State of Idaho
Department of Water Resources

Permit To Appropriate Water

NO. 37-08675

Proposed Priority: September 7, 1990 Maximum Diversion Rate: 0.04 CFS
This is to certify, that DONALD M LEVIN

PO BOX 699
HAILEY ID 83333

has applied for a permit to appropriate water from: GROUNDWATER
and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
-----------------------	----------------------	--------------------------

DOMESTIC	01/01 to 12/31	0.04 CFS
----------	----------------	----------

LOCATION OF POINT(S) OF DIVERSION: SWSW , Sec. 29, Township 03N, Range 18E
BLAINE County

PLACE OF USE: DOMESTIC
TWN RGE SEC

03N 18E 29 SWSW

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before February 1, 1993.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. Domestic use is for 1 home.
6. Place of use is located within Lot 1, Shady Nook Subdivision.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this

28th day of January, 1992

R. Keith Higginson

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant Dr. Donald M. Levin Phone 788-3200

Post office address P.O. Box 697, Hailey, ID 83333

2. Source of water supply Groundwater which is a tributary of _____

3. Location of point of diversion is _____ 1/4 of SW 1/4 of SW 1/4, Govt. Lot _____

Sec. 29 Township 3N Range 18E B.M. Blaine County; additional

points of diversion if any: _____

4. Water will be used for the following purposes:

Amount 0.04 for Domestic purposes from 1-1 to 12-31 (both dates inclusive)
(cfs or acre-feet per annum)

* Amount 0.09 for Irrigation purposes from 4-1 to 11-1 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) 0.13 ^{*} 0.04 and/or (b) _____
cubic feet per second acre feet per annum

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. Well & pump

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 6 inches; proposed depth of well is 80 feet.

d. Is ground water with a temperature of greater than 90°F being sought? No

7. Time required for the completion of the works and application of the water to the proposed beneficial use is
3 years (minimum 1 year).

* Application limited to Domestic per letter 01-14-92 from Applicant. AS
01-24-92

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in KW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; show name of municipality. _____
- Domestic; show number of households. One
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for Domestic) in the corresponding place of use below. See instructions for standard symbols.

2. Measurements: _____

E. NARRATIVE/REMARKS/COMMENTS

This system consists of one 8" well drilled 49ft deep with a dynamic pumping level of 31ft. Water is diverted to the household via a 2 hp submersible pump to a 60 gallon pressure tank located under the home site and was inaccessible to photograph.

Water is also diverted to an aesthetic pond located in front of the home and is pumped and recirculated to an aesthetic stream-way, the stream then meanders back through the property to enter back into the pond. Dr. Levin stated that this pond is for fire protection.

The irrigation system consists of a Rain-Bird type Double 36 employing 72 sprinkler heads w 1/8" nozzle diameter size. This system turns on 12 sprinkler heads at a time, 6 times per day twice per week.

A telecon with the driller revealed that a pump psi setting of on at 40 off at 50 lbs was accomplished at the time it was installed.

The lot measures approximately 3.1 acres (135,036sq ft.) I measured the lawn size and found it to be approximately .48 acres (20,570 sq feet) . The home, driveways and the aesthetic waterways measure 8000 square ft. leaving 2.2 acres. Approximately another 25000 sq ft is taken up in non-irrigatable land found below the mean high water mark and has been covered for sufficient periods of time to deprive the soil of its terrestrial vegetation. Its value as accepted agricultural property has been negated. The remainder of the property is in woodlands and appears to be flood irrigated via a 2.0" fabric-type hose.the trees and woody turf measures approximately 1.9 acres (82,764sq ft.)

When asked, Dr. Levin assured me that he is complying to the .5 acres under irrigation rule and has signed a statement in letter form to that effect.

Have conditions of permit approval been met? X yes ___ no

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method: Theoretical &

U of I nozzle conversion table for sprinkler system.

$$\frac{8.8 \times 2 \times .70}{(31) + 45 \times 2.31} = \frac{12}{135} = .09\text{cfs}$$

$$1/8" \times 45\text{psi} = 3.13 \text{ gpm} \times 12 \text{ heads} = 38\text{gpm} = 0.08\text{cfs}$$

0.08cfs System Capacity

(Allow .04cfs filed on.)

