PROOF OF BENEFICIAL USE

Department of Water Resources

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 37-08770 Telephone No. 543-8301

2. Name(s) of Permit Holder(s): Kip Gould - Anna Gould

3. Mailing Address: 4373 N. 1900 E Buhl Id. 83316

4. Source of Water: Hash Spring If **GROUNDWATER** (well), Date Drilled: mo. _____ / yr. _____

a. Well Driller: _____ Drilling Permit Number: _____ - _____ - _____

b. **OPTIONAL:**
Pump Horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft): _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): 1000 cattle

Irrigation (No. of acres): _____ Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: _____ cfs OR 1.0 acre feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device:	Is a measuring device required?	Yes _____ or No ☒
	Has the measuring device been installed?	Yes _____ or No ☒
Flow Measurement Port:	Is a flow measurement port required?	Yes _____ or No ☒
	Has the measurement port been installed?	Yes _____ or No ☒

8. Fee Enclosed: \$ 50 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Kip Gould Telephone Number: 543-8301

Address: 4373 N. 1900 E Buhl Id. 83316

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

2S	15E	21	~~S~~	~~S~~	~~S~~	~~S~~									~~S~~	~~S~~	~~S~~	~~S~~	320
					SS														
					SR														

SS = Stock Storage. SR = Stockwater from Storage.

