MR. NOAH NEWSOME
Route # 3,
Weiser, Idaho

Dear Sir:

This will acknowledge receipt of the deposition of the holder and depositions of two witnesses executed in connection with beneficial use proof under the above permit. The affidavit of publication from the Weiser Signal did not accompany the depositions. Will you kindly contact the editor of this newspaper, at your earliest convenience, and request him to furnish us this instrument.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made since the department has but one field engineer who makes examinations all over the state. However, Mr. Tolman, Field Engineer for this department, will contact you at the time set for examination so that you may show him over the grounds. After his report is on file in this office you will be further notified as to fees due before the issuance of your license.

Re: Permit No. 17901

MR. R. L. CARROLL,
Notary Public,
Weiser, Idaho

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of beneficial use of water under Permit No. 17901

DEPOSITION OF PERMIT HOLDER,
DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of rights:

1. On April 12, 1936, the date set for proof, the enclosed forms (one for permit holder and one each for two disinterested witnesses) should be filled out and sworn to, at Weiser, Idaho before R. L. Carroll, Notary Public

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

NOAH NEWSOM
Weiser,
Idaho

Boise, Idaho, **February 8, 1935**

Dear Sir:—

Under the terms of your permit No. **17901**.....you are required to complete your diversion works on or before **April 17, 1935** I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Re: Application for Permit

MR. NOAH NEWSOM
Weiser,
Idaho

Dear Sir:

We are enclosing herewith an application which has been partially completed from the information contained in your application for permit to appropriate 50 miners inches of water from Buttermilk Slough and the plats which accompanied it, which were received in this department on April 1, 1934. Will you please complete the application with reference to the following particulars.

Your works will consist of a pump, pipe and ditch. You have given the diameter of the pipe but you have failed to give the dimensions of the ditch, under paragraph 11, and also the length of the ditch where it mentions the length of conduit.

Under paragraphs 12 and 13, you should fill in the amount of time which you desire to complete the works contemplated under this application and also the time required to fully apply the water to beneficial use, or in other words to put the land under irrigation. Probably this land is already under irrigation, or at least a part of it, judging from your statement under remarks. However, you do contemplate the increasing of the capacity of the pump and for this reason we suggest that you take at least 6 months in each instance since it will take some little time in which to offer proof.

Under paragraph 15, will you please write in the number of acres contained in each subdivision which you propose to irrigate.

You will note that we have changed the quantity of water claimed from 50 miners inches to 1 cubic foot per second. We have done this merely because in all the procedure which follows, relative to the permit, the quantity of water is spoken of in terms of second feet rather than in miners inches. For your information, we might state that 1 cubic foot per second is the equivalent of 50 miners inches, so the quantity is not being reduced.

After you have completed the application please sign it in the proper place and return it with your plats and fee of \$5.00.

Very truly yours,

R. W. FARIS
