ORDER MODIFYING REQUIREMENTS
FOR COMPLETION OF PERMIT TO
APPROPRIATE WATER

WHEREAS, the 39th Idaho Legislature made certain amendments to the Idaho Water Law; and,

WHEREAS, these changes raised questions as to the procedures to be followed by holders of permits issued prior to the effective date of the amendments, May 31, 1967; and,

WHEREAS, on August 1, 1968, the Department of Reclamation adopted Rules of Practice and Procedures for the processing of such permits issued prior to May 31, 1967; and,

WHEREAS, Permit No. G-31633 was issued previous to that date;

NOW THEREFORE, the requirements for completion of the above-numbered permit are hereby modified to conform to the adopted Rules of Practice and Procedures as follows:

1. The above-numbered permit will be completed under the terms of Title 42, Chapter 2, Idaho Code, as amended by the 39th Idaho Legislature.
2. The conditions of the above-numbered permit are modified as follows:
 - a. Notice of the issuance of the permit will be published at the permit holders expense for two weekly issues in the official newspaper of the county in which the point of diversion lies.
 - b. The permittee will not be required to submit proof of completion of works as originally specified, but will be required to submit proof to the Department of Reclamation of the application of the ~~water~~ to beneficial use on or before January 10, 1969. The permit holder should be aware that failure to complete one-fifth (1/5) of the works within one-half (1/2) of the time originally set for Completion of Works may be grounds for cancellation at the instance of the Department.

RE: City of Weiser Well #3 Repair

67-2320

Dear Mr. Holladay:

The Department has reviewed your submittal of well clean-out and repair proposal and a drilling permit is not required for the proposed work. I understand you plan to bail-out the existing well and install a gravel pack and liner inside the existing casing. Please submit a completion report for the work when finished. Also, if at some future date the nearly 6-inch well is not used for monitoring, it should be properly abandoned.

Thank you for your continued cooperation.

Sincerely,

I indicated to Mr. Holiday that we would call him and follow up with a letter.

I do not feel a drilling permit should be required. They are going to clean out to existing depth which is 804' ± and set 8" casing to 140' 6" to 200' ± and gravel pack. All of this will be within 16" casing.

