Dear Mr. Cada:

Please be advised that on May 16, 1968, the Department of Reclamation conducted a field examination of the lands and systems covered under Permit 32960. Results of the examination indicate that prior to issuance of a license the department will require that the point of diversion and place of use of this permit be amended and public notice be published notice in connection with the amendment.

Results of the examination indicate that the point of diversion should be listed as "various points in SE~~W~~NE~~4~~ and various points in SW~~W~~NE~~4~~, Sec. 18, T. 11 N, R. 1 W, B.M." The place of use as found during the examination should be amended to read as follows: 5 acres in SE~~W~~NE~~4~~; 9 acres in SW~~W~~NE~~4~~, Sec. 18, T. 11 N, R. 1 W, B.M.

We have partially prepared an application for amendment form for your use in this matter. Please review its intent and if you concur with the amendment application, please sign it and return it with a \$5.00 required filing fee.

Also enclosed is the department's Form 11, authorization for the department to publish the notice two consecutive weekly issues at your expense. Please sign the authorization, returning it with the application and \$5.00 fee. Your prompt attention to this matter is appreciated.

Dear Mr. Lloyd:

We acknowledge receipt of the depositions and affidavit of publication in the
Weiser Signal submitted as proof of com-
pletion of works and beneficial use on Permit 32960.

Before a certificate and license of water right can be issued, a field examination must be made by a representative from this department. We cannot tell just when this examination will be made, but our field examiner will try to contact you at the time he makes the examination so that you may show him the system.

Dear Mr. Lee:

Thank you for your letter of July 10, 1967 on the above referenced permit.

Our records indicate that on May 1, 1967, the department forwarded notice that proof was due on the above referenced permit to Tony H. Cada; however, to the best of our knowledge, our department has never received a reply to that letter. Therefore, we are forwarding a new set of notice of publication forms 36 and 11 for your use in this matter.

Please be advised that unless Mr. Cada completes these forms and returns them to this office promptly and starts the advertising required under this permit, permit 32960 will be held for cancellation.

Please contact us if we may be of further assistance.

Very truly yours,

Donald W. McEldowney

Re: Permit No. 32960 - Tony H. Cada

Gentlemen:

Mr. Tony H. Cada made application for permit in June, 1966 under application No. 41143 and he was assigned permit No. 32960. The work to be done was to be completed by July 5, 1967 and the hearing was to be on that date.

The forms for advertising and notice of completion of works was sent to Mr. Cada in May, 1967 and was to be returned to your office 40 days prior to July 5, 1967. At the time he received this letter, his wife was in the hospital and he was away from home for some time and this letter with instructions was laid aside by one of the children and he did not run onto it until today.

Is it possible for you to set another date for this hearing so the proof can be completed. The work has all been done and he is ready to complete it on the records. Under the circumstances I'm sure you will understand the delay.

He has asked that we follow through for him, so would you please let us know what procedure to follow to complete this case? Please send all correspondence to Lloyds Agency, Box 444, Weiser, Idaho. Thank you for your consideration.

Yours very truly,

Re: Permit No. 32960

Date:
May 1, 1967

Mr. Tony H. Cada
Midvale, Idaho 83645

Dear Mr. Cada:

Under the terms of your Permit No. 32960 you are required to make proofs of completion of works and application of water to beneficial use on or before **July 5, 1967**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

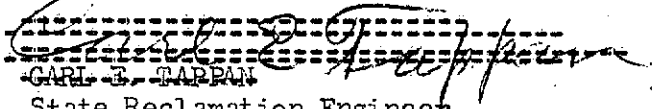

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.
