MEMORANDUM

TO: FILES 67-00219C/220/226 & 229

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 4236

DATE: June 8, 1994

=====

Transfer No. 4236 was filed to update five (5) decreed water rights to reflect the way the water is currently used. The rights have been consolidated and are used to irrigate parcels of land along Pine Creek from multiple diversion points.

A field exam was conducted to confirm existing uses under these vaguely described decreed rights. 64 Acres were confirmed as irrigated and eight (8) points of diversion identified. The application was amended to reflect the field exam results and to include the fifth right found to be part of this system.

The region recommendations included a conveyance loss using the original full ditch system, but the addition of multiple points of diversion from Pine Creek adjacent to irrigated parcels negates the need to calculate ditch losses.

The decree does not identify the specific number of acres under each right, but using 5/8" rate per acre as defined in the decree, 1.68 cfs could represent 134 original acres or more. Since the field exam identified a reduced number of irrigated acres the rate of diversion also needed to be adjusted. The rate of flow for the remaining acres is the standard 0.02 cfs per acre or 64 acres times 0.02 cfs equals 1.28 cfs.

All but the most junior right can be recommended with full rate of diversion and a specific number of acres identified. The junior right will be adjusted to reflect the changes in acres and rate.

67-00219C	0.28 cfs	14 acres	56.0 afa
(67-0219 Parts A & B combined into Part C)			
67-00220	0.24 cfs	12 acres	48.0 afa
67-00226	<u>0.34 cfs</u>	<u>17 acres</u>	<u>68.0 afa</u>
Subtotals	0.86 cfs	43 acres	172.0 afa

Total Rate - Senior Rights = Remaining Rate
 1.28 cfs - 0.86 cfs = 0.42 cfs

0.82 cfs under 67-00229 adjusted to 0.42 cfs

67-00229	<u>0.42 cfs</u>	<u>21 acres</u>	<u>84.0 afa</u>
TOTALS	1.28 cfs	64 acres	256.0 afa

Transfer Memo #4236

Recommended conditions include a condition from a previous transfer regarding limiting irrigated acres to south of the access road in Section 35, permissible place of use remarks for each right, watermaster control, multiple points of diversion/measuring devices, irrigation overlap and standard transfer conditions.