Total number of acres to be irrigated _____

10. Describe any other water rights used for the same purposes as described above. _____

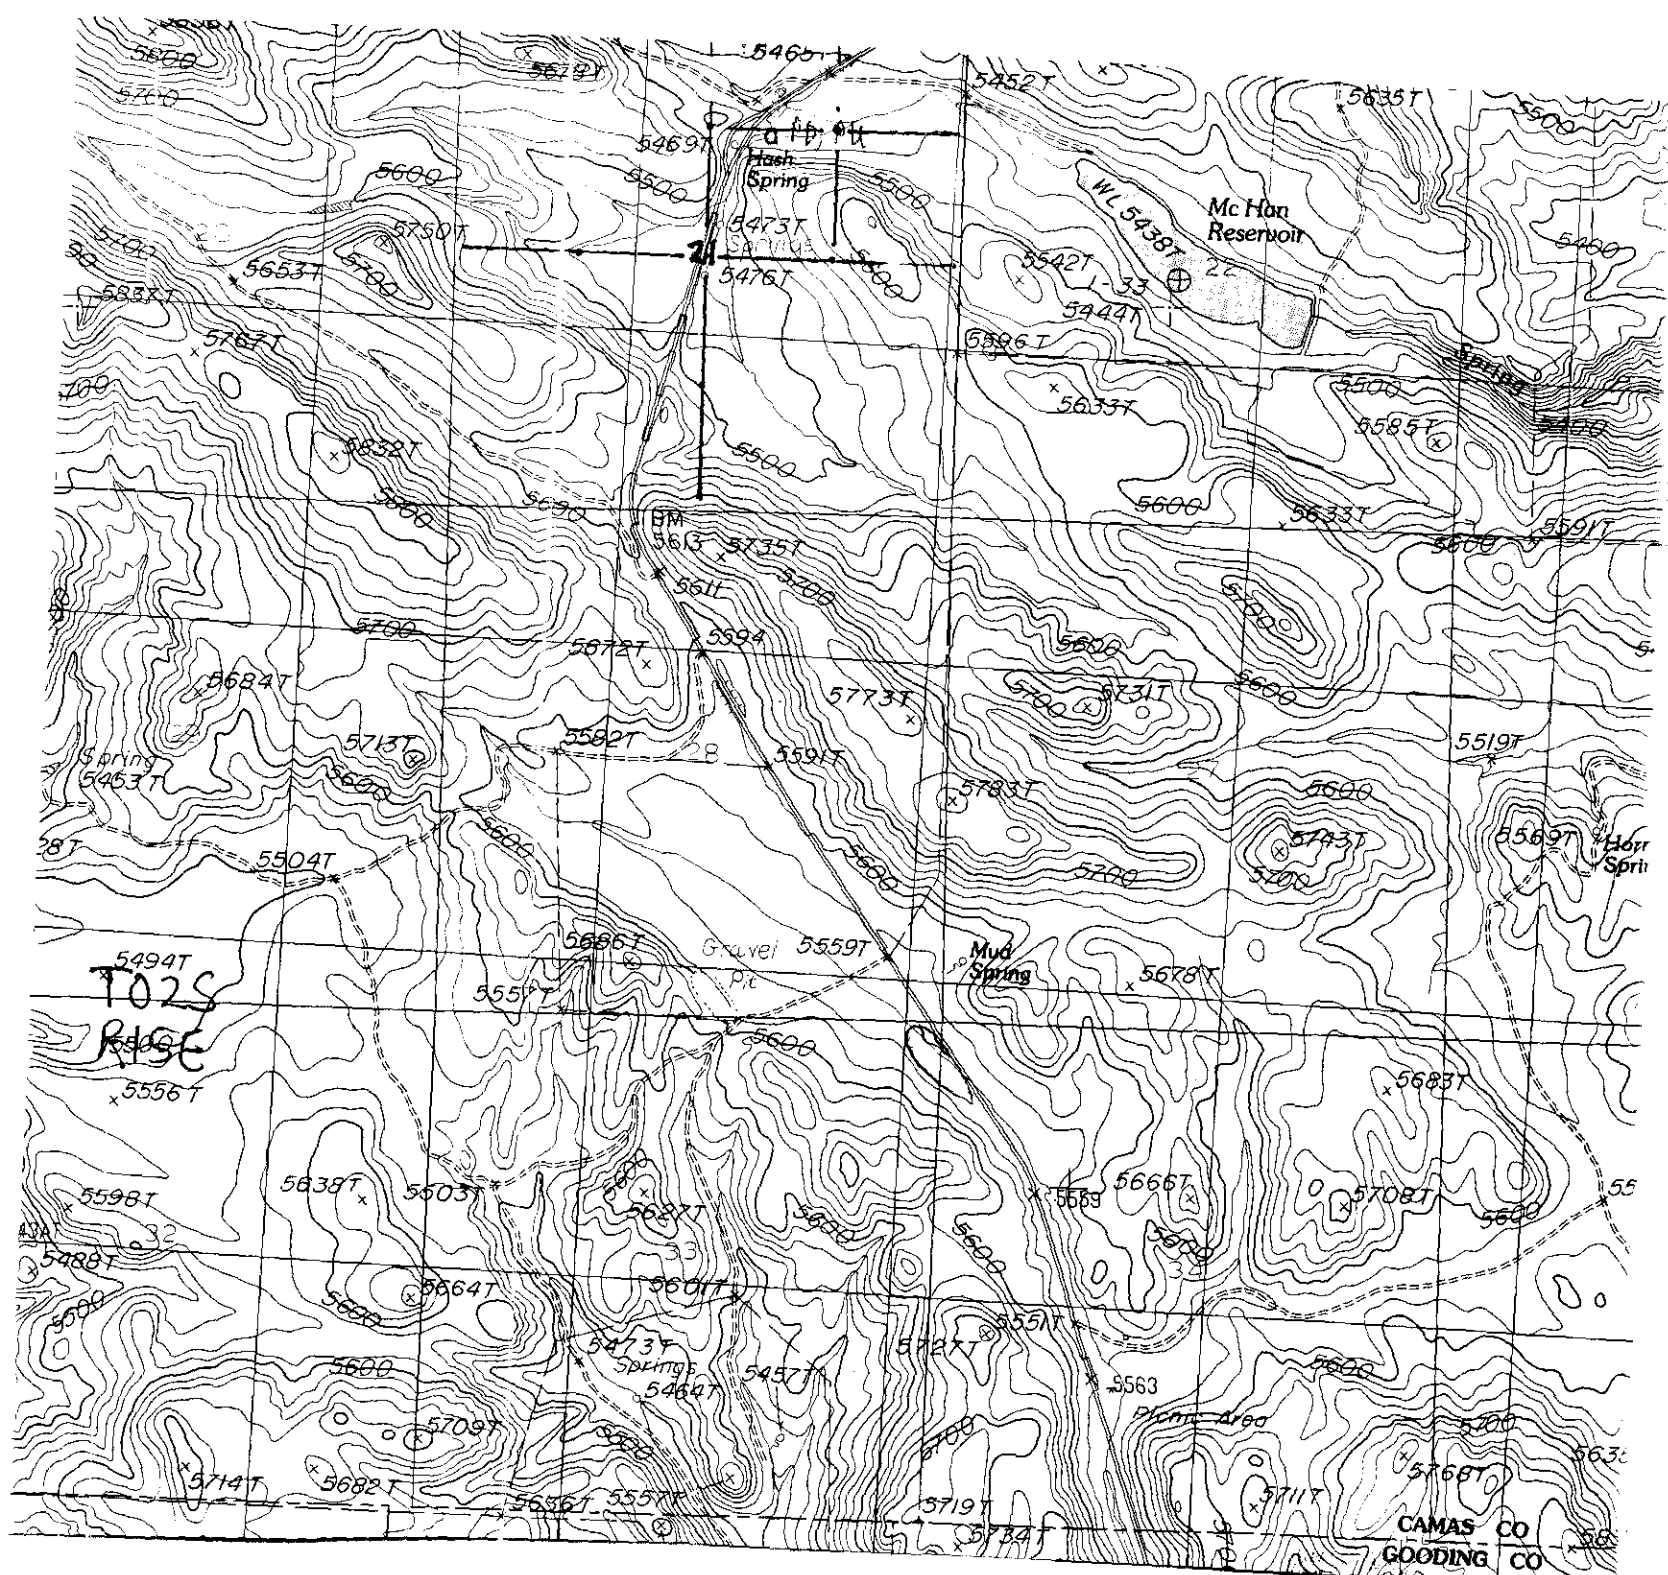

11. a. Who owns the property at the point of diversion? Orie S. & Alonzo B. Leavell

b. Who owns the land to be irrigated or place of use? Orie S. & Alonzo B. Leavell

