

APPLICATION FOR PERMIT To Appropriate the Subterranean Waters of The State of Idaho

Application No. G- 36682
Permit No. G- 28703
District No.

1. Name of Applicant: Idaho Power Company
Postoffice address: 1220 Idaho Street County: Ada State: Idaho
2. Quantity of water claimed: 0.53 cubic feet/second
(a) Rate of withdrawal in cubic feet per second 0.53 or Idaho
Miners' inches 26.5 or gallons per minute 238
(b) Annual withdrawal in acre feet per annum
3. Source of water supply: 1 well
4. Location of point of diversion or well is in the NW 1/4 of the NE 1/4 of Section 31
Twp. 3 N , Rge. 3 E , B.M., County of Ada
5. Water is to be used for: Irrigation
6. If for municipal, industrial or recreational purposes, give:
(a) Point of use of water is in the 1/4 of the 1/4 of Section , Twp.
Rge. , B.M.
(b) Waste water or sewage effluent is to be returned to
at a point in the 1/4 of the 1/4 of Section , Twp. , Rge. , B.M.
7. Kind of works: 1 well, 1 pump, ditches, etc.
8. Estimated cost of works: \$5,000.00
9. (a) Is reservoir to be used? No
(b) Capacity of reservoir:
10. The time required for the completion of such work and complete application of the water to the proposed use is 5 years.
11. If applicant is a corporation, give:
I. (a) Date and place of incorporation: May 6, 1915 - Augusta, Maine
(b) Amount of capital stock: \$120,000,000 (c) Amount paid in: \$ 51,250,000
(d) Names and addresses of directors: See attached list
II. The financial resources of the applicant are (a) Cash onhand: \$ See enclosed list
(b) Treasury stock: (c) Bonds to be issued:
(d) Other resources:
12. The land to be irrigated is described in the following tabulation:
13. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: None
(a) (cubic feet per second, inches or gallons per minute) of the water herein applied for is to be supplemental to the existing water rights.
(b) 0.53 cfs (cubic feet per second, inches or gallons per minute) is for new lands.

NAME OF APPLICANT IDAHO POWER CO.

