Dear Mr. Waite:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this examination will be made, but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Boise.

Dear Mr. Waite:

One of the conditions of approval of your water Permit No. 67-7088 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Waite:

We are returning your application for permit, with your check #92-103, for \$10.00. We have also taken the liberty of re-typing your application for permit and incorporating those changes we felt to be necessary.

Item #4 of your original application requests 0.04 cubic feet per second of water for domestic use of one family. This appears to be a somewhat excessive amount of water. However, you have also listed a number of livestock to be watered from this well. We have indicated both domestic and stock water uses under items #4 and #5a, with a total amount of 0.07 cubic feet per second of water, which would equal 63 gallons per minute.

Please examine the new form, make any changes you feel are necessary, sign the form and return it to this Department as soon as possible.

If we can be of any further assistance to you in this matter, please do not hesitate to contact this Department.

Very truly yours,

James Booker
Appropriation Examiner
