Dear Mr. Kiser:

Thank you for your letter of July 22, 1968 concerning the above referenced permit and water license.

A search of our records indicate that William M. Carson filed an application to appropriate the public waters of the State of Idaho. The appropriation request was approved and Permit No. 67-7009 was issued. A copy of that Permit is enclosed.

After consulting with our ground water investigation branch, it is apparent that the department at the present time does not have information available concerning the underground resources in the area of immediate problem, nor do we have information concerning well interference in this area. If the problem can be identified to a particular source of relief the problem may be sought either by going to court or contacting the department concerning the creation of a local ground water board.

If we may be of further assistance please contact us.

Very truly yours,

Mr. Donald W. McEldowney

Dear Mr. McEldowney:

I write as attorney for Mrs. George Towell who owns the West 39 acres of the NE $\frac{1}{4}$  of the NW $\frac{1}{4}$  of Section 24 of T. 11 N, R 6 West of the Boise Meridian. Several years ago George Towell drilled an irrigation well approximately in the center of the 39-acre tract, and Mrs. Towell tells me that a water license was issued by your department. Earlier this year a Mr. William Carson, Sr. apparently drilled several irrigation wells in the immediate vicinity of the Towell property. One of such wells is located approximately  $\frac{1}{2}$  to  $\frac{3}{4}$  of a mile from the Towell well. Since the drilling and use of such well by Mr. Carson, the flow of the Towell well has substantially diminished. Mrs. Towell is under the impression that Mr. Carson did not make application to your department for a permit to drill.

Mrs. Towell will appreciate any information which you may be able to give with respect to underground water supplies in the area of her property, and any information which you may be able to furnish with respect to possible interference by some wells upon others.

It is my understanding that this particular area has been a problem for a number of years, and the irrigation water is located at a relatively shallow depth above a layer of bedrock and that no one has been successful in getting water by trying to penetrate the bedrock. I mention this fact for the reason that it appears that any effort to sink existing wells to a lower depth will be unproductive.

After you have had an opportunity to review this matter, I shall appreciate any suggestions which you may have to remedy the problem.

Yours very truly,

*A. C. Kiser*