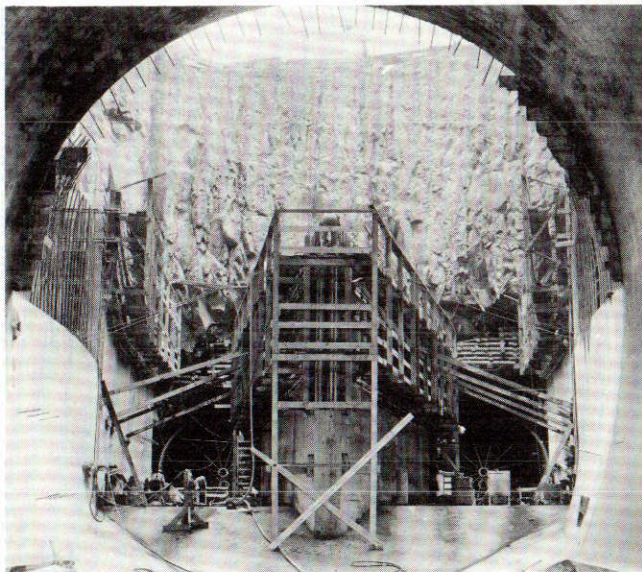

Form No. 0

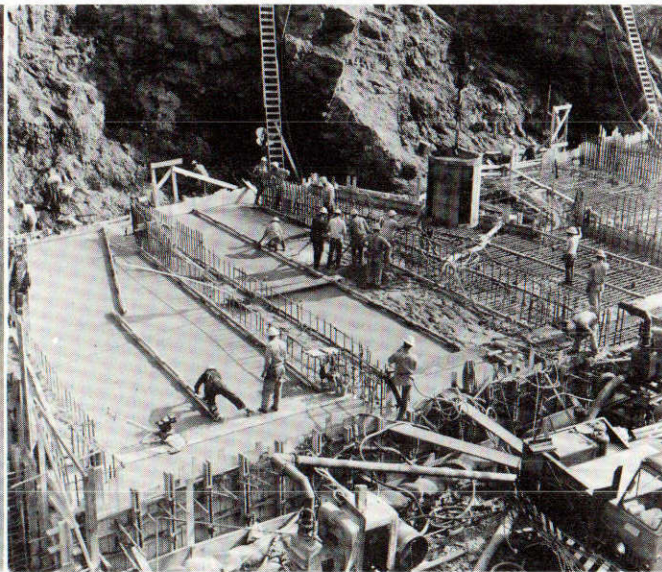

Permit Map No. 28703
As Approved
GEO. N. CARTER
State Reclamation Engineer
MAY 17 1960

AERIAL VIEW shows broad spread of work being performed in the big Oxbow project's dam area. Rockfill embankment is at center, within 50 feet of its final height. Concrete spillway and one of two upstream-migrant fish facilities are at left and excavation for fuse-plug spillway is under way on Idaho side of embankment at right.

VIEW FROM one of Oxbow Dam's concrete-lined power tunnels shows work under way on transition structure (center) that will split water into two penstock tunnels in background. Lining of the 36-foot-diameter power tunnels is virtually completed.

WORKMEN PLACE concrete for Oxbow Dam's 200,000-kilowatt powerhouse from bucket lowered into position by crane. Concrete placement began in March for the powerhouse, which will be 295 feet long and 80 feet high. Penstock welding is under way.

T. E. ROACH
PRESIDENT

IDAHO POWER COMPANY

BOISE, IDAHO

May 2, 1960

To the Shareowners of Idaho Power Company:

The Board of Directors, at its meeting held April 14, 1960, declared the regular quarterly dividend on the outstanding 215,000 shares of 4% preferred stock (\$100 par value) of the Company to preferred shareowners of record as of April 15, 1960, payable May 2, 1960. This is the 174th consecutive quarterly dividend declared by the Company on its preferred stock since it began operations in 1916.

Also on April 14, the Board of Directors declared a dividend of 42½ cents per share on the outstanding 2,975,000 shares of common stock (\$10 par value) of the Company to common shareowners of record as of April 25, 1960, payable May 20, 1960. This is the 67th consecutive quarterly dividend declared by the Company on its common stock since such stock was first distributed to the public in 1943.

As indicated by the increase in general business revenues for the first quarter over the same period of 1959, economic conditions throughout our service area remain satisfactory and give promise of continuing so in the months ahead. Because of a cool and fairly wet spring, irrigation pumping use is coming on at a somewhat slower rate than normal, but late spring and summer water needs usually compensate for any early season lag in pumping.

Contract arrangements have recently been completed which will bring our service into the Wells-Elko area of northeastern Nevada, thus expanding the Company's operations in that state.

Major concrete placement activities are now in full swing on all phases of our Oxbow hydroelectric development and work on that project is proceeding on a schedule which anticipates completion late in the summer of 1961. At the same time a jointly-owned 230,000 volt transmission line from Oxbow to Lewiston, Idaho, under construction by our Company and Washington Water Power Company, is nearing completion and will be in service by September 1 of this year. Work is also getting under way on an additional 230,000 volt circuit from Boise to American Falls, Idaho, with completion scheduled for late in the summer of 1961 to coincide with the addition of Oxbow generation to our system resources.

For the first three months of this year, revenues, expenses and net income are all satisfactorily within our budget forecast.

Yours very truly,

T. E. Roach

President.

This letter is prepared for the information of shareowners of the Company, and is not transmitted, nor is it to be used by others, in connection with any sale, offer for sale, or solicitation of an offer to buy any securities.

28703

28703

Note:

The legal description for this license is in error. The township should read T4N rather than T3N. The "Report of Engineer" shows Freestone Creek flowing through Section 31. As can be seen on the quad sheet, Freestone flows only through Section 31, T4N, R3E, not through T3N. The R.D. has been platted accordingly.

