Total Acres: 725

PLACE OF USE: STOCKWATER, same as Irrigation

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before October 01, 2004.
2. Subject to all prior water rights.

MICROFILMED

1992

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 67-14250

CONDITIONS OF APPROVAL

3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
6. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
7. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted for irrigation purposes under this right.
8. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 2900.0 af at the field headgate for the lands above.
11. This right when combined with all other rights shall provide no more than 4.0 afa per acre for irrigation of the lands above.
10. Stockwater use is for 1,000 range cattle.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 26th day of September, 2001.

RE: Permit No. 67-14250

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a 'Proof Due Notice' approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

MICROFILMED

SEP 27 2002

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Subject: Re: App for Permit 67-14250 *File*

I recommend that you prepare approval for 725 acres. Based on my previous discussions with Mr. Post, I expect that he will probably apply irrigation to about 500 acres. However, to provide maximum flexibility, you might as well go for all 725 acres on the permit, and adjust the acres down at licensing time.

RE: Semi-anonymous complaint/concern re John Post

Caller first telephoned S.O. & was referred to Reynard by Shalea Curtis. Caller is worried about situation & does not want to reveal last name etc. due to prior experience with Post, she said.

Said had 1st hand knowledge that Post is bragging about illegal well drilling & proposing to tap into a well/spring to bottle water & sell it to local company. Allegation is that Post will deliberately ruin well if we approve is doing this.

I told her I was not sure if we could proceed without more information but I would check. She said we need to call her back if we could not do anything.

Follow up -

MICROFILMED

✓ 1) Discussed with Rob Whiting & Don Nelson. Both filled me in on WD issues & pending appl. WR

Rob said maybe pre-permit exam might be useful....

Rob + Don could coordinate if need this step. OR maybe WD oversight already in motion is sufficient.

✓ 2) I called Kay & told her the site was already being looked at for various WR + WD issues.

Subject: Local Public Interest Investigation - Application For Permit No. 67-14250

Gentlemen:

On behalf of Carl and Laura Post, Scanlan Engineering has conducted a hydrologic investigation related to their pending application for water right permit No. 67-14250. The investigation has been conducted in response to your letter of March 19, 2001 (Attachment A) requesting that the Post's hire a hydrologist or an engineer to determine if a possible conflict with local public interests exist.

The investigation finds no conflict with local public interest. The investigation has focused on the potential impact on local water resources resulting from development of the proposed water right. Other local public interest issues (economic, etc.) have not been evaluated. However, letters from neighboring property owners (Attachment B) endorsing the project indicate that there is support for the project within the local community.

BACKGROUND

Application for Permit 67-14250 proposes diversion of 8.0 cfs for irrigation of a maximum 725 acres located on the south side of Crane Creek Reservoir. Four wells are proposed. The proposed well sites and irrigated area are shown on Figure 1. Groundwater use would be supplemental to the existing irrigation supply from Crane Creek Reservoir on approximately 250 acres. The application indicates that development of approximately 250 acres of new farm ground is anticipated. Therefore, the total irrigated area will likely be approximately 500 acres within a 725-acre place of use. Attachment C is a copy of the water right application.

One of the wells proposed as a point of diversion was constructed as a test well in February 2001. The well was drilled to a total depth of 390 feet and produced at an estimated rate of 2500 gpm (5.6 cfs). The other proposed wells will be drilled following approval of the water right permit. The water will be pumped from the well with electric pumps. Three-phase power is available on site to support well pumps.

HYDROLOGY

Well Log Review

Well Driller's Reports (well logs) on file at the Western Region Office of the Idaho Department of Water Resources were obtained for wells located within a 42-square mile surrounding the proposed irrigation wells. Only six wells were located in the search area, of which three are located on the Post (formerly Uhrig) property. While there are likely some additional unrecorded wells that were not found by the search, it is obvious that there are very few wells in the local area. Copies of the logs are provided as Attachment D. Table 1 is a summary of the well logs. Well locations are plotted on Figure 2.