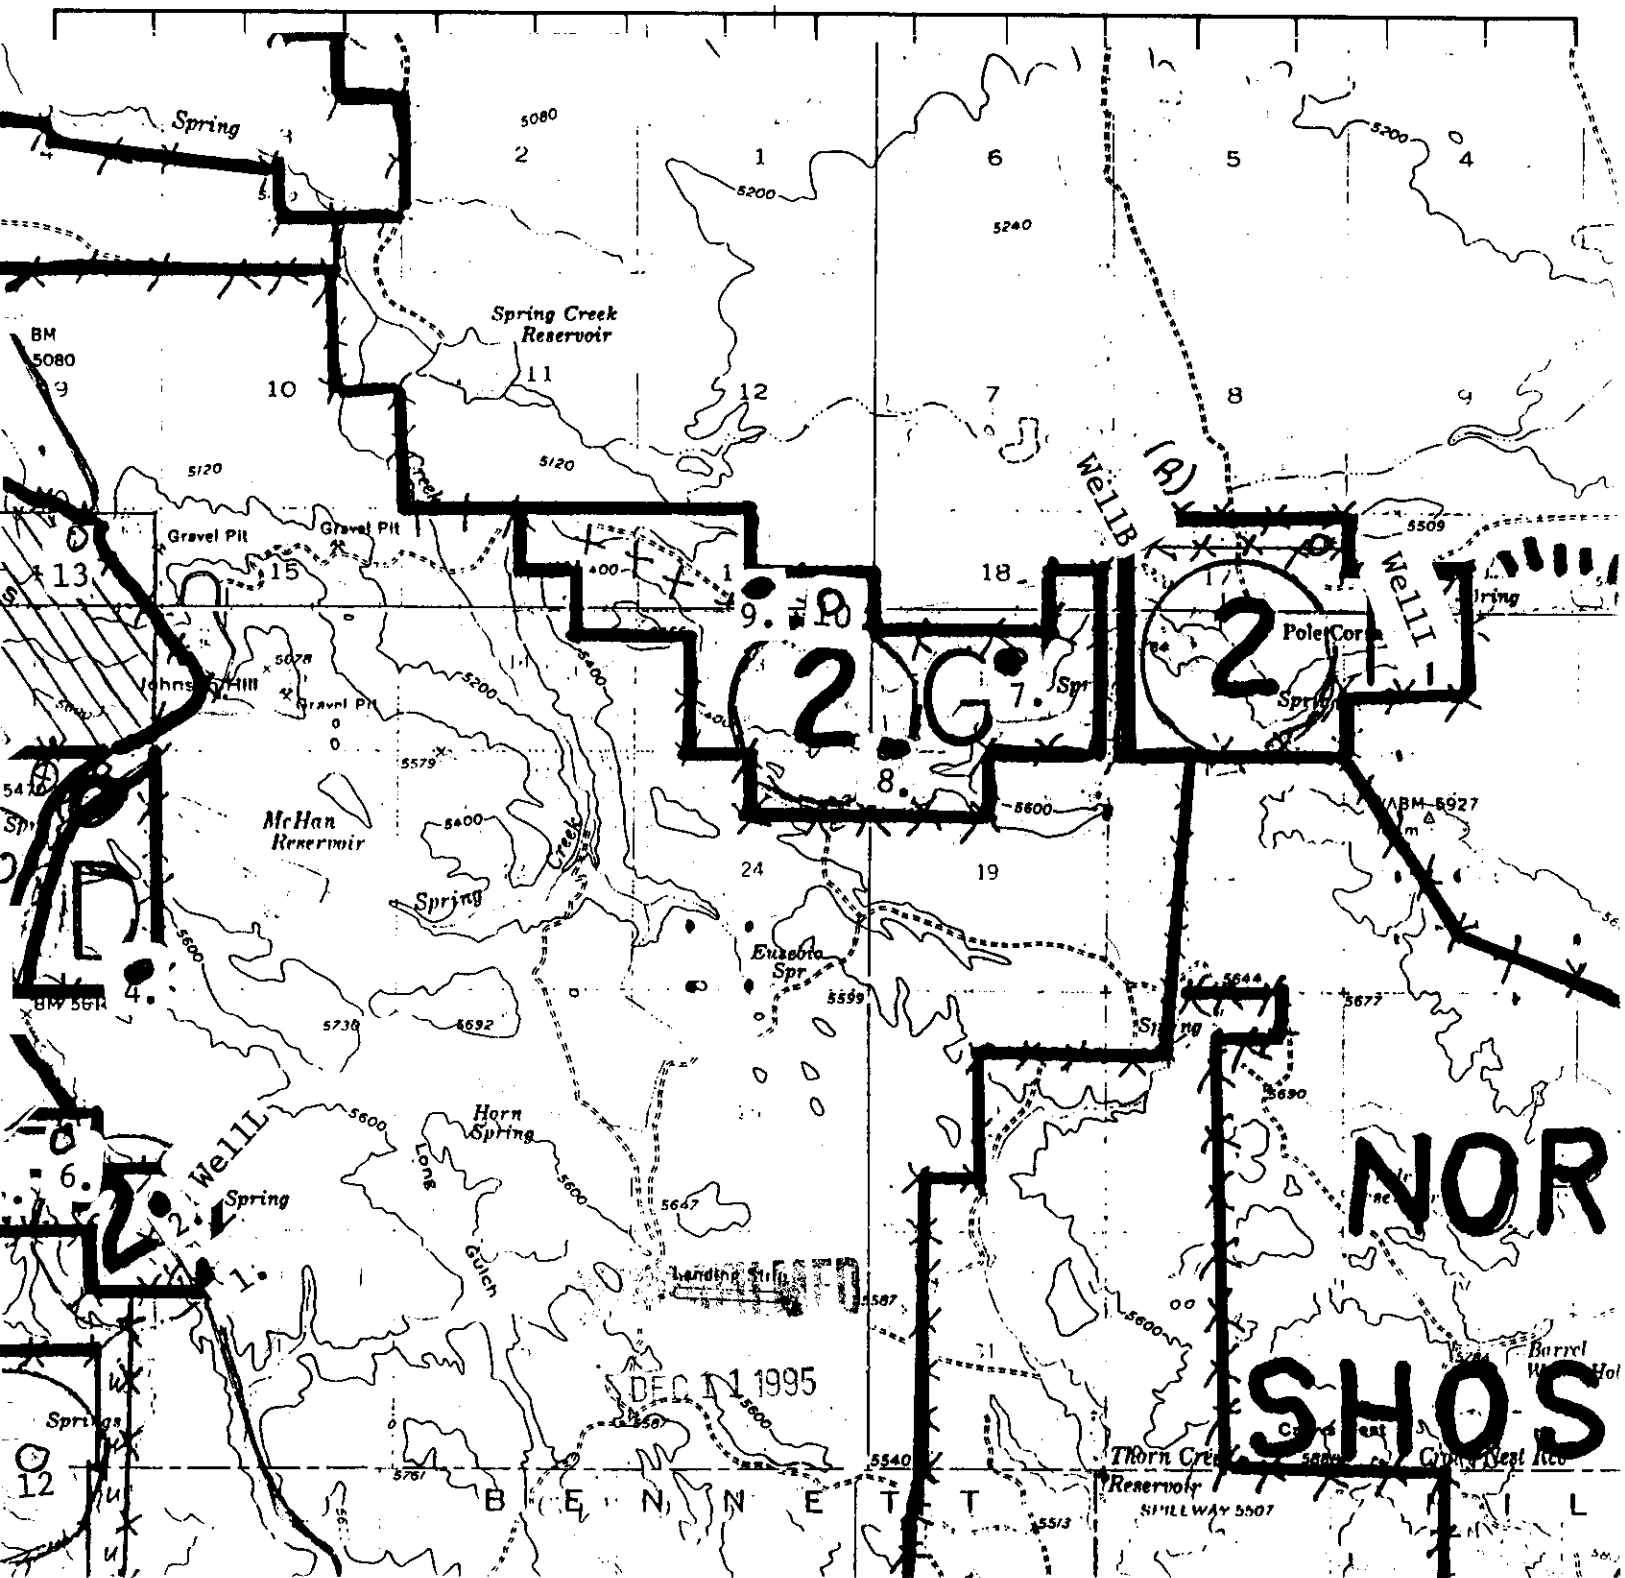

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing. N/A

12. Remarks: Subject property and adjoining range rights have been acquired by applicants in recent years. Up to 3000 head of cattle has been seasonally grazed in the are of subject water for the past 50 plus years. The total animal unit grazing (Stock Water consumption) is not being changed; however the period of use is shortened, thus a larger number of cattle utilizes the same grazing (stock water) for a shorter period of time which necessitates more accessible stock water for the shorter grazing period.

DEC 11 1995

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

RE: Change of Ownership for Water Right Permits 37-8770, 71, 72, 73, 74, 75, 76, 77

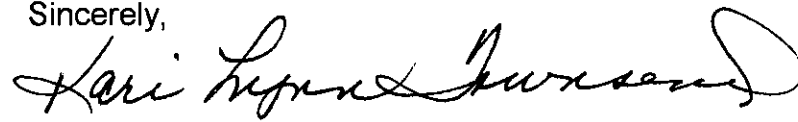

Dear Water Right Holder(s):

The department acknowledges receipt of correspondence changing ownership of the above referenced water rights to you. The department has modified its records to reflect the changes in ownership and has enclosed computer-generated reports for your records.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact this office if you have any questions regarding this matter.

Sincerely,

for Jeff Peppersack, Manager
Water Right Permits Section

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08770

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the **SOUTHERN** Regional Office in Twin Falls, at (208)736-3033.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 37-08770

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1996. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit Nos. 37-08770, 08771, 08772, 08773, 08774, 08775, 08776, 08777

Dear Permit Holders:

