Water Right License

WATER RIGHT NO. 37-08703

CONDITIONS OF APPROVAL

1. Rights 37-00363F and 37-08703 when combined shall not exceed a total diversion rate of 0.18 cfs.
2. Domestic use is for 1 home and does not include lawn, garden, landscape, or other types of irrigation.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed and sealed this 29TH day of MARCH, 2001.

Acting for

KARL J. DREHER
Director

MICROFILMED

MAR 29 2001

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT	)	ORDER GRANTING
NO. 37-08703 IN THE NAME OF	)	RECOMMENDATION TO REMOVE
FRANKLIN L &/OR DARLENE	)	MEASURING DEVICE REQUIREMENT
<u>BRAMON</u>	)	

This matter having come before the Department of Water Resources (Department) as a recommendation to remove a measuring device requirement, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On January 3, 1992, the Department issued Permit 37-08703 (permit) to Franklin L. and/or Darlene Bramon with a condition of approval requiring permanent measuring devices be installed in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.
2. On September 9, 1998, C. E. Brockway (Brockway), a certified field examiner, conducted a field examination of the beneficial use developed under this permit and found that measuring devices were not installed on the system.
3. Brockway has recommended in his field examination that the measuring device condition be removed from this right, during the licensing process, since the ponds have been fully lined with PVC liner and there is very little seepage from the ponds. Brockway also states in his examination that the inflow-outflow difference could not be reliably measured with typical devices.

CONCLUSIONS OF LAW

1. Beneficial Use Examination Rule 35.02.d. (IDAPA 37.03.02.35.02.d.) provides for the waiver of a measuring device requirement by the Department.
2. The measuring device requirement is not necessary for this water right at this time.

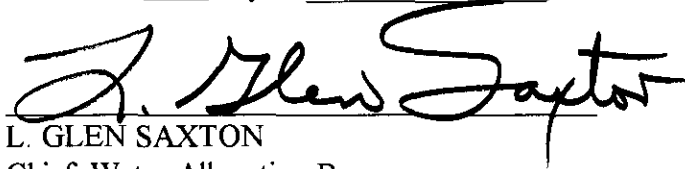

MICROFILMED

MAR 29 2001

ORDER

The condition of approval requiring "permanent measuring devices be installed in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured" for the permit is **WAIVED**.

Dated this 28th day of March, 2001.

RE: License No. 37-8703 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet. Also enclosed is an Order Granting Recommendation to Remove Measuring Device Requirement.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Department of Water Resources

Overview

Water right permit 37-08703 is a groundwater right authorizing the development of storage for aesthetic purposes and for fire protection. A total storage volume of 3.0 acre-feet is allowed, with a diversion to storage of 0.09 cfs. The right also allows 0.04 cfs for domestic purposes. The same well also provides water under 37-00363F. This right was a surface decree from the Big Wood River that was recently transferred to groundwater. It allows a diversion rate of 0.14 cfs, a diversion volume of 16.8 acre-feet and 4.8 acres of irrigation. This right will be regulated by the watermaster, and will only be available during those times when the surface water would have been available.

No condition on either right limits the total diversion rate allowed in combination, so the combined diversion rate when the irrigation right is active is $0.09 + 0.14 = 0.23$ cfs.

A field exam was conducted on September 9, 1998 to verify the use for both the permit and the transferred decree. The diversion system consists of an 8-inch well located in the SE1/4 SE1/4 Sec. 26, T. 02N., R. 18 E. The well pumps directly into an underground sprinkler system consisting of 9 stations designed for 70 gpm per station, according to the system designer, Webb Landscaping. The discharge line is 2-inch galvanized steel, expanding to 3-inch PVC Class 200 mainline. A control valve is located just downstream of the wellhead, followed by a brass double-check valve to prevent backflow.

Approximately 20 feet downstream of the well, a tee from the 3-inch mainline to a 1-1/2" electric valve diverts water to the first of two aesthetic ponds through a 1-1/2" poly pipe.

Aesthetic and fire storage under 37-08703

Two ponds have been constructed on the property. Both ponds are lined with PVC liner. Water is diverted to the north pond as described above and flows to the smaller south pond in a small aesthetic channel. A pump in the south pond recirculates water to the north pond. The dimensions of the ponds were measured, and the total surface area at full depth was calculated as 0.31 acres. The north pond has side slopes of approximately 2:1 and a maximum depth of 8.0 feet. The south pond has steep side slopes of approximately 1:1 and a maximum depth of 6.0 feet. Using this geometry, the maximum total volume of the ponds was calculated as 2.16 acre-feet (1.73 in the north pond, 0.43 in the south pond). The attached site plan shows the well and pond layout.