RE: Permit No. G-28703

May 26, 1966

J. F. Emery, Vice President
Idaho Power Company
1220 Idaho Street
Boise, Idaho

Dear Mr. Emery:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. G-28703 shows the well ~~(is)~~ is ~~(able)~~ capable of conveying 25.5 miner's inches, or .51 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$ 7.00 , we will issue the Certificate of Completion of Works for 0.51 c.f.s. and the License and Certificate of Water Right for 0.51 c.f.s. confirming the right, with priority of May 12, 1960 , to the use of subterranean water with the point of diversion in the NW~~1/4~~NE~~1/4~~ Sec. 31 for irrigation of 31 acres in the NW~~1/4~~NE~~1/4~~ Sec. 31, T. 3 N., R. 3E., B.M.

Very truly yours,

M. Russell Bosch
Office Manager

BOISE, IDAHO
REPORT OF ENGINEER

Permit No. G-28703This proof is for Completion of Works & Beneficial Use In Water District No. _____1. Name of applicant Idaho Power Company2. Source of water supply: Subterranean3. Location of point of diversion: Is in the NE 1/4 of Section 31T. 3 N R. 3 E.B.M. County of Ada

4. Describe works as they exist, giving dimensions and capacities of same: 20 HP US Motor
1064747, Layne & Bowler Pump #22548 (3205 RPM @ 200' @ 1750 RPM)
(8 CH) model, 6" discharge x 1/2" steel pipe south into an old pickup truck
Bed. then to open ditches east and west land irrigates North. Pump
base sets on 12" casing that extends 2 1/2' above ground.

5. Water is used for: Irrigation6. State whether or not water has been turned into works of diversion: ybs.

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

NE 1/4 Sec. 31., Twp. 3 N., Rge. 3 E.B.M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: Idaho Power line man along (John Compton)

Land hasn't been farmed last year nor do they have a center
for this year yet.

Measured by California Pipes Method D=.48', d=.2' Q=.51 cfs.
Coordinate Method D=.48', d=.2' = Q=.45 cfs.

This examination was made on the 9th day of May, 1966(Signed) Layne Johnson Examiner.

28703

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Re: Permit No. G- 28703

Idaho Power Co
1220 Idaho St.
Boise, Idaho

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 28703 are due not later than **May 17, 1965**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Carl E. Tappan

State Reclamation Engineer

Re: Permit No. G-28703

April 1, 1965

Gale C. Farley
1220 Idaho Street
Boise, Idaho

Dear Mr. Farley:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-28703, in the name of Idaho Power Company, Final Proof is to be made before you, as Notary on the 14th day of May, 19 65, at 2:00 o'clock P.M., at 1220 Idaho Street, Boise, Idaho.

As of this date, we have mailed the Notice to the Meridian Times, with instructions to publish it once a week for two consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done hereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION.

Very truly yours,

CARL E. TAPPAN
State Reclamation Engineer

NOTICE TO ACCOMPANY THIS LETTER MUST BE MADE IN DUPLICATE

(Date) April 1, 1965

(P. O.) Box 770, Boise, Idaho

TO THE STATE RECLAMATION ENGINEER

Boise, Idaho

Dear Sir:

You are hereby authorized to have the attached notice published
at my expense in the Meridian Times of
Meridian, Idaho Published in
the county in which the works are situated.

IDAHO POWER COMPANY

By J F Emery
J F Emery, Vice President

(In case of canals or other works designed to divert and
carry more than 50 cubic feet of water per second, the following certificate
must be signed by a well known and competent engineer)

I hereby certify that the facts set forth in the attached
notice are true.

Engineer

NOTICE OF PROOF OF COMPLETION OF WORKS and APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 2:00 P.M., on the 14th day of May, 1965, at Boise, County of Ada, State of Idaho before Gale C. Farley, Notary Public, at (address) 1220 Idaho Street, Boise, Idaho, proof will be submitted of the completion of works for the diversion of 0.53 cubic feet per second of underground water from a well, and of the application to beneficial use of said water, in accordance with the terms and conditions of Permit No. G-28703, heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit is Idaho Power Company, P.O. Box 770, Boise, Idaho.

