Dear Mr. Bunn:

Upon final review and consideration by the Department of Reclamation, it has found that the application for the proposed transfer of water right for Permit No. G-23285 constitutes an expansion of the original water right, and therefore, is unfavorable to the Department of Reclamation.

It should be suggested that the best possible course for you to pursue would be for you to file a new application for permit to establish a new water right on the 80 acres in question.

Please contact us if we may be of further assistance.
