Re: Permit No. G-32098

Frank Chandler
Route # 2
Weiser, Idaho

Dear Mr. Chandler:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Very truly yours,

Donald W. McEldowney

Dear Mr. Chandler:

We have received a log on a well drilled for you in the NW 1/4 SW 1/4, Sec. 37, T. 12 N., R. 5 W., B.M. The test shows that the well is capable of supplying 400 gallons per minute. We find no record of a permit for this well.

Idaho Code 42-229a, as amended by the 1963 session of the legislature, provides that a permit to divert subterranean water must be obtained from this office in all cases where over 13,000 gallons per day or 9 gallons per minute will be diverted.

Idaho Code, 42-237a, provides that the State Reclamation Engineer may commence action to enjoin the illegal openings or excavations of wells, or withdrawal or use of water therefrom.

May we hear from you?

Very truly yours,

RALPH W. THOMAS