2. Said works of diversion will be fully completed on the date for such completion, and the amount of water which said works are capable of conveying to the place of use is 0.53 cubic feet per second.

3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 0.53 cubic feet per second.

4. The point of diversion of said water is NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 31, T3N, R3E, BM.

5. The place where said water is used is NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 31, T3N, R3E, BM.

6. The date of priority which said user is prepared to establish is May 12, 1960.

PROOF OF APPLICATION OF WATER TO BENEFICIAL USE and Completion of Works

* * * * *

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address: J F Emery,

Boise, Idaho, Vice President and General Manager, 1220 Idaho Street, Boise, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf:

Idaho Power Company, 1220 Idaho Street, Boise, Idaho - Vice President & General Manager

Ques. 3. State number, approval date of permit, and date of priority you propose to establish under the permit; G-28703 - May 17, 1960 - May 12, 1960

Ques. 4. State source of water supply: 1 well

Give location of point of diversion, showing subdivision, section, township and range:

NW $\frac{1}{4}$ NE $\frac{1}{4}$, Section 31, Township 3 North, Range 3 East, BM, Ada County, Idaho

Ques. 5. Describe your works of diversion: 20 HP Layne-Bowler pump, pipe and ditches

_____ ; state amount of water they are capable of conveying from point of diversion to place of use 0.53 cfs ; Give name of canal or ditch

or other works by which water is conducted to such place of use: no name

_____ ; if a well, state depth of well 250 feet ; depth and size of cas-

ing: 6 inch casing ; depth to water 150 ; if pump is used,

state discharge of pump: 26 miners inches tell how it was measured or determined: observation

and measurement ; if sprinkler irrigation, give number and size of nozzles and

operating pressure:

Ques. 6. State for what purpose water is used: Irrigation

If for irrigation, name each subdivision in which used and number of acres in each subdivision that have actually been irrigated with said water : NW¹NE¹, Section 31

Township 3 North, Range 3 East, BM

State nature of all improvements which have been made as a direct result of said use:

ditches, well and pump and land leveling

As long

2870.3

Ques. 6-a: If this is a ground water permit, give name and address of person that drilled the well: Unknown

Ques. 7. If for other than irrigation purposes, state purpose and how used:
not applicable

Ques. 8. What is the minimum amount of water required for the purpose specified above:
0.53 cfs

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder:
not applicable

Ques. 10. State when and in what amount the water diverted under above mentioned permit has been first used: 1961 Time used since first use:
Each crop year since then

Ques. 11. Describe all other water rights appurtenant to same place of use:
None

DEPOSITION OF WITNESS

The deposition of two witnesses on this form, taken separately, required in each case

Ques. 1. State your name, age, residence, occupation and postoffice address:

William Onweiler, 42, 1521 North Garden, Real Estate Broker, Boise, Idaho

Ques. 2. Are you acquainted with Idaho Power Company, the holder of
Permit No. G-28703 ? How long have you known him and where does he reside:

Many years - 1220 Idaho Street, Boise, Idaho

Ques. 3. Have you read or heard said Permit No. G-28703 read, and are you familiar
with its provisions and conditions: Yes: x No:

Ques. 4. State source of water supply: Underground subterranean well

State place of diversion: NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec 31, T3N, R3E, BM, Ada County, Idaho

Describe works for conveying water to place of use: ditches

Ques. 5. How many second feet of water do you estimate said works will safely conduct
to place of use: 0.53 cfs How much water have you seen being so
conveyed: 0.53 cfs

Ques. 6. If for irrigation, show number of acres irrigated in each subdivision, giving
full legal description:
40 acres - NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec 31, T3N, R3E, BM, Ada County, Idaho

28703

Ques. 7. If for power or other purposes than irrigation, state how water has been used:

No purpose other than irrigation

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation:

I estimate 0.53 cfs required for profitable cultivation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent: None

Ques. 10. When did you first see this water used: May 14, 1965

Other times you have seen such use: None

Vice President and General Manager
Idaho Power Company
1220 Idaho Street
Boise, Idaho

Dear Mr. Emery:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the MERIDIAN NEWS-TIMES, all submitted in proof of completion of works and beneficial use on Permit No. G-28703.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

AERIAL VIEW shows broad spread of work being performed in the big Oxbow project's dam area. Rockfill embankment is at center, within 50 feet of its final height. Concrete spillway and one of two upstream-migrant fish facilities are at left and excavation for fuse-plug spillway is under way on Idaho side of embankment at right.