I have returned copies of the Proof of Beneficial Use Statements you submitted in connection with the above referenced water rights. The proof forms are not acceptable until they are accompanied by the appropriate license examination fee.

The Department has determined, from pertinent sections of the Idaho Code, that the permit holder must meet two requirements in order to be exempt from the license examination fee. They are:

1. The water right must use a **groundwater** (well) source, **and**;
2. The rate of diversion must be .04 cfs or 4.0 AF or less.

You do not meet requirement #1 since you divert water from surface water sources. Therefore, a license examination fee of \$50.00 applies to each of the permits.

You have until December 1, 1996, to submit the \$400.00 (\$50.00 x 8 permits) in license examination fees for the above referenced permits. **Please address your correspondence to my attention.**

Please contact me at (208)327-7900 if you have any questions regarding this matter.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

COMMENTS:

FROM: Allen Merritt *AM*

DATE: November 6, 1995

TO: Application for Permit Files: 37-08770, 37-08771, 37-08775
& 37-08776 in the name of Kip Gould

SUBJECT: Review and Recommendation

These applications are for development of small ponds for stockwater in the hills between Gooding and Fairfield. The applications were originally filed by Orie and Alonzo Leavell. They were protested by F&G and Jim & Marianne Kramer. Prior to conference the F&G withdrew their protests and also the applications were assigned to Kip & Ana Gould. Based on the conference and further discussions the applicants, Kip & Ana Gould and the protestants, Jim & Marianne Kramer entered into an agreement which resolved the remaining protest.