Irrigation under 37-00363F

An on-site delineation was made of the total irrigated area served by the underground system. Property corners were found using the platted subdivision map. The boundary

MICROFILMED

MAR 29 2001

RECEIVED
DEC 28 1998

Department of Water Resources

defining the irrigation was measured relative to known property lines and translated to the plat map. Using this scale drawing, the total gross irrigated area on the property was calculated as 4.8 acres. After subtracting the driveway and house footprint, the actual irrigated area is 4.3 acres, which is very close to the amount allowed under 37-00363F.

Discharge measurements

Measurement of the total discharge capacity of the well was made using a Peek Polysonics transit time ultrasonic meter. A portion of the 3-inch PVC mainline was uncovered so that the meter could be placed at least 10 diameters downstream of the transition from the 2-inch galvanized pipe. The meter was also placed at least 10 diameters upstream of any valve or other obstruction. The setup should provide accurate readings to within $\pm 2\%$.

The well pump was manually started and the nine sprinkler circuits were cycled. Each circuit remained active for at least two minutes so that a stable reading could be obtained. The measured flow rate per circuit ranged from 55 gpm to 71 gpm (0.12 cfs to 0.16 cfs), with an average of 68 gpm (0.15 cfs). The stable pumping level of the well was measured with an electric probe as 39.0 feet below ground surface. The static water level prior to pumping was measured as 23.0 feet below ground surface.

The well discharge was also measured with all sprinkler circuits off and the valve to the pond fully open. In this condition, the well delivered 83 gpm (0.18 cfs) to the pond.