VIEW FROM one of Oxbow Dam's concrete-lined power tunnels shows work under way on transition structure (center) that will split water into two penstock tunnels in background. Lining of the 36-foot-diameter power tunnels is virtually completed.

WORKMEN PLACE concrete for Oxbow Dam's 200,000-kilowatt powerhouse from bucket lowered into position by crane. Concrete placement began in March for the powerhouse, which will be 295 feet long and 80 feet high. Penstock welding is under way.

T. E. ROACH
PRESIDENT

IDAHO POWER COMPANY

BOISE, IDAHO

May 2, 1960

To the Shareowners of Idaho Power Company:

The Board of Directors, at its meeting held April 14, 1960, declared the regular quarterly dividend on the outstanding 215,000 shares of 4% preferred stock (\$100 par value) of the Company to preferred shareowners of record as of April 15, 1960, payable May 2, 1960. This is the 174th consecutive quarterly dividend declared by the Company on its preferred stock since it began operations in 1916.

Also on April 14, the Board of Directors declared a dividend of 42½ cents per share on the outstanding 2,975,000 shares of common stock (\$10 par value) of the Company to common shareowners of record as of April 25, 1960, payable May 20, 1960. This is the 67th consecutive quarterly dividend declared by the Company on its common stock since such stock was first distributed to the public in 1943.

As indicated by the increase in general business revenues for the first quarter over the same period of 1959, economic conditions throughout our service area remain satisfactory and give promise of continuing so in the months ahead. Because of a cool and fairly wet spring, irrigation pumping use is coming on at a somewhat slower rate than normal, but late spring and summer water needs usually compensate for any early season lag in pumping.

Contract arrangements have recently been completed which will bring our service into the Wells-Elko area of northeastern Nevada, thus expanding the Company's operations in that state.

Major concrete placement activities are now in full swing on all phases of our Oxbow hydroelectric development and work on that project is proceeding on a schedule which anticipates completion late in the summer of 1961. At the same time a jointly-owned 230,000 volt transmission line from Oxbow to Lewiston, Idaho, under construction by our Company and Washington Water Power Company, is nearing completion and will be in service by September 1 of this year. Work is also getting under way on an additional 230,000 volt circuit from Boise to American Falls, Idaho, with completion scheduled for late in the summer of 1961 to coincide with the addition of Oxbow generation to our system resources.

For the first three months of this year, revenues, expenses and net income are all satisfactorily within our budget forecast.

Yours very truly,

T. E. Roach

President.

This letter is prepared for the information of shareowners of the Company, and is not transmitted, nor is it to be used by others, in connection with any sale, offer for sale, or solicitation of an offer to buy any securities.

* Denotes decrease. () Denotes red figure.

Note.—In computing federal and state income taxes, the Company has adopted, under provisions of the Internal Revenue Code of 1954, methods of accelerated depreciation in lieu of normal depreciation, with respect to certain facilities constructed after December 31, 1953. The reduction in income tax liability resulting therefrom is being charged against income as provision for deferred taxes and set aside as accumulated deferred taxes on income to provide for increased taxes estimated to be payable in future years.

Provision for deferred taxes, resulting from amortization of emergency facilities, has also been recorded as a charge to income in prior periods and set aside as accumulated deferred taxes on income. Following the completion of amortization periods, the latest of which ended in February, 1958, income has been credited, with concurrent charges to accumulated deferred taxes on income, for amounts representing increased taxes.

IDAHO POWER COMPANY

COMPARATIVE BALANCE SHEET, MARCH 31, 1960 AND 1959

(Subject to Approval of Independent Auditors)