Review of the well logs suggests that local well yields are quite variable. Two of the wells produced in excess of 1500 gpm while the remaining four wells produced between 1 and 100 gpm. The logs indicate that most of the wells penetrate basalt (lava) that is overlain by clay, sand, and gravel. The highest well yields are obtained from fractured zones in the basalt, although the Brian Roe well, located in the northeast corner of the search area, obtained 100 gpm from sand aquifer zones between 61 and 103 feet.

Hydrogeology

Surface geology within the Crane Creek area of the Weiser River Basin is shown on Figure 3. Basalt of the Columbia River Group (Pliocene to Miocene age) underlies the entire region. Although the hydraulic conductivity of the basalt is highly variable, the basalt functions as an important aquifer and can yield in excess of 1,000 gpm to properly completed wells. It is likely that the basalt aquifer beneath the project area is continuous for many miles in all directions. As a result, the aquifer is recharged over a broad area. Recharge is likely derived from infiltration of precipitation and snowmelt. Leakage from Crane Creek, its tributaries, and Crane Creek Reservoir probably also provides local recharge to the regional basalt aquifer.

Measured water level elevation in the Post test well is approximately 3108 feet (based on a depth to water of 87 feet and an assumed well site elevation of 3195). The elevation of the top of the water-bearing zone tapped by the well is approximately 2840 feet. Crane Creek Reservoir (full pool elevation 3189 feet) and streams tributary to the reservoir appear to be perched more than 300 feet above the aquifer tapped by the test well. Therefore, it is unlikely that pumping from the aquifer tapped by the test well will induce significant losses from the reservoir or its tributaries. Similarly, domestic and stockwater wells in the area generally tap shallow aquifers with higher static water levels that appear to have some hydraulic separation from the deeper aquifer. For instance, the Driller's Report for the Uhrig (now Post) stockwater well (NWNW Section 35) had a static water level of 22 feet (approximate elevation 3195), suggesting that the shallow aquifer in this area has a higher static water level than the deeper aquifer tapped by the Post test well.

Groundwater Level Trends

Based on review of the USGS web-accessible database and on telephone contact with Idaho Department of Water Resources (Shane Bendixsen, 6/1/01), there is no active groundwater level monitoring in the vicinity of Crane Creek Reservoir (Townships 11N and 12 N, Range 2 W). USGS Open File Report 95-458 (Hydrographs of Water Levels in Observation Wells in Idaho, 1944-1993) lists only four wells in Washington County with long-term water level records. These wells are all more than 6 miles distant from the project site, and are of limited usefulness for determining long-term trends in the local area. Nonetheless, each hydrograph shows relatively stable water levels for 20 years or more, with no long-term decline. Furthermore, the lack of active water-level monitoring is an indication that there are no known problems with water-level decline in the area. Thus, there are no indications that the regional aquifer is over appropriated in the Crane Creek Reservoir vicinity.

Water Right Search

A search of the Idaho Department of Water Resources water right database found very few water rights tapping groundwater sources within the 42-square mile search area. Table 2 lists water rights from groundwater sources within the search area. The only significant irrigation water rights are two water rights in Sections 9 and 10 of T11N, R2W (2 to 3 miles south of the Post property). There are also two pending applications (including 67-14250 by Post) that have not been approved yet.

CONCLUSIONS REGARDING LOCAL PUBLIC INTEREST

Existing hydrologic data suggest that the aquifer proposed for appropriation by Application 67-1450 has sufficient capacity to support the intended irrigation use. Therefore, it is unlikely that existing groundwater or surface water uses will be negatively impacted by the development. In addition, the lack of water right protests suggests that there are no significant concerns among local water users.

Mr. and Mrs. Post have obtained letters of comment from neighboring property owners and water users. These letters support the use of groundwater for irrigation of the lands on the Post ranch. Therefore, it appears that the residents within the surrounding area feel that the proposed project will benefit the local public interest.

RECOMMENDATION

As with any new groundwater development, a water-level monitoring program is recommended to document water-level trends. This program should include annual monitoring of water levels in at least one of the irrigation wells during the 5-year permit development period. Water levels should be measured prior to initiation of irrigation under the proposed permit, and then annually both before and after the irrigation season (generally April and October). The annual monitoring is useful for establishing water-

Dear Mr. Post:

In response to your appearance before the Washington County Commissioners on 3-12-01 to ask for Washington County Commission comment to comply with I.C. 42-203A(e).