RECOMMENDATION

I recommend that the applications be approved subject to the following conditions:

- 1) These rights are subject to a private agreement between the applicant and the protestant.
- 2) These rights are subject to all prior rights and specifically rights 37-02251 and 37-02209.
- 3) In low water years when McHan Reservoir (37-02251) does not fill the water stored in the stock ponds may be required to be released.
- 4) The rights are for storage ponds that presently exist and these facilities shall not be expanded beyond present capacities.
- 5) Subject to control of watermaster district 37.

RE: Protested Applications for Permit Nos. 37-08770, 37-08771, 37-08772, 37-08775 & 37-08776

Dear Mr. & Mrs. Gould:

We have received a withdrawal of the protests filed by Jim & Marianne Kramer against approval of the Applications for Permit Nos. 37-08770, 37-08771, 37-08775 & 37-08776.

Since they were the only protestants to the four (4) Applications listed immediately above, the issue of the protest has been resolved. The Department is now prepared to proceed with the normal processing of those applications which includes regional review prior to being forwarded to our State Office.

Correspondence has also been sent to the BLM inquiring if they wish to pursue their protest of **Application for Permit No. 37-08772**; they are the only remaining protestant.

If you have any questions or if this office can be of further assistance, please feel free to contact us.

Very truly yours,

Allen D. Merritt, P.E.
Southern Region Manager

37-08776 (Gould)

Dear Mr. & Mrs. Kramer:

This office acknowledges receipt of the withdrawal of your protest against the above referenced applications.

Since you were the only protestant, the issue of the protest has been resolved and the Department is now prepared to proceed with the normal processing of the applications which includes regional review prior to being forwarded to our State Office.

The Department will continue review of the applications without further contact with you unless information is requested.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Allen D. Merritt, P.E.
Southern Region Manager

RECEIVED
DEC 11 1995

October 9, 1995

To Whom It May Concern,

Jimmy D. and Marianne Kramer have agreed to withdraw their formal objection to the application for permits 37-08778, 37-08779, 37-0780 and 37-0781 for the diversion of water from unnamed streams for stock water.

The permits 37-08778 through 37-0781 do not divert water from McHan Reservoir which is used for irrigation and recorded under license #37-02251. West Spring Creek is filed under State of Idaho License and Certificate for Water Rights #8804 for 5 cfs water. Priority date April 13, 1914 from West Spring Creek. This was all claimed September 25, 1989 under the General Adjudication of Rights to the use of water from the Snake River Basin Water System Identification #A37-02251. These unnamed streams and Hash Springs all drain into West Spring Creek and into McHan Reservoir which is based on claim #37-02251 and #37-02209. It also records the storage developed by the construction of McHan Reservoir under license #37-02251 and is referenced in the original permit and file.

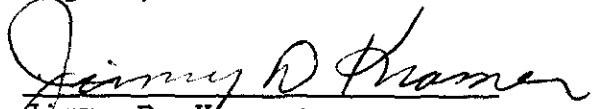

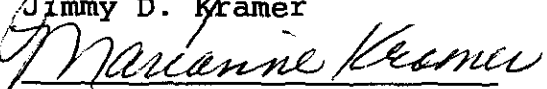

Jimmy D. and Marianne further withdraw their protest to applications for permits 37-08770, 37-08771, 37-08775 and 37-08776. In consideration Alonzo LeaVell, Kip and Anna Gould agree to the following:

1. Agree to never enlarge the present water holding facilities at these four water holding sites.
2. Agree to only use the water held for stock water.
3. Agree to release water in the future if ever needed should McHan Reservoir not fill.
4. Agree that Jim Kramer's water rights be listed on their application where it says subject to all prior water right.

These are the suggestions discussed at the pre-hearing conference held in the Gooding City Hall multi-purpose room at 308 5th Ave. W. in Gooding, Idaho held at 10:00 a.m. on September 19, 1995.

TO: FILES 37-08770 THRU 08772, 08775, 08776, 08778 THRU 08781

SUBJECT: PRE-HEARING CONFERENCE

On 9/19/95 I conducted a pre-hearing conference regarding the above described applications. All were protested by Mr. & Mrs. Jim Kramer except 08772 which is protested by BLM. The applications are in the name of LeVell or Gould. Lonnie LeVell, Kip Gould, and Mr. & Mrs. Kramer were at the conference. BLM did not show up for the conference.

The Kramer issue was interference with his irrigation rights in McHan Reservoir which he owns and operates. Early in the discussion it was determined that applications 37-08778 thru 08781 would not affect McHan Reservoir so the Kramers withdrew their protests for these applications. The remainder of the conference dealt with 37-08770, 08771, 08775 & 08776 which are located above McHan Reservoir and could in theory interfere with the storage rights. The Kramer position was that they wished to protect their water rights but were open to "leasing" the applicant water. I told them that to lease water it may involve the need for a transfer and change of the Kramer water right. They didn't seem to like that. I told them maybe it would more correctly be an agreement or a settlement that could be made where Kramer's would agree not to make a call on draining junior water rights. Gould's position was that the number of cattle above the reservoir was not going to be increased and they are presently drinking water in the streams now so there would not be an increased burden on the system so Kramer's rights would not be injured. I told them that to add storage to natural flow rights could in some years injure the senior reservoir right and then in other years probably not cause an injury if the reservoir filled and spilled water or if the stock ponds filled from water that would not normally get to McHan Reservoir. They discussed the type of lease Kramer had in mind and he indicated that \$50/year might be reasonable but money was not the issue. Gould didn't like the idea of paying money which might set a precedent. They then discussed possibility of agreement to allow access thru Gould property for Kramer.

