Dear Mr. Jackson:

We acknowledge receipt of the depositions of yourself and two witnesses, also affidavit of publication in the Weiser American, all in proof of beneficial use under Permit No. 21277.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Boise, Idaho **Sept. 6, 1950**

Dear Sir:-

Under the terms of your permit No. ~~21277~~-----you are required to complete your diversion works on or before November 7, 1950. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Jackson:

We acknowledge receipt of your Application for Permit to appropriate 56 inches of water from a well in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 23, Township 10 North, Range 5 West, accompanied by your check for \$5.00.

Question 14 of the application describes 40 acres in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, 40 acres in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ and 19 acres in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 23, which would make a total of 99 acres, but the total acreage was carried out below as 59 acres.

We assume from the sketch map that all 99 acres are to be irrigated, instead of 59 acres.

The correct filing fee for 56 inches of water is \$5.25 and we return your check for \$5.00 with the request that you substitute one for \$5.25.

We also remind you that under the Statutes, you would be entitled to an inch to the acre for the acreage irrigated if your well can develop that amount, so if you wish to apply for more than the 56 inches, you may. Any amount between 50 and 100 inches requires a filing fee of \$5.25.
