RE: Water Right No. 67-07112

Dear Jim:

Enclosed is the Application for Amendment signed by my client, Dora Courtwright, who is the surviving spouse of Leo Courtwright and the owner of all of the real property appurtenant to this water right.

It's my understanding that upon receiving this along with the \$50 application fee, which I have enclosed, the license for this water right is ready to be issued. We would request that it be issued in the name of the applicant and then we will file that with the escrow holder as the Courtwrights have sold their property to Jim and Carol Wolfe, who now reside on the premises. While this license will be placed with the escrow holder because Wolfes are buying this property on contract, it will be retained as security. Once the Wolfes pay the contract off, the water right along with the deed and all other evidence of ownership will transfer to them.

My concern, however, is the fact that during the interim period we're dealing with this Snake River adjudication matter and there should be some way to provide that both the Courtwrights and the Wolfes get notice of pending matters of concern that would affect their water rights. With that notice, Courtwrights can take action if the Wolfes don't so

they can protect their security and the Wolfes can have notice so that they take action to protect the property they're buying. You might give this some thought and see if there's a way this can be done to protect both parties.

Sincerely,

RE: WATER RIGHT NO. 67-07112

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, the permit must be amended to correspond with the findings of the Department's field examiner. We originally sent the enclosed Amendment to the owner of record, Leo Courtright, but received no response. A telephone call to the Washington County Assessor's Office revealed that you are listed as the property owner of the land covered by this water right.

In Idaho a water right in the permit stage is considered personal property and must be assigned to the new owner. Therefore, the license will be issued in the name of the original owner of record unless the enclosed Assignment of Permit form is completed by Mr. Courtright, assigning the permit to you, and returned to us along with the \$25.00 filing fee before this water right is licensed. Once the water right is licensed, it is considered real property and is appurtenant to the land. Proof of ownership of the land is proof of ownership of the water right, unless it was excluded in the terms of the sale of the land.

The Application for Amendment contains information that will be included on the license when it is issued. We have amended the permit to reflect a change in the location of the point(s) of diversion and the place(s) of use description.

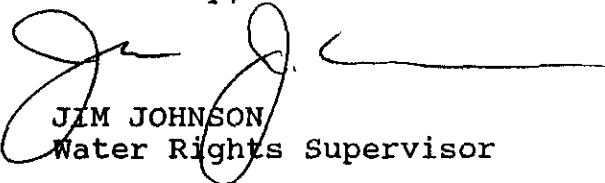

The last page of the Application for Amendment form contains a list of CONDITIONS/REMARKS proposed for the license when it is issued. These conditions/remarks may be modified upon further administrative review.

RECEIVED
OCT 31 1994

Please review carefully and if you concur, sign the amendment and return with the \$50.00 filing fee within 14 days.

If you do not concur with this information, or if you have any questions, please contact me as soon as possible. My telephone number is (208) 327-7947.

Sincerely,

JIM JOHNSON

MEMORANDUM

TO: FILE 67-07112

FROM: STEVE LESTER

DATE: JAN. 16, 1990

SUBJECT: LICENSING

The source was listed on the permit as natural drain water and as runoff in the exam report. The exam narrative describes two unnamed draws or unnamed streams that feed the on-stream Courtright Reservoir. This is consistent with the USGS topo.

The permit was approved for 1.00 cfs and up to 100 af of storage for irrigation from 4/1-10/31. The period of storage was shown as 10/1-4/1. Stockwater for 125 head was intended.

Stockwater use of 0.05 cfs based on 125 head is implied in the permit and recommended all year. If storage occurs 10/1-4/1 and irrigation occurs 4/1-10/31, water is available for stock use all year as direct flow (pipe from reservoir to pump) and/or stored water. Perhaps including stockwater @ 0.05 cfs and 1.7 afa covers the necessary water right need without listing stockwater storage and possibly stockwater from storage. If stockwater storage is included as a use, storage is limited to the permit period found in permit item 6b.

The permit lists irrigation but quantifies irrigation and irrigation storage. The license recommendation includes an irrigation cfs with its afa (limited by volume diverted for beneficial use), irrigation storage from 10/1-4/1 as dictated by the permit, and irrigation from storage. The latter use should have been included in the permit approval process. These uses are consistent with the permit and do not represent an expansion. Storage is limited to 90 af as shown in the dam safety file.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

OCT 31 1994

page 2
Examination Fee Notice

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is available from the department upon request. A listing of certified water right examiners is also available.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

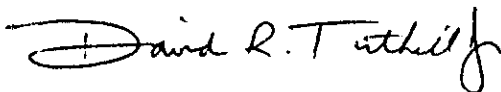

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The license examination fee schedule, on the back of the enclosed information sheet, shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be returned to this office. If you have questions or concerns please feel free to call at (208) 334-2190, or to visit the office at our new location near the airport, at 2735 Airport Way.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Dear Mr. Courtright:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Boise.

Sincerely,

Dear Mr. Courtright:

One of the conditions of approval of your water Permit No. 67-7112 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr Courtright:

Enclosed is a copy of your approved Application for Permit No 67-7112.
We direct your attention to the conditions of approval as listed on the
fourth page.

Be sure to note that a special condition requiring you to install and
maintain a measuring device at your point of diversion has been placed
upon your permit. We are enclosing a letter describing different types
of measuring devices accepted by this office.

Very truly yours

Dear Sir:

In regard to your letter of
Dec. 13. The one cubic foot
per second would be enough to
fill during the run of from
January till the first of May
some days it would run more
and some less. ~~after~~ The dam
bells before May it will run
the surplus past in the old

RE: APPLICATION FOR PERMIT NO. 67-7112

Mr. Leo Courtright
Cambridge, Idaho 83610

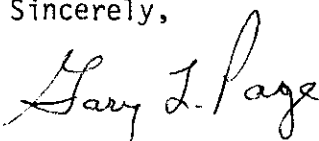

Dear Mr. Courtright:

In reviewing your Application, we find that a diversion rate is needed to show at what rate you will divert to storage the 100 AF you have filed for.

The rate that would be adequate to fill your reservoir would be one cubic foot per second. This quantity would also be covered under the fee which you have already paid.

If you have any questions, please feel free to contact our office.

Sincerely,

RE: APPLICATION FOR PERMIT NO. 67-7112 Leo Courtright

Upper Country News Reporter
Box 98
Cambridge, Idaho 83610

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."
