monroe Creek. Also, use of the two "Parker ditches" would require installation of measuring devices. All measurements related to this situation would be subject to control of the Watermaster, Mr. Gerald Myers.

A copy of the transfer application map is enclosed for your convenience. Please let me know how you want to proceed in this matter. Let me know if you have any questions or need more information.

Sincerely,

A handwritten signature in cursive script that reads "Steve Lester".

RE: TRANSFER #3956
RIGHTS #67-00714/00715/00716
DATE: 27-MAY-1993

=====

This is the transfer that Jim spoke to you about on Wednesday. We had some concerns and questions that weren't clearly addressed in the transfer file. I hope that you can clarify matters so that we can process the transfer.

Since the place of use remains the same on all rights, there was some question how water diverted at the uppermost part of the system is distributed to all lands.

The other questions are about the sources, specifics about how the diversions will occur with the additional points of diversion. Part 1, B6a, on the transfer form describes the springs as being diverted at the source and the unnamed stream allowed to run into Monroe Creek and diverted from Monroe Creek.

If the spring rights are diverted upstream out of Monroe Creek, will the spring water be injected or naturally flow into Monroe Creek to compensate. Will the diversion at Monroe Creek be controlled according to the flows from the springs? Or does this transfer actually add Monroe Creek as a source to these rights?

Thanks for your help.

Dave, the staff analysis sheet for this transfer appears that regional processing was not completed before it was sent to the State Office. Specifically, the Recommended Action section has not been filled out and although this is in a water district, no mention is made whether or not a comment letter was sent to the watermaster.

I apologize for not sending this back in your original folder; I had already consolidated the information with our original file.

Sharla *SC*

The reason that I did not finalize approval on this transfer app is that at the time of my initial review we had not rec'd the wm comments. Were they in the file that you rec'd? (If not, plz return info to allow us to pursue.)

Thanks, Dave

Nothing was in the file concerning watermaster comments. That's the main reason I sent it back. Everything that you originally sent over is stapled together except for proof reports, I just pulled all of it back out of our original file. Sorry for the confusion.