I told them that if an agreement of sorts could not be worked out we needed to discuss setting a hearing. Kramer thought that they could work something out and didn't want to go to hearing. I instructed that they continue to negotiate and come up with something by Oct. 15th or I would set a hearing.

We discussed the matter of assignment of 37-08773 & 08774 from LeVell to Gould. The form has been filed but fees (\$50 total) had not been paid. Mr. Gould indicated that he paid a \$50 fee for amending and re-advertising 37-08772. It was determined that re-advertising was not necessary since the amendment was reducing the p/d & p/u and other changes kept the elements in the same 40 acre

RECORDED

SEP 21 1995

tracts that was originally advertised. Since no advertising was done we discussed applying the re-advertising fee to the assignments.

After the conference I stopped at BLM to inquire why they didn't attend the conference. They were in the middle of an office move and the guy assigned forgot. I left a copy of the amended application that supposed to change the location off of BLM which may allow them to withdraw their protest.

NOTICE OF
PRE-HEARING CONFERENCE

ORIE AND/OR ALONZO LEA VELL,
Applicants

KIP AND ANNA GOULD,
Assignee in part

JIM KRAMER,
BUREAU OF LAND MANAGEMENT,
Protestants

On January 21, 1992, Orie &/or Alonzo Lea Vell, applicant, filed with the Department of Water Resources applications 37-08770 thru 37-08781 to appropriate the public waters of the State of Idaho. Idaho Dept. of Fish and Game protested all applications but later withdrew all protests. Jim Kramer protested 37-08770, 37-08771, 37-08775, 37-08776, 37-08778 thru 37-08781. BLM protested 37-08772. Applications 37-08770 thru 37-08772 and 37-08775 thru 37-08777 have been assigned to Kip and Anna Gould. Applications 37-08773 and 37-08774 are pending assignment to Kip and Anna Gould.

The Department has set the matter of protests for a joint conference to be held on **Tuesday, September 19th, 1995, at 10:00 am in the Gooding City Hall multipurpose room at 308 5th Ave. W., Gooding, ID.**

The purpose of the conference is to formulate and simplify the issues, obtain admissions of fact and of documents which will avoid unnecessary proof, arrange for the exchange of proposed exhibits or prepared expert testimony prior to the hearing, limit the number of witnesses, consolidate the examination of witnesses, and advise the parties of the procedure which will be followed at any subsequent hearing.

The conference will be held in accordance with Chapter 2, Title 42, of the Idaho Code and the adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded to all parties to respond and present evidence and argument on all issues involved.

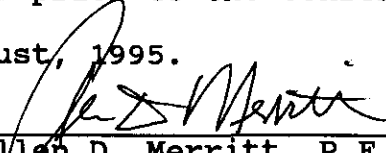

The conference will be conducted in a facility which meets the

CONFERENCE AND HEARING PROCEDURE

APPLICATION FOR PERMIT ISSUES

Section 42-203A, Idaho Code, requires the department to consider the following issues in connection with an application for permit:

1. Will the proposed appropriation injure other water rights?
2. Is the water supply sufficient for the purpose for which it is sought to be appropriated?
3. Was the application made in good faith or for delay or speculative purposes?
4. Does the applicant have sufficient financial resources with which to complete the proposed project?
5. Is the proposed appropriation in the local public interest, which is defined as the affairs of the people in the area directly affected by the proposed use?
6. Is the proposed use contrary to conservation of water resources within the state of Idaho?

BURDEN OF PROOF

The applicant has the initial burden of proof for issues 1, 2, 3, 4, and 6 above and must provide evidence for the department to evaluate these criteria. The initial burden of proof on issue 5 above lies with both the applicant and protestant as to factors of which they are most knowledgeable and cognizant. The applicant has the ultimate burden of persuasion, however, for this issue.

PROCEDURE

The department generally conducts an informal conference with the parties to determine the issues and to try to settle a protested matter before a hearing is scheduled. If a hearing is held the department will issue a written decision based on the hearing record.

CONFERENCE

The purpose of a pre-hearing conference is to provide the opportunity for the parties and the department to familiarize themselves with a contested matter and to attempt to resolve the matter. At the conference, the department may also formulate and simplify the issues, identify documents to avoid unnecessary proof, exchange proposed exhibits or prepared testimony, limit witnesses, discuss settlement or make settlement offers, schedule hearings, establish procedure at hearing and address other matters that may expedite orderly conduct and disposition of the proceeding or its settlement. The department may issue a "pre-conference statement order" which requires response to the inquiries.

HEARING

The department will tape record the hearing. Copies of a hearing tape are available upon request and the payment of the cost of reproducing the tape. The hearing likely will be conducted by a hearing officer appointed by the Director rather than by the Director himself. If so, the hearing officer will prepare a recommended order for the Director's consideration. Parties can file exceptions to a recommended order, briefs in support of the exceptions or may request oral argument. Parties may seek judicial review of any final order issued by the Director. Parties may by written stipulation waive the right to a recommended order, particularly when a shortened decision process is desirable or necessary. Such a waiver does not eliminate any rights of the parties in connection with the final order of the Director and judicial review of the order.