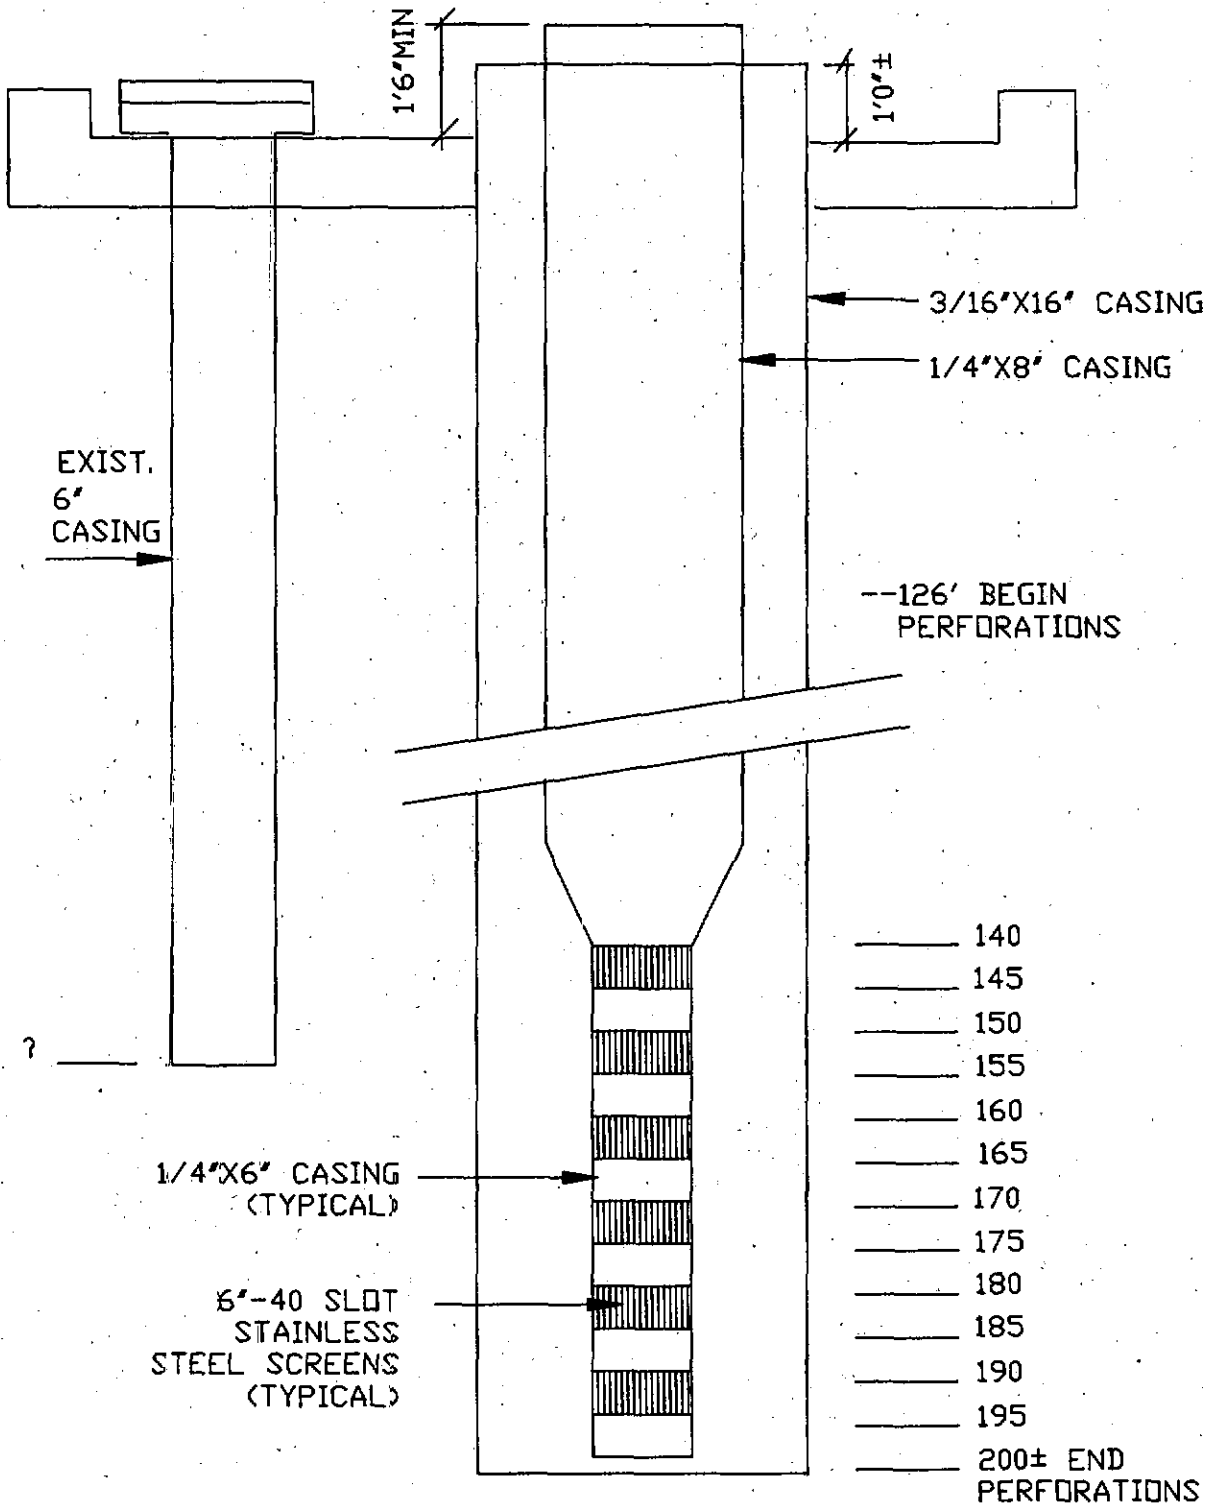

The only question I have is what is the existing 6" well of unknown depth beside the well used for.

Gentlemen:

In reviewing the Report of the Field Examiner, I find that some additional information is required before a Water License may be issued.

I need to determine the volume of water used annually by your city, both from the well specified on the above referenced permit and all other wells used by the city. Please inform me as to the number of water users and the total number of people served. Also, would you please provide a listing of water used by any large water users, stating the annual use and the months used (a monthly breakdown if there is much variation). We must, also, have the amount used for irrigation of parks and public lands.

If recorded data is not available, estimates of the volume of water used each month will suffice. If estimates are submitted, please state your method of arriving at these estimates. Also, provide any facts and figures that would help to substantiate these estimates.

If you will provide this information, we shall continue to process your permit. If we can be of any assistance, please advise.

Re: Permit No. G-31633

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with those rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Gentlemen:

One of the conditions of the approval of your permit G-31633 was that proof of application of the water to beneficial use be submitted to this office on or before January 10, 19 69.

Enclosed is an affidavit form which must be used to submit this proof. You may also request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, ICA.

Either the proof or a request for extension must be received by this department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
