established a right to use water as follows:

| Beneficial Use         | Period of Use                               | Rate of Diversion      | Annual Volume        |

Dear Mr. Morgan:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this examination will be made, but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Boise.

Dear Mr. Morgan:

One of the conditions of approval of your water Permit No. 67-7065 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Morgan:

We are returning your application for permit and personal check #92-67 in the amount of \$10.00. In reviewing this application, we find that there are several questions that need clarification before we could process it.

Under item #4, you have listed 15 acre feet for irrigation. We will also need a rate of diversion in cubic feet per second. Under normal conditions, this rate should not exceed one miner inch, or 0.02 cubic feet per second per irrigated acre.

As soon as you have made this necessary clarification and re-submitted the application, we shall begin its processing.

If you should have any further questions, please do not hesitate to contact this office.

Very truly yours,