EXHIBITS

A party who plans to offer an exhibit as part of the hearing record must provide a copy of the proposed exhibit to the parties and to the hearing officer. As part of the conference a date may be set by which exchange of exhibits and witness lists must occur.

EFFECT OF FAILURE TO APPEAR AT A CONFERENCE OR HEARING

Failure to appear at the time and place set for a conference or hearing by the applicant or protestant(s) may allow the department to dismiss without prejudice the protest(s) or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing party.

AMERICANS WITH DISABILITIES ACT

Any hearing scheduled will be conducted in a facility which meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the hearing, please advise the department within (10) days prior to the hearing.

RE: Water Rights Applications 37-08770 thru 37-08781 (Lea Vell)

Dear Allen,

After receiving information from Mr. Kip Gould, who now owns the property on which water rights 37-08770 thru 37-08777 are applied, we have concluded that continuing our protest of the above referenced applications will have little benefit to fish and wildlife. Therefore, we withdraw our protest of water right applications 37-08770 thru 37-08781.

We would, however, like to request a condition be included on the approval of these permits which states, "flow from the identified spring sources will not be restricted or regulated in any way as to reduce the availability of water to wildlife".

Thanks for your cooperation in resolving this matter.

Sincerely,

Carl H. Nellis

RE: PROTESTED APPLICATIONS FOR PERMIT NOS. 37-08770 through 37-08781

Gentlemen:

The department of Water Resources has recently reviewed protested applications which are pending in department files to determine what further action is appropriate in connection with the applications.

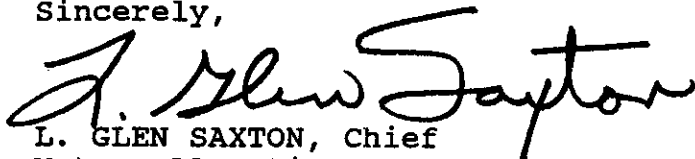

Our files show that on January 21, 1992, you filed the above referenced twelve (12) applications proposing the storage of small amounts of surface water for stockwatering purposes in Camas County, Idaho. The applications were subsequently protested by other water users in the area.

The last correspondence in the files is dated April 13, 1992 and asks that you contact the protestants to determine the nature of the protests and attempt to resolve them.

The purpose of this letter is to inquire of the status of the applications, of your efforts to work out the protests and to determine the need of a conference or hearing in connection with the applications.

Please provide a written update of the status of the applications to the department within thirty (30) days. The department will then attempt to determine further action which is appropriate.

Sincerely,

L. GLEN SAXTON, Chief
Water Allocation Bureau

RE: APPLICATIONS FOR PERMIT NOS. 37-08770-08781 (inclusive)

Gentlemen:

Enclosed are copies of protests filed against the above referenced applications.

The Department suggests you contact the protestant(s) directly to determine the exact nature of the protest(s) and, if possible, to resolve the matter without action by the Department.

Correspondence in our file indicates that you have received and reviewed copies of protests filed against the approval of the above referenced application. To date our Department has not received a written withdrawal of the protest; therefore, it appears that action by the Department is necessary to resolve the matter.

The attachment to this letter describes the issues which the Department must consider in taking action on an application. It also gives a brief description of the conference and hearing procedure followed by the Department in resolving protested applications.

If you have any questions or if this office can be of further assistance, please feel free to contact us.

Very truly yours,

Loren O. Holmes, P.E.
Southern Region Manager

LH:MB
Enclosure(s)

DEC 11 1995

Attachment to letter dated 13-Apr-1992

To all parties in the matter of
Applications for permit Nos. 37-08770-08781 (inclusive)
in the name of ORIE S. &/OR ALONZO B. LEA VELL

PROTESTED APPLICATION FOR PERMIT:
ISSUES CONSIDERED, CONFERENCE PROCEDURE

In processing all applications for permit, the department must consider the following issues, which are specified in Section 42-203A of the IDAHO CODE:

- 1) Will the proposed use reduce the quantity of water under existing rights?
- 2) Is the proposed water supply insufficient for the purposes intended?
- 3) Is the application made in good faith or for delay or speculative purposes?
- 4) Has the applicant sufficient financial resources with which to complete the proposed project?
- 5) Will the proposed use conflict with the local public interest?
- 6) Is the proposed use contrary to conservation of water resources within the state of Idaho?

When an application is protested, the statute requires the department to conduct a hearing to create a record of the evidence considered in approving or denying the application.

Normally, an informal pre-hearing conference is held prior to the actual hearing. The objectives of the informal conference are as follows:

- 1) To familiarize all parties with the application and the issues being raised.
- 2) To provide a forum for discussion and possible resolution of the matter among the parties.
- 3) To provide information to the parties about the department's hearing procedure in deciding protested applications.
- 4) To discuss scheduling of the matter for hearing.

Notices setting the time and place for the conference will be sent by certified mail to all parties at least 10 days prior to the conference. This is the same procedure specified by law for serving notice of hearings.

Conferences are conducted under Rules for Practice and Procedure adopted under the Idaho Administrative Procedures Act.