Care must be taken by the Washington County Commissioners in setting precedence for future application of this Code section. Because of this concern, it will be necessary to hire a hydrologist or an engineer at your expense to determine if a possible conflict with local public interests does exist.

Your particular project demonstrates no obvious concerns to the County Commissioners, but in the interests of future considerations, we cannot assume the knowledge of County Commissioners sufficient to address all public concerns of your project.

Sincerely,

BOARD OF WASHINGTON COUNTY
COMMISSIONERS

RE: CARL POST APPLICATION FOR WATER PERMITS

Dear sir,

I see no problem with a deep well irrigation systems on Post property at 1267 So. Crane. To be a good husbandry to the land, it needs to be irrigated in the late summer months for a better productive ranch.

Most years by the 20th of July, the water is to low for a third watering of the crops. This year Post's probably will not be able to pump water out of Crane Creek Reservoir due to the shortage of water.

The farm land is rich black fertile soil. By having a well, it would make the land more productive. This would enable the Post's to make good use of their land.

Thank you for your time.

Sincerely

Lloyd Roberts

Chairman of Crane Creek Admin. Board

Re: Carl Post application for water permit

Dear Sir:

We (Sutton & Wakefield) have been farming and ranching in the Crane Creek area since the mid-1970's under the name of "Bar MB Ranches, Inc. We learned early on that there can be a lot of variation in crop production in this area from year to year. For instance, during the drought of 1977, we put up a total of 3000 bales of hay on the whole ranch and put most of our cattle out on rented pasture. The following year, we put up 28,000 bales of hay and had plenty of pasture for our cattle on the same ranch. This was when we decided to drill an irrigation well.

We drilled the well in 1978 and started irrigating in 1979. The irrigation has evened out our production quite well and now we raise enough hay, grain, and pasture for our livestock plus we usually have hay to sell. Before the well, we usually had to buy hay at least every other year.

We use two irrigation systems, one system pumps water from the Crane Creek Reservoir, but only when the reservoir is completely full and usually only until about the middle of July when we run out of water. The other system is our well, which keeps us going on through the fall of each year.

Carl is in about the same position that we were in before drilling the well as he now runs out of water about the middle of July each year. I'm sure that an irrigation well would round out Carl's operation as it has ours.

We do not anticipate that Carl's well will adversely affect our own irrigation well.

Please feel free to contact us if we can be of further help.

Very truly yours;

Vernon C. Sutton

RE: CARL POST APPLICATION FOR WATER PERMITS

DEAR SIR,

I AM CARL & LAURA POST NEAREST NEIGHBOR ON BOTH SIDE OF HIS PROPERTY.

I HAVE A RANCH ON THE NORTH SIDE THAT HAS BLM BETWEEN US. ON THE SOUTH SIDE, I TAKE CARE OF MY MOTHER PROPERTY WHICH BORDERS THEIR RANCH.

AS A RANCHER WHO HAS LIVED UP HERE MANY YEARS I HAVE SEEN THE GOOD AND THE BAD YEARS DUE TO THE WATER. I FEEL FOR THEM TO MAKE THE BEST USE OF THE GROUND, DEEP WELL ARE NEEDED TO SUPPLEMENT THE WATER THEY GET FROM THE RESERVOIR. I AM GLAD TO SEE SOMEONE TRYING TO IMPROVE THEIR PRODUCTION BY MAKING IT POSSIBLE TO IRRIGATE THE WHOLE SEASON, INSTEAD OF PARTIALLY IRRIGATING. THE BEST OF YEARS THERE IS ONLY 2 IRRIGATION. A LOT OF YEAR THERE IS ONLY ONE IRRIGATION.

A DEEP WELL IS THE ONLY FEASIBLE ANSWER TO GROWING GOOD CROP TO FEEL OUR ANIMALS AND MAKE A LIVING.

SINCERELY,

VICTOR CRAIG

Midvale, ID 83645

Application No.
(if known)

☐ IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

☐ PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

☒

WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.