Compliance with conditions

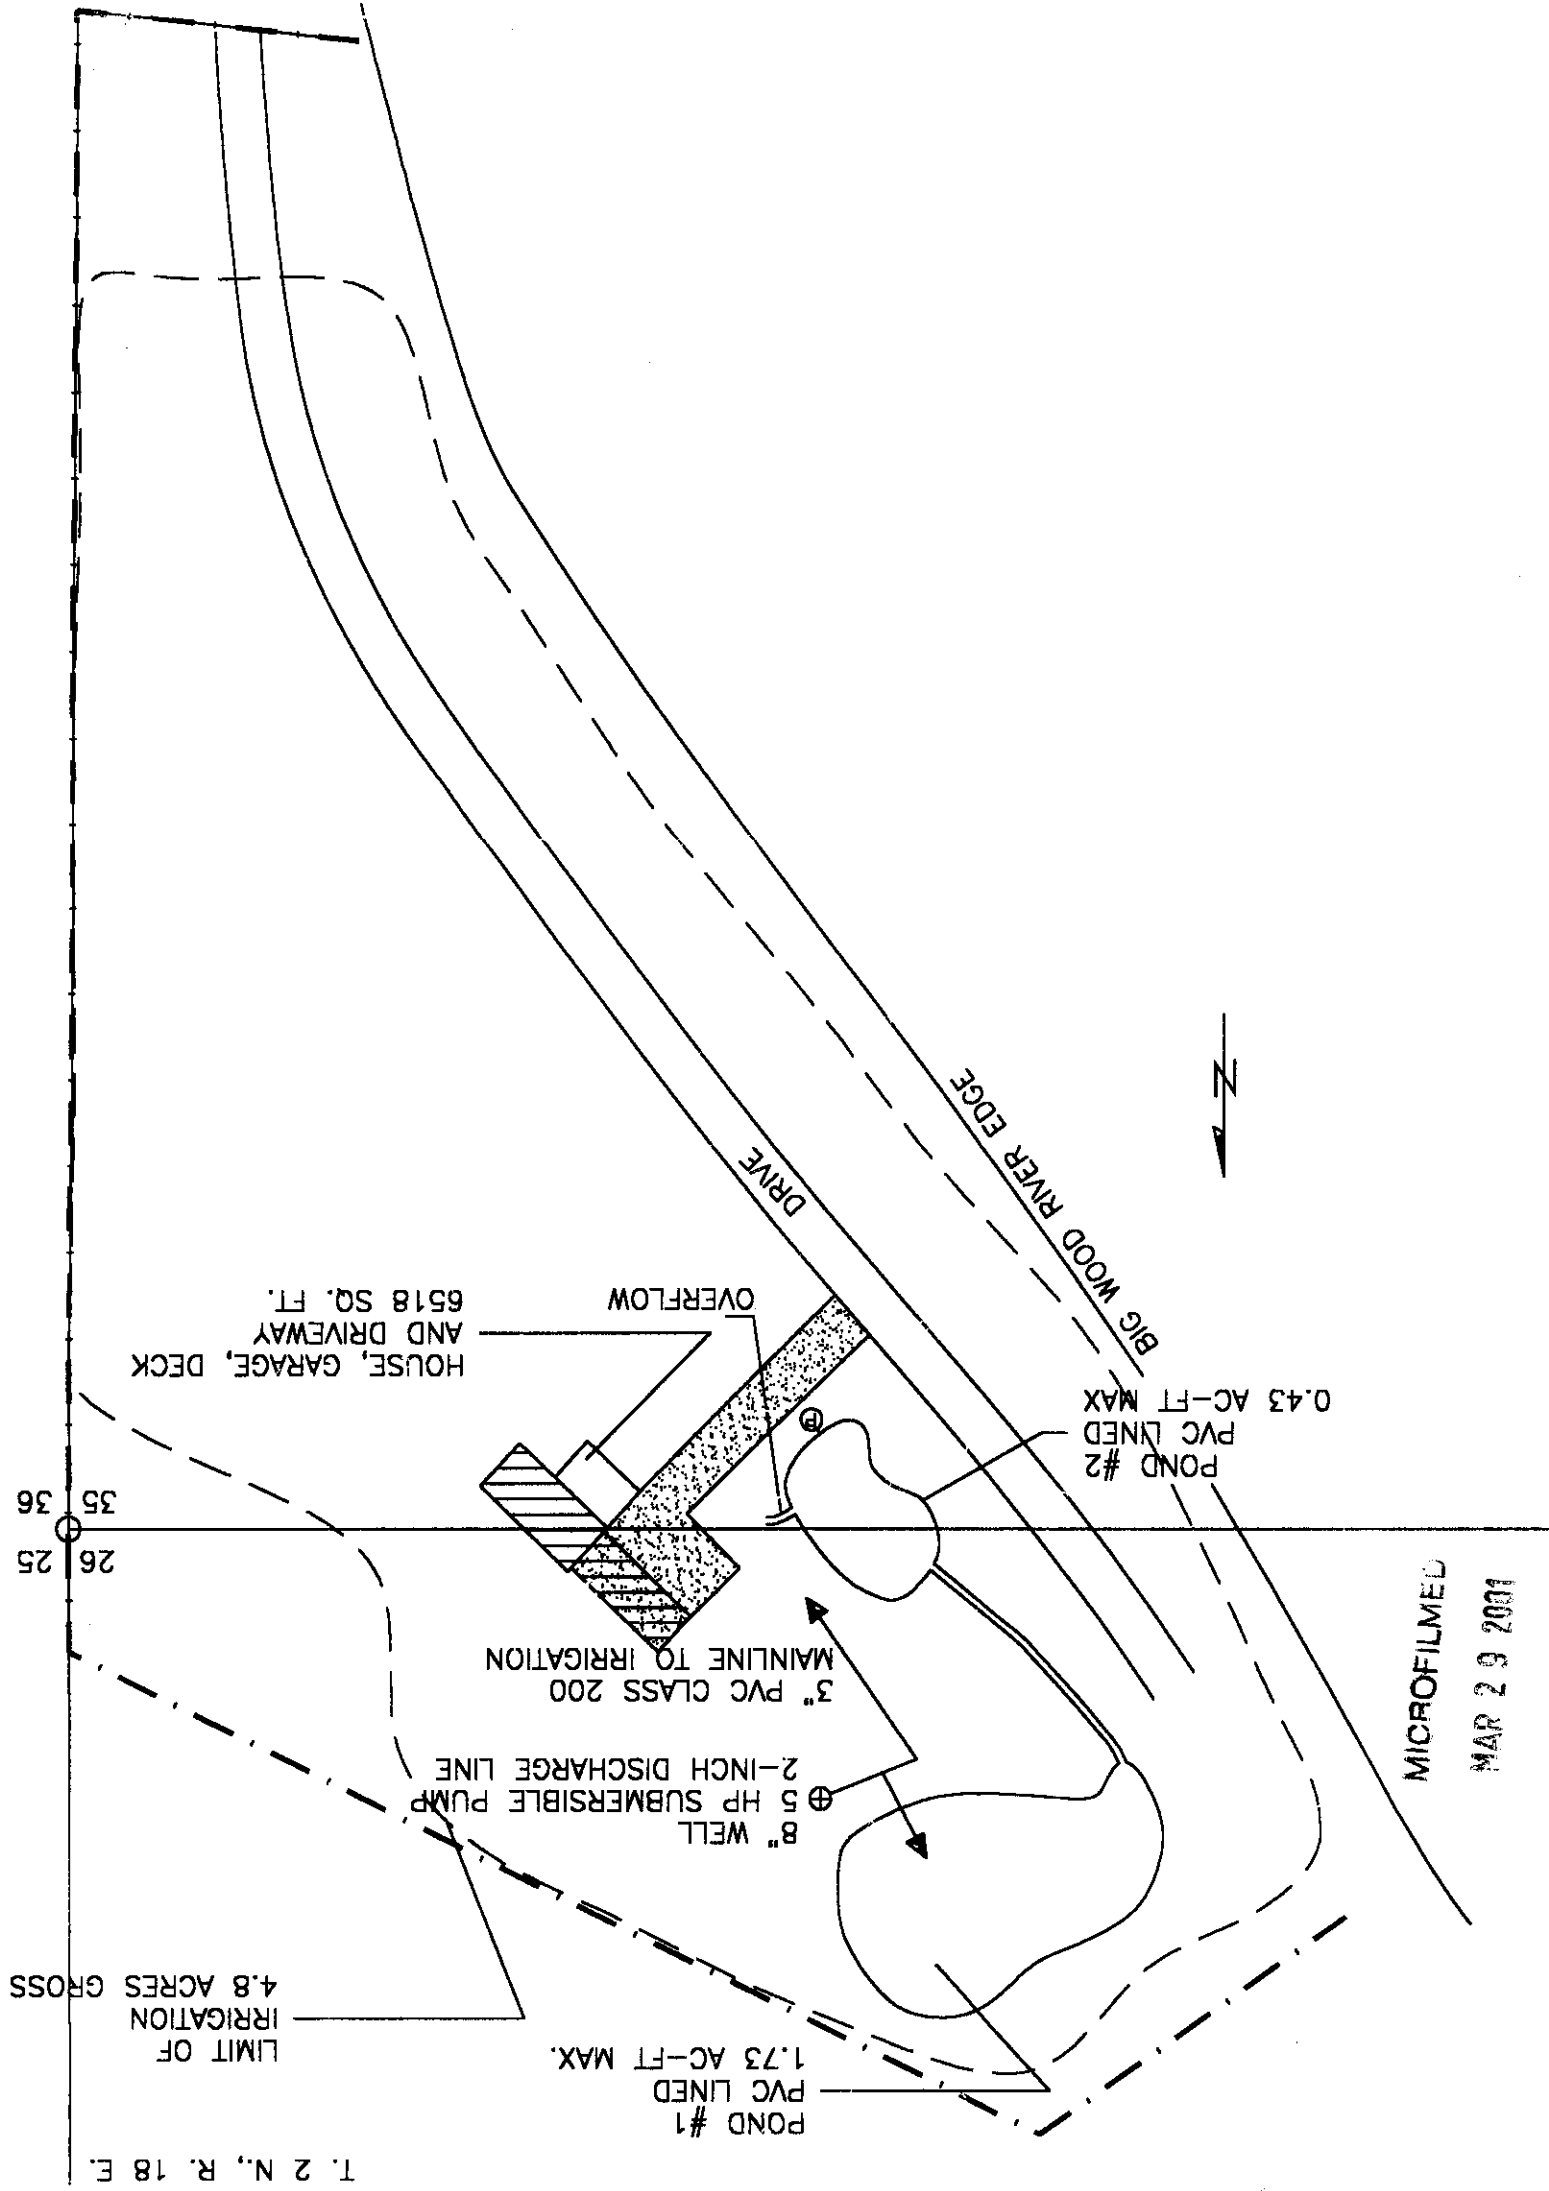

Condition No. 5 of the permit requires that permanent measuring devices be installed to measure the amount of water entering the ponds and the amount leaving the ponds. These devices have not been installed. Both ponds are fully lined with PVC liner, so that seepage is essentially zero. Maximum summertime evaporation from the ponds is estimated at 0.25 inches per day, or 0.00326 cfs (1.5 gpm) on the 0.31 acres of ponds. This inflow-outflow difference could not be reliably measured with typical devices installed in the field. Therefore, it is recommended that this condition be deleted in the licensing process.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08703

