RE: Permit No. 67-7057

Dear Mr. Higginson,

On our original application for proof of water to beneficial use of June 4, 1971, we applied for 0.4 cfs water for irrigation purposes and 0.02 cfs for domestic use.

Our well was drilled in June, 1971 and we put a 2 hp pump into the well at 87' for domestic use which has proved satisfactory.

June of 1975, we installed a 5 hp pump at 75' in an attempt to run 15 to 20 sprinkler heads. We could not build enough pressure to operate that many heads, so gradually decreased the heads until ending up by running 5 sprinkler heads for 35 minutes before we pumped the water below the irrigation pump. We came to the conclusion that the output of water did not warrant the expense. Not only did we have insufficient water for irrigating purposes, our domestic water was disturbed, riled and milky.

We have therefore abandoned our plans of irrigating from our well and ask that we please be relieved of installing a permanent measuring device as called for in Item 7 of our final application.

Thank you for your consideration. We will be awaiting your decision on our final application.

Sincerely,

Bob D. Hemenway