RE: APPLICATION FOR PERMIT FOR 67-14250

Dear Mr. and Ms. Post:

You recently submitted the Large Diversion information required for application for permit 67-14250. As part of this information, you were required to seek comment from the County Commissioners of Washington County. In the letter that you sent to us from the County, they requested that you hire a hydrologist or engineer to determine if a possible conflict with the local public interest did exist (letter attached). However, we did not receive a final statement from you showing that you had supplied the information requested from the county and that they were satisfied that there would not be a conflict of the local public interest.

We do not feel that we can complete the processing of your application without receiving documentation from the county that their request has been satisfied and that they do not oppose your development of this water right. The remaining documentation that you have supplied us has met all of our needs. Once we receive the letter from the county saying that to their best of their knowledge this application will adversely affect the local public interest, we can continue to process your application.

If you have any questions please contact me at the above address.

Respectfully,

Daniel A. Nelson
Sr. Water Right Agent

Carl Post
1267 S. Crane
Midvale, Idaho 83645

Dear Mr. Post:

In response to your appearance before the Washington County Commissioners on 3-12-01 to ask for Washington County Commission comment to comply with I.C. 42-203A(e).

Care must be taken by the Washington County Commissioners in setting precedence for future application of this Code section. Because of this concern, it will be necessary to hire a hydrologist or an engineer at your expense to determine if a possible conflict with local public interests does exist.

Your particular project demonstrates no obvious concerns to the County Commissioners, but in the interests of future considerations, we cannot assume the knowledge of County Commissioners sufficient to address all public concerns of your project.

Sincerely,

BOARD OF WASHINGTON COUNTY
COMMISSIONERS

ACTION THE DEPARTMENT OF WATER RESOURCES

This Permit is

APPROVED

Date

12/21/00

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS:

Well use is limited to "Domestic" Stockwater.
 pursuant to Section 42-1112 I.C.

This well shall not be used for any other purposes
 without an approved water right permit.

MEMORANDUM

TO: Gary Spackman
FROM: Daniel A. Nelson
DATE: March 29, 2001
SUBJECT: Large Diversion Requirements.

I have reviewed the information received in response to my request for the "Large Diversion Requirements" required on an application of this size. The applicant's have done a good job of answering these questions. They have already drilled one of the wells and test pumped it. The applicant's son is John Post who will do the drilling free of charge. The 3-phase power for the wells is only 150 away from the well site so hook up costs should not be prohibitive.

The applicant has supplied letters from his neighbors and Washington County. These letters seem to represent that they have spoken to their neighbors and that they all feel that this is a good project.

Based on the information supplied, I would say that the Large Diversion Requirement has been fulfilled and that this application should be approved.

PLEASE SEE ATTACHED INFORMATION SUPPLIED BY THE APPLICANT

MICROFILMED

OCT 6 2 2002

C. THERE IS NO WELL WITHIN A HALF MILE RADIUS. THE NEAREST WELL IS A MILE AWAY. IT IS PART OF THE RANCH. THE SECOND WELL IS LOCATED 2 MILES AWAY. WE FEEL THAT WE WILL NOT AFFECT ANY EXISTING WELL OR SPRING.. WE CASED OFF AN AQUIFER OF WATER AT 180 FEET THAT HAD APPROXIMATELY 100 GAL A MINUTE TO SAVE FOR DOMESTIC USE.

D. PERTAINING TO WELL# 1 -- ACCORDING TO THE DRILLER, THERE WAS A LOT OF WATER AROUND 360 TO 390 FEET MOVING THROUGH BROKEN BASALT FORMATION. THE WELL DRILLER THOUGHT THERE WAS STILL MORE WATER DOWN THERE BECAUSE THE LAVA ROCK WAS STILL BROKEN UP WHEN HE STOPPED DRILLING. HE STOPPED DRILLING BECAUSE THERE WAS MORE WATER THAN HE COULD PUMP OUT OF A 12 INCH WELL.

E. WELL #1 IS DONE. THE PUMPING SYSTEM IS FIGURED OUT AND WILL BE INSTALLED AS SOON AS WATER RIGHTS ARE APPROVED. WELL #2 MATERIAL IS SETTING AT RANCH WAITING FOR WATER RIGHTS AND DRILLING PERMIT TO BE APPROVED. WE MAY ONLY NEED 2 WELLS IF WELL #2 PRODUCES AS GOOD AS WELL NUMBER 1.