RE: Application #'s 37-08770-81, Orie S. Lea Vell and Alonzo B. Lea Vell

Dear Loren:

We are concerned these applications for stream and spring water diversions would affect surface flows into Spring Creek Reservoir, Mchan Reservoir and Schooler Creek and negatively affect wildlife values in this area. For this reason, we are protesting the applications. If further review of the full application and additional information supplied by the applicant demonstrates that these diversions of water will not be detrimental to wildlife values, we will withdraw our protest.

We would also appreciate it if you would send us a copy of these applications.

Thank you for the opportunity to comment.

Sincerely,

Carl H. Nellis

DEF 1 1992

RECEIVED

MAR 06 1992

Department of Water Resources
Southern Region Office

March 6, 1992

Dear Department of Water Resources,

We are writing this letter of protest as required by law concerning Legal Notice Numbers, 37-08770, 37-08771, 37-08775, 37-08776, 37-08778, 37-08779, 37-08780, and 37-08781 for diversion of water from unnamed streams and water from Hash Springs for stock water. This spring formerly was called West Spring which runs directly into McHan Reservoir which is used for irrigation and recorded under License # 37-02251.

West Spring Creek is filed under State of Idaho License and Certificate for Water Rights # 8804 for 5 cfs water. Priority date April 13, 1914 from West Spring Creek. This was all claimed September 25, 1989 under the General Adjudication of Rights to the use of water from the Snake River Basin Water System Identification # A37-02251. These unnamed streams and Hash Springs all drain into West Spring Creek and into McHan Reservoir which is based on claim 37-02251 and 37-02209. It also records the storage developed by the construction of McHan Reservoir under license # 37-02251 and is referenced in the original permit and file.

The reason for this letter of protest is that this water has been filed on and has been in use for irrigation purposes since 1914 and we would not want to relinquish our rights for this useage.

Sincerely,

Jimmy D. Kramer

TESTING THE WATERS

February 26, 1992

BOISE, ID -- The University of Idaho has completed a draft report describing the results of an intensive study of water quality in the middle Snake River between Milner Dam and King Hill.

Researcher Charles Brockway of the university's Kimberly Research and Extension Center said Idahoans "need to recognize that the river in that reach has a water quality problem -- primarily an aquatic weed problem."

One of the causes, said Brockway, is prolonged drought. "With flows at Kimberly near the head of the reach at 25 percent of normal, it's not surprising that we have water quality and vegetation problems," he said.

The other contributor is sediment, organic solids and nutrients from a variety of sources.

The study, funded by the state Division of Environmental Quality, provides concurrent water quality data for 42 in-flow sources and 13 in-stream sites along the 95-mile stretch downstream from Milner Dam. Brockway said it will be used to develop a better understanding of water quality impacts in the reach and as input data for a river water quality model.

The year long study confirms that sediment bars supporting undesirable populations of aquatic weeds below Milner Dam are caused by long-term sediment deposits and low flows. "That's at least 13,000 tons of sediment accumulating in the reach during the one-year period," Brockway said.

He noted that the sediment comes primarily from tributaries and irrigation return flows directly into the river.

Because phosphorus attaches to soil particles, irrigated field also contributed a large part to the phosphorus loads entering the middle Snake during the course of the study -- from July 1990 to July 1991 -- Brockway said.

In addition, the study documents nitrate levels from fish hatchery effluent, irrigation return flows and tributaries. The concentrations were slightly higher at fish hatcheries than in irrigation return flows, Brockway said, but that could be partially explained by measurable

hatchery effluent. Water quality data will be collected at 16 springs entering the river, including five supplying fish hatcheries.

For two-week periods, daily samples will also be taken at four sites, including two irrigation return flow sites and two fish hatcheries. Clarence Robison, a University of Idaho research associate in water resources, said the results of the daily samples will be compared with those of the weekly and biweekly samples to determine if the less frequent samples adequately represent daily nutrient and sediment loads.

In the first phase of the study, the average nitrate concentration of measured fish hatchery effluent entering the Snake River averaged 1.3 milligrams per liter, compared with 1.2 for the measured irrigation return flows, 2.0 for tributaries and 1.5 for the river itself. Ten milligrams per liter of nitrate nitrogen has been established as the maximum drinking water standard.

While south side irrigation return flows include significant amounts of groundwater seepage, north side return flows contain only surface water, Brockway said. Because groundwater contains more nitrates than surface water, irrigation return flows from the south side of the river show higher concentrations of nitrates than irrigation return flows from the north side.

Average total phosphorus concentrations were .24 milligrams per liter in irrigation returns flows, .10 in measured fish hatchery effluent and .08 in the river itself.

Phosphates are not considered a human health threat but do contribute to vegetation growth in streams. Joan Meitl, senior water quality analyst for the Idaho Division of Environmental Quality, said the Environmental Protection Agency has set recommended standards for total phosphorus, based on impacts on aquatic systems, at .05 to .10 milligrams per liter.

The Id. Div. of Envir. Quality provided more than \$83,000 in financial support for the study. Regional administrator Tim Litke of DEQ's Twin Falls office and senior water quality analyst

Re: Applications for Permit Nos. 37-08770 thru 37-08781, inclusive

Gentlemen:

The Department of Water Resources acknowledges receipt of your water right applications for permit. The applications have been assigned the above referenced identification numbers. Please refer to these numbers in all further correspondence, copies of the applications are enclosed for your information.

This office will be advertising the applications in the Snowshoe on 3/4 & 3/11/92. A period of ten days following the second publication will be allowed for the submittal of protests.

If an application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If an application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent