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form and field examination submitted for the above referenced permit. The next step in the process of developing a water right is for the department to review the field examination for licensing.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the review of the field examination, please contact Cindy Zimmerman at (208)327-7944.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 37-08703

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1999. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 37-08703

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time submitted in connection with the above referenced permit which extends the time within which to submit proof of beneficial use to **January 1, 1999**. Please note that the department has granted this extension based on governmental agency delay. It is important that you work diligently toward the completion of the development during the construction period allowed since the department **may not** be able to grant additional extensions in connection with this permit.

Section 42-248, Idaho Code, which became effective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact the department if you have any questions regarding this matter.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary, Water Allocation Bureau

Dear Permit Holder:

I have returned the Extension of Time Request you submitted in connection with the above referenced water right permit. Before the department can accept the form, it needs to be signed on the correct line, which I have hi-lighted.

Please sign the request, and return it to my attention within **(30) days** of receipt of this mailing.

If you have any questions regarding this matter, please contact me at (208)327-7953.

Sincerely,

A handwritten signature in cursive script that reads "Julie L. Yarbrough".

Subject: Time for Completion of Works-Franklin Bramon
Transfer No. 4527 for Water Right 37-00363F and 37-08703

Dear Jim:

On October 13, 1997, I wrote to you requesting an extension of time for completion of works on water right 37-00363F which was a transfer of surface rights to a well for irrigation on a lot near Bellevue on the Big Wood River. I had not heard from you relative to the request and subsequently a Proof Due Notice on the companion permit 37-08703 was received by Mr. and Mrs. Bramon. The companion permit is for storage for aesthetics and fire protection on the same lot. As you know, completion of works on both of these rights has been severely hampered by final decisions on flood plain studies by FEMA and the Corps of Engineers and by negotiations with the City of Bellevue relative to annexation..

As I indicated in my October 13, 1997 letter, reasonable progress has been made in securing the changes authorized by the transfer and the permit.. A well has been drilled and tested on the property and is ready for production to provide irrigation water. A small lined pond for short term irrigation storage has been constructed near the well. The volume of the pond is estimated to be 1.1 acre feet or somewhat less than the irrigation demand for one day during peak water use periods.

It is planned to install the sprinkler system for the authorized 4.8 acres allowed under the transfer and complete the pond and fire protection equipment. Scheduled completion is September 30, 1998. I am therefore requesting again that an extension of time for completion of works as a condition for the transferred water right 37-00363F be granted and an extension of time for the permit 37-08703 be granted.

I am enclosing a completed Request for Extension of Time for 37-08703 and a personal check #2678 from the account of Franklin L. and Darlene Bramon for \$50.00 for the fee.

Please let me know as soon as possible on the disposition of these requests.

Sincerely,

C. E. Brockway, P.E.

Subject: Time for Completion of Works-Franklin Bramon
Transfer No. 4527

Dear Jim:

Thank you for discussing the predicament which the Bramon's are experiencing on this transfer. This letter is to reiterate the situation and request additional time within which to complete the change authorized by the transfer.

As I indicated, the transfer authorized the use of a portion of a surface water right from the Big Wood River near Bellevue to a well for irrigation associated with subdivision lots. The Bramon's lots are adjacent to the Big Wood River in a reach which has been the subject of the recent FEMA flood plain study for Blaine County. Final determination of building sites and facilities has been pending the completion of that study by Michael Baker Company. That study is now complete and is or will be adopted by Blaine County.

In addition, the Bramons have been negotiating with the City of Bellevue for possible annexation of these lots to secure services and domestic water. Those negotiations have been unsuccessful so far.

Reasonable progress has been made in securing the changes authorized by the transfer. A well has been drilled and tested on the property and is ready for production to provide irrigation water. A small lined pond for short term irrigation storage has been constructed near the well. The volume of the pond is estimated to be 1.1 acre feet or somewhat less than the irrigation demand for one day during peak water use periods.

The owners are prepared to install the sprinkler system for the authorized 4.8 acres allowed under the transfer but will not be able to do so until next spring or summer. In behalf of the owners, I am therefore requesting additional time to complete the project. It is estimated that the project can be completed by September 30, 1998.

Sincerely,

C. E. Brockway

PROOF DUE NOTICE

RE: PERMIT NO. 37-08703

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1998.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

RE: Permit No. 37-08703

We hereby request a two (2) year extension of Beneficial Use for the above permit.

The Corps of Engineers began a Wood River Boundaries water study in the summer of 1993. The study was completed by the spring of 1994. This preliminary study was not given to the Blaine County Commissioners and the engineering firms of Blaine County until the spring of 1995.

Currently, the Corps of Engineers have rescinded that study and the old guidelines are once again in effect. A new completed study is anticipated by the fall of 1996 at which time the County will review and hold public hearings.

The property has been improved and developed as much as can be completed until the final determination of floodplain/floodway Boundaries is made. A well has been installed and a pond with liner was installed to conserve and hold water costing in excess of \$7,500. Also, a completed access road, tree removal and extensive engineering studies of the property have all been completed.

RECEIVED

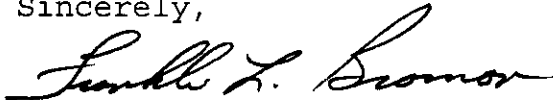

DEC 11 1995

Page 2
November 28, 1995

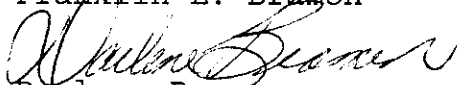

Until the Corps of Engineers completes the final floodway/floodplain report, we cannot determine where to locate structures for building and/or best use of property.

Please let us hear from you as soon as possible as we do not want to lose our Water Right.

Sincerely,

Franklin L. Bramon

Darlene Bramon

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 37-08703

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not

MICROFILMED

JAN 22 1992

diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

COMMENTS

MEMORANDUM

TO: Southern Region
FROM: Gary Spackman *Gary*
DATE: September 9, 1991

RE: Application for Permit to Appropriate Water No. 37-08703

On August 27, 1991, Darlene Bramon inquired about the status of application for permit no. 37-08703. After talking with Mary Baldwin, we determined that the application was being held in Southern Region because of the Big Wood River Ground Water Management Area designation. We also determined that a letter of inquiry being sent to all the applicants within the Big Wood River Ground Water Management Area would shortly be sent to the Bramons.

After talking to Darlene, I reviewed the database representation of the water right. I first noticed that all of the uses proposed, except the domestic use, have traditionally been viewed as non-consumptive uses of water. No irrigation component is listed with the domestic. I interpret the application to propose domestic use and irrigation uses not to exceed one-half acre. I do not know the size of the storage pond, although the application shows a volume of three acre-feet.

If Bramon can somehow compensate for evaporation losses from the pond, or show that evaporation losses are insignificant I think we can approve the application without further review.

RECEIVED

Department of Water Resources
Southern Region Office

September 9, 1991

Mr. Loren O. Holmes, P.E.
Southern Region Manager
State of Idaho
Department of Water Resources
222 Shoshone St. E.
Twin Falls, ID 83301

Dear Mr. Holmes:

In reference to application #37-8703, please consider the following as consideration for a qualifying permit. The use of the water would be used in off season or after the irrigation water is not available. The current Water Rights are adequate for the summer months and the use of this application would be mainly for the winter months in which there is little demand. The evaporation losses would be negligible in the winter months.

We believe our application is non-consumptive and would have no effect on reduced flows of the Big Wood River.

If you have any questions, please contact me.

Sincerely,

Darlene Bramon

I interpret the application to propose domestic use and irrigation uses not to exceed one-half acre. I do not know the size of the storage pond, although the application shows a volume of three acre-feet.

If Bramon can somehow compensate for evaporation losses from the pond, or show that evaporation losses are insignificant I think we can approve the application without further review.

Re: Application 37-8703

Dear Applicant:

You were recently sent a letter from this office notifying you that a showing your application would result in no reduction of surface water flows was required or that you had a plan for mitigation of reduce flows.

Further review of your application reveals that you do not propose a diversion in excess of what will be permitted under the management plan for the Big Wood River Groundwater Management Area.

You may therefore, disregard the previous letter. We will continue to process your application normally.

Sincerely,

Loren O. Holmes, P. E.
Southern Region Manager

Re: Application number 37-8703

Dear Applicant:

The Department of Water Resources recently designated a ground water management area (GWMA) which encompasses the upper Big Wood River Valley, the Bellevue Triangle, a portion of the Silver Creek drainage, and the Camas Prairie. You have filed the above referenced application(s) which proposes a point of diversion within the ground water management area.

The Department intends to process pending applications within the GWMA. Any applicant who proposes a consumptive water use, other than domestic use not exceeding one-half acre of irrigation, must show that his proposed use will not reduce flows in the Big Wood River or Silver Creek, or he must propose a reasonable plan to mitigate the reduction in flow.

Your application proposes a consumptive use of water. Prior to further processing of your application, or conducting a hearing if the application is protested, you must submit the following information:

1. Hydrologic evaluation of the ground water aquifer at the proposed point of diversion and its relationship to surface water, including timing of potential impacts.
2. If the hydrologic evaluation results in a conclusion that a well can be constructed without impact, a prospectus discussing well construction methods and standards must be submitted which will be implemented to prevent depletion of surface flow.
3. If the hydrologic evaluation results in a conclusion that a well cannot be constructed without depleting surface flow, a plan of mitigation and/or compensation must be submitted that will replace depletions of surface water caused by proposed ground water withdrawal.

37-8703

RECORDED

28-Aug-1991

If you do not wish to submit the above information, you may withdraw your application by completing the enclosed withdrawal form. if your application includes a domestic component, and you wish to limit the application to domestic use, please inform this office.

Failure to respond to this inquiry within thirty (30) days, with either the withdrawal or a schedule for submittal of the above information, is cause for the Department to void the application for failure to submit the requested information.

Sincerely,

A handwritten signature in cursive script, appearing to read "Loren O. Holmes".

Re: Application for Permit No. 37-08703

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 6/5 & 6/12/91. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Douglas Jones, E. I. T.
Water Resources Engineering Specialist

Puchner seeks amended permit

NOTICE AMENDED APPLICATION FOR WATER PERMIT

Notice is hereby given that the following application for permit to appropriate the public waters of the State of Idaho has been amended as follows:

37-08037-08681

Philip F. Puchner
P.O. Box 240
KETCHUM ID 83340
Date Amended: 4/3/91
Source: groundwater
Diversión Pt: NE1/4NW1/4SW1/4, S28, T1N, R18E; Blaine County.
Use: Domestic (.04 cfs)
Irrigation (.09 cfs)
Total quantity to be appropriated: 0.13 cfs

In: Irrigation of three (3) acres within NW1/4NW1/4, SW1/4-NW1/4, S28, T1N, R18E.

The permit (s) will be subject to all prior water rights. Protests must be filed with the Director, Dept. of Water Resources, Southern Region, 222 Shoshone Street East, Twin Falls, ID 83301, on or before June 24, 1991.

RE: Water Rights 37-0363F, -0364D, Application for Permit

Dear Mr. and Mrs. Bramon,

I am returning the application for permit recently submitted, along with check #2735, to provide you an opportunity to consider the following information. The application for permit in and of itself is acceptable but it may not provide for what you intend. First of all, you should be advised that the approved transfer does not authorize development of a pond on your property. I would guess that this is the reason that you are filing an application for permit. Since the application requests water rights for the pond through the winter only this would limit you to divert the Kohler Ditch rights only directly into the sprinkler system. The application for permit appears to imply that you will be pumping Kohler Ditch water rights into the pond during the irrigation season to fill and maintain the pond, this is not authorized by the transfer. The Department does not consider a pond to be "nonconsumptive"; but rather, it is considered equally consumptive as irrigation (acre for acre).

With that said, it may be in your interest, depending on your intent, to adjust the period of use to year around for all uses on the application. The groundwater then could be used to fill the pond and make up the water lost to evaporation through the summer and winter. Irrigation water cannot be used to fill or maintain the pond, but you may comingle the water as long as you don't irrigate when you aren't diverting ditch water into the pond.

Upon considering the above information please return the application and fee to this office. In addition please provide details about the pond dimensions (depth, width, length) and location on the property.

If you have any questions please contact us.

Sincerely,

Douglas Jones, EIT
Water Resources Engineering Specialist