E. THE FIRST WELL PAID FOR. THE SECOND WELL MATERIAL IS PAID FOR. THE WELL COST OF DRILLING WILL BE PROVIDED BY OUR SON JOHN POST (TREASURE VALLEY WELL DRILLING). THE MONEY IS AVAILABLE FOR THE PUMPING SYSTEM WHEN NEEDED. THE 3 PHASE POWER AND THE MAIN LINE ARE WITHIN 150 FEET OF THE WELL, SO THE EXPENSES WILL BE MINIMUM.

G. WILL BE PROVIDED ON A SEPARATE SHEET.

RE: CARL POST APPLICATION FOR WATER PERMITS

DEAR SIR,

I AM CARL & LAURA POST NEAREST NEIGHBOR ON BOTH SIDE OF HIS PROPERTY.

I HAVE A RANCH ON THE NORTH SIDE THAT HAS BLM BETWEEN US. ON THE SOUTH SIDE, I TAKE CARE OF MY MOTHER PROPERTY WHICH BORDERS THEIR RANCH.

AS A RANCHER WHO HAS LIVED UP HERE MANY YEARS I HAVE SEEN THE GOOD AND THE BAD YEARS DUE TO THE WATER. I FEEL FOR THEM TO MAKE THE BEST USE OF THE GROUND, DEEP WELL ARE NEEDED TO SUPPLEMENT THE WATER THEY GET FROM THE RESERVOIR. I AM GLAD TO SEE SOMEONE TRYING TO IMPROVE THEIR PRODUCTION BY MAKING IT POSSIBLE TO IRRIGATE THE WHOLE SEASON, INSTEAD OF PARTIALLY IRRIGATING. THE BEST OF YEARS THERE IS ONLY 2 IRRIGATION. A LOT OF YEAR THERE IS ONLY ONE IRRIGATION.

A DEEP WELL IS THE ONLY FEASIBLE ANSWER TO GROWING GOOD CROP TO FEED OUR ANIMALS AND MAKE A LIVING.

SINCERELY,

VICTOR CRAIG

Re: Carl Post application for water permit

Dear Sir:

We (Sutton & Wakefield) have been farming and ranching in the Crane Creek area since the mid-1970's under the name of "Bar MB Ranches, Inc. We learned early on that there can be a lot of variation in crop production in this area from year to year. For instance, during the drought of 1977, we put up a total of 3000 bales of hay on the whole ranch and put most of our cattle out on rented pasture. The following year, we put up 28,000 bales of hay and had plenty of pasture for our cattle on the same ranch. This was when we decided to drill an irrigation well.

We drilled the well in 1978 and started irrigating in 1979. The irrigation has evened out our production quite well and now we raise enough hay, grain, and pasture for our livestock plus we usually have hay to sell. Before the well, we usually had to buy hay at least every other year.

We use two irrigation systems, one system pumps water from the Crane Creek Reservoir, but only when the reservoir is completely full and usually only until about the middle of July when we run out of water. The other system is our well, which keeps us going on through the fall of each year.

Carl is in about the same position that we were in before drilling the well as he now runs out of water about the middle of July each year. I'm sure that an irrigation well would round out Carl's operation as it has ours.

We do not anticipate that Carl's well will adversely affect our own irrigation well.

Please feel free to contact us if we can be of further help.

Very truly yours;

Vernon C. Sutton

RE: CARL POST APPLICATION FOR WATER PERMITS

Dear sir,

I see no problem with a deep well irrigation systems on Post property at 1267 So. Crane. To be a good husbandry to the land, it needs to be irrigated in the late summer months for a better productive ranch.

Most years by the 20th of July, the water is to low for a third watering of the crops. This year Post's probably will not be able to pump water out of Crane Creek Reservoir due to the shortage of water.

The farm land is rich black fertile soil. By having a well, it would make the land more productive. This would enable the Post's to make good use of their land.

Thank you for your time.

Sincerely

Lloyd Roberts

Dear Mr. Post:

In response to your appearance before the Washington County Commissioners on 3-12-01 to ask for Washington County Commission comment to comply with I.C. 42-203A(e).

Care must be taken by the Washington County Commissioners in setting precedence for future application of this Code section. Because of this concern, it will be necessary to hire a hydrologist or an engineer at your expense to determine if a possible conflict with local public interests does exist.

Your particular project demonstrates no obvious concerns to the County Commissioners, but in the interests of future considerations, we cannot assume the knowledge of County Commissioners sufficient to address all public concerns of your project.

Sincerely,

BOARD OF WASHINGTON COUNTY
COMMISSIONERS

**RE: APPLICATION FOR PERMIT'S LARGE DIVERSION REQUIREMENTS
WATER RIGHT 67-14250**

Dear Applicants:

Your Application for Permit for irrigation was received on 2/6/2001 and was advertised on February 15 and 22 2001. This application has completed advertising and the protest period and we are ready to continue with processing. Therefore, we will need the large diversion information I requested in my letter-dated 2/5/2001. I have included the information from that letter that will need to be supplied.

Pursuant to Idaho Code 42-203A(5)(a-e) and 42-203C(2), additional information is needed for applications for permit involving irrigation of more than 200 acres and/or diversions exceeding 5.00 cfs or 500 acre-feet of storage. Required information relating to the proposed water right, as outlined in the attached copy of Water Appropriation Rules 37.03.08.040.05.c through g, covers the following items:

- c) Effect on existing water rights,
- d) Sufficiency of water supply,
- e) Good faith, delay, or speculative purposes,
- f) Financial resources, and
- g) Local public interest.

The local public interest criteria may be met by soliciting comment letters from the Payette County Board of Commissioners. Comment should address the effect of the construction and operation of the project within the local area.

You may summarize any of the answers with a brief statement where appropriate.

In order to process all of the applications in our office as efficiently as possible, we are required by Idaho Code § 42-204 to ask that this information be sent to our office within 30 days or we are to void the application for permit. **Therefore, if we do not receive the above information by 4/13/2001 we will be forced to void your applications for permit.** If your permit is voided you will be able to re-file for these water rights with a later priority date.

Sincerely,

Daniel A. Nelson
Sr. Water Resource Agent

RE: Application for Permit's Large Diversion Requirements

Dear Applicants:

Your Application for Permit for irrigation was received on 1/4/2001. I have spoken to your son John Post concerning some corrections that needed to be done to the application prior to us advertising the application. Once I receive those corrections and check them, I will submit your application for advertisement. I also spoke to John Post about the large diversion requirements needed to perform the final review of an application of this size. This information will not be required until after your application has completed advertising, but I wanted to send you this letter to inform you of what is needed so you can begin compiling the information. You may compile the following information and send it to me at the above address as soon as it is put together.

Pursuant to Idaho Code 42-203A(5)(a-e) and 42-203C(2), additional information is needed for applications for permit involving irrigation of more than 200 acres and/or diversions exceeding 5.00 cfs or 500 acre-feet of storage. Required information relating to the proposed water right, as outlined in the attached copy of Water Appropriation Rules 37.03.08.040.05.c through g, covers the following items:

- c) Effect on existing water rights,
- d) Sufficiency of water supply,
- e) Good faith, delay, or speculative purposes,
- f) Financial resources, and
- g) Local public interest.

The local public interest criteria may be met by soliciting comment letters from your County Board of Commissioners. Comment should address the effect of the construction and operation of the project within the local area.

You may summarize any of the answers with a brief statement where appropriate.

To avoid further delays, please submit the above information as soon as possible to our Western Region office, at the above address. Let me know if I can be of any assistance.

Sincerely,

Daniel A. Nelson
Sr. Water Resource Agent

criterion (e) of Section 42-203A(5), Idaho Code, as to any factor affecting local public interest of which he is knowledgeable or reasonably can be expected to be knowledgeable. The protestant shall bear the initial burden of coming forward with evidence for those factors relevant to criterion (e) of Section 42-203A(5), Idaho Code, of which the protestant can reasonably be expected to be more cognizant than the applicant. (7-1-93)

iii. The protestant shall bear the initial burden of coming forward with evidence for the evaluation of the public interest criteria of Section 42-203C(2), Idaho Code, and of demonstrating a significant reduction, except that the applicant shall provide details of the proposed design, construction, and operation of the project and directly associated operations to allow the impact of the project to be evaluated. (7-1-93)

c. The applicant has the ultimate burden of persuasion for the criteria of Section 42-203A, Idaho Code, and the protestant has the ultimate burden of persuasion for the criteria of Section 42-203C, Idaho Code. (7-1-93)

d. For unprotested applications or permits to be reprocessed, the director will evaluate the application, information submitted pursuant to Rule Subsection 040.05.c. and information in the files and records of the department, and the results of any studies the department may conduct to determine compliance with the appropriate criteria. (7-1-93)

e. In protested matters the director will take official notice of information as described in the department's adopted Rules of Procedure, and will, prior to considering, circulate to the parties information from department studies and field examinations concerning the protested application or permit being reprocessed, if such information has not otherwise been made a part of the hearing record. (7-1-93)

05. Additional Information Requirements. (7-1-93)

a. For unprotested applications and permits being reprocessed, the additional information required by Rule Subsection 040.05.c. shall be submitted within thirty (30) days after the director notifies the applicant that the application or permit is being reviewed for decision. The director may extend the time within which to submit the information upon request by the applicant and upon a showing of good cause. Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. The director will provide opportunity for hearing as provided in Section 42-1701A, Idaho Code. (7-1-93)

b. For protested applications or protested permits being reprocessed, the information required by Rule Subsection 040.05.c. may be requested by the director to be submitted within thirty (30) days after notification by the director, may be made a part of the record of the hearing held to consider the protest, or may be made available in accordance with any pre-hearing discovery procedures. Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. (7-1-93)

c. The following information shall be submitted for applications to appropriate unappropriated water or trust water and for permits being reprocessed for trust water. The additional information submittal requirements of this rule are waived for filings which seek to appropriate five (5) cfs or less or storage of five hundred acre-feet (500 AF) or less and for filings seeking reallocation of trust water which the director determines will reduce the flow of the Snake River measured at Murphy Gauge by not more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. However, the director may specifically request submittal of any of the following information for any filing, as he determines necessary. Information relative to the effect on existing water rights, Section 42-203A(5)(a), Idaho Code, shall be submitted as follows: (7-1-93)

i. For applications appropriating springs or surface streams with five (5) or fewer existing users, either the identification number, or the name and address of the user, and the location of the point of diversion and nature of use for each existing water right shall be submitted. (7-1-93)

ii. For applications appropriating groundwater, a plat shall be submitted locating the proposed well relative to all existing wells and springs and permitted wells within a one-half mile radius of the proposed well.

(7-1-93)

iii. Information shall be submitted concerning any design, construction, or operation techniques which will be employed to eliminate or reduce the impact on other water rights. (7-1-93)

d. Information relative to sufficiency of water supply, Section 42-203A(5)(b), Idaho Code, shall be submitted as follows: (7-1-93)

i. Information shall be submitted on the water requirements of the proposed project, including, but not limited to, the required diversion rate during the peak use period and the average use period, the volume to be diverted per year, the period of year that water is required, and the volume of water that will be consumptively used per year. (7-1-93)

ii. Information shall be submitted on the quantity of water available from the source applied for, including, but not limited to, information concerning flow rates for surface water sources available during periods of peak and average project water demand, information concerning the properties of the aquifers that water is to be taken from for groundwater sources, and information on other sources of supply that may be used to supplement the applied for water source. (7-1-93)

e. Information relative to good faith, delay, or speculative purposes of the applicant, Section 42-203A(5)(c), Idaho Code, shall be submitted as follows: (7-1-93)

i. The applicant shall submit copies of deeds, leases, easements or applications for rights-of-way from federal or state agencies documenting a possessory interest in the lands necessary for all project facilities and the place of use or if such interest can be obtained by eminent domain proceedings the applicant must show that appropriate actions are being taken to obtain the interest. Applicants for hydropower uses shall also submit information required to demonstrate compliance with Sections 42-205 and 42-206, Idaho Code. (7-1-93)

ii. The applicant shall submit copies of applications for other needed permits, licenses and approvals, and must keep the department apprised of the status of the applications and any subsequent approvals or denials. (7-1-93)

f. Information Relative to Financial Resources, Section 42-203A(5)(d), Idaho Code, shall be submitted as follows: (7-1-93)

i. The applicant shall submit a current financial statement certified to show the accuracy of the information contained therein, or a financial commitment letter along with the financial statement of the lender or other evidence to show that it is reasonably probable that financing will be available to appropriate the water and apply it to the beneficial use proposed. (7-1-93)

ii. The applicant shall submit plans and specifications along with estimated construction costs for the project works. The plans shall be definite enough to allow for determination of project impacts and implications. (7-1-93)

g. Information Relative to Conflict with the Local Public Interest, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows: The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the city and/or county and tribal reservation within which the point of diversion and place of use are located, the Idaho Department of Fish and Game, the Idaho Department of Environmental Quality, and any irrigation district or canal company within which the proposed project is located and from other entities as determined by the director. (7-1-93)

h. The following information Relative to the Public Interest Criteria of Section 42-203C(2), Idaho Code, shall be submitted by an applicant seeking reallocation of trust water for a project which the director determines will reduce the flow of the Snake River by more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. The director may request any or all of the following information for any filing seeking the reallocation of trust water. (7-1-93)

#655⁰⁰

1. Name of Applicant Charles L. Post & Laura E. Post
Mailing address 1267 SO Crane, Midvale, Idaho
2. Source of water supply Ground water - well which is a tributary of the State of Idaho
3. Location of point of diversion is Township 12 N Range 2 W Section 35 SW 1/4, SW 1/4, Govt. Lot 20, B.M., 20, 20 county; additional points of diversion if any: 2 wells and 1 well in SW NE S. 27
1 well in SW NW S. 35
4. Water will be used for the following purposes:

- Amount 4.5 CFS for Farm Irrigation purposes from 4/15 to 10/15 (both dates inclusive)
(cfs or acre-feet per annum)
- Amount .06 for Stock purposes from 1-1 to 12-31 (both dates inclusive)
- A a 1,000 head of purposes from 1-1 to 12-31 (both dates inclusive)
A Range CATTLE purposes from 1-1 to 12-31 (both dates inclusive)
A Can have a purposes from 1-1 to 12-31 (both dates inclusive)
A diversion rate purposes from 1-1 to 12-31 (both dates inclusive)
of .23 CFS purposes from 1-1 to 12-31 (both dates inclusive)
What kind of purposes from 1-1 to 12-31 (both dates inclusive)
Stock purposes from 1-1 to 12-31 (both dates inclusive)
5. To Stock (a) 4.5 CFS at 4.5 acre-feet per annum

6. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source NA
- b. Height of storage dam NA feet; active reservoir capacity NA acre-feet; total reservoir capacity NA acre-feet
- c. Proposed well diameter is 12 inches; proposed depth 12 feet
- d. Is ground water with a temperature of greater than 85°F being diverted? NO
- e. If well is already drilled, when? NO; Drilling firm NO
Well was drilled for (well owner) NO

7. Time required for completion of works and application of water to proposed beneficial use is 3 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
- a. Hydropower; show total feet of head and proposed capacity in kW. NO
- X b. Stockwatering; list number and kind of livestock. 1000 head
- c. Municipal; show name of municipality. NO
- d. Domestic; show number of households. NO
- e. Other; describe fully. NO

CORRECTION 12 2002

1000 head
of what?
CATTLE, sheep
chickens.

9. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

RE: Application for Permit No. 67-14250

Dear LEGAL NOTICE DEPARTMENT:

Enclosed you will find a legal notice which we wish to have published in your newspaper on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 03/05/2001. Your cooperation is appreciated.

Sincerely

Sue Taylor
Senior Secretary

REQUEST TO PROCESS

COMPLETE REQUEST IF YOU WANT YOUR APPLICATION TO BE PROCESSED USING ONE OF THE
THREE ALTERNATIVES BELOW

Name of Applicant

Carlos L. Post & or Laura E Post

Mailing Address

1262 S. Crane
Midvale, ID 83645

Application No.
(if known)

IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

X

WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.