G. VOLUME CALCULATIONS**1. Volume Calculations for Irrigation:**

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \underline{\hspace{2cm}}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \underline{\hspace{2cm}}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = \underline{\hspace{2cm}}$$

2. Volume Calculations for Other Uses:

(Allow domestic including irrigation of 1/2 acre = 1.2afa)

H. RECOMMENDATIONS: Recommended as domestic only with .5 acres of irrigation included.**1. Recommended Amounts**

DEPARTMENT OF WATER RESOURCES

1301 North Orchard Street, Statehouse Mail, Boise, Idaho 83720 - (208) 327-7900

CERT. LANDRUS

CARLSON

R. KEITH HUGHES

DIRECTOR

August 14, 1991

Dr. Donald Levin
P.O. Box 699
Hailey, ID 83333

Dear Dr. Levin:

The Department of Water Resources recently designated a ground water management area which encompasses the upper Big Wood River Valley, the Bellevue Triangle, a portion of the Silver Creek drainage, and the Camas Prairie. Our records show that you have filed an application for permit to appropriate water with the Department which proposes a point of diversion within the ground water management area.

The Department intends to process pending applications within the ground water management area. Any applicant who proposes consumptive use, other than domestic use not exceeding one-half acre of irrigation, must show that his proposed use will not reduce flows in the Big Wood River or Silver Creek, or he must propose a reasonable plan to mitigate the reduction in flow.

Our records show that you have applied for a consumptive use of water. Prior to processing your application, or conducting a hearing if the application is protested, you must submit the following information:

1. Hydrologic evaluation of the ground water aquifer at the proposed point of diversion and its relationship to surface water, including timing of potential impacts.
2. If the hydrologic evaluation results in a conclusion that a well can be constructed without impact, a prospectus discussing well construction methods and standards must be submitted which will be implemented to prevent depletion of surface flow.
3. If the hydrologic evaluation results in a conclusion that a well cannot be constructed without depleting surface flow, a plan of mitigation and/or compensation must be submitted that will replace depletions of surface water caused by proposed ground water withdrawal.

If you do not wish to submit the above information, you may withdraw your application by completing the enclosed withdrawal form. If your application includes a domestic component, and you wish to limit the application to domestic use, please inform the Department.

Failure to respond to this inquiry within thirty (30) days, with either the withdrawal or a schedule for submittal of the above information, is cause for the Department to void the application for failure to submit requested information.

Respectfully,

Gary Spackman

1. Applicant (please print) Dr. DONALD M. LEVIN
2. Mailing Address Box 699 HAILEY Idaho 83333
Telephone 208-788-3200

☒ Well Owner ☐ Well Operator ☐ Other, specify _____

3. Proposed well location SW 1/4 SW 1/4 1/4, or Gov't Lot No. N/A
Sec. 29 Twp. 3 N. Rge. 18 E. County BLAINE
Street Address of Well Site DEER CREEK LAKE
Lot, block and subdivision SHADY NOOK LOT #1

4. Proposed use of well:

☒ Domestic: The use of water for homes, organization camps, public campgrounds, livestock and for any other in connection therewith, including irrigation of up to 1/2 acre of land, if the total use is not in excess of 13,000 gallons per day or any other uses, if the total use does not exceed a diversion rate of 0.04 cfs and a diversion volume of 2500 gallons per day.

Domestic does not include water for multiple ownership subdivisions, mobile home parks, commercial establishments, unless the use does not exceed a diversion rate of 0.04 cfs and a diversion volume of 2500 gallons per day.

☒ Non-Domestic: Any beneficial use not included within the definition of domestic.

☐ Injection

☐ Monitoring - A well bore schematic and map is required for each well.
No. of proposed wells: _____

5. Well construction information:

A. ☒ New well ☐ Deepen ☐ Replace - See Condition 9

B. Proposed Surface Diameter 6" Drilling Hole Proposed Maximum Depth 80 ft.

C. Anticipated bottom hole temperature:

- ☒ 85°F or less (Cold water well)
☐ 85°F to 212°F (Low temp. geothermal well)
☐ 212° or more (Geothermal well)

6. Construction Start Date 9/4/90

7. Anticipated Well Driller Walker Water Systems

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 9/7/90

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **REMARKS:**

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on this permit, injection well permit, transfer or amendment and the rules and regulations of the Department for well construction and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and one year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of this permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with the Department's Regulations.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08675

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 37-08675

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 37-08675

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not

RECEIVED
FEB 07 1992

diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

RE: Application for Permit No. 37-8675

NOTICE OF PENDING ORDER VOIDING APPLICATION

Dear Dr. Levin:

The Department of Water Resources sent you a letter several weeks ago informing you about the designation of the Big Wood Ground Water Management Area. We informed you of the creation of the ground water management area because you have an application for permit to appropriate water pending before the Department of Water Resources which proposes diversion of water within the Ground Water Management Area.

The letter also informed you that you were required to submit information to the Department regarding your application. A copy of the letter is enclosed for your reference.

The letter gave you thirty (30) days to submit a schedule for completion of required studies or acquisition of mitigation water. You have not responded to the inquiry.

This letter is a notice that if you do not submit the requested information within fifteen (15) days of the date of this letter, your application for permit will be voided.

Respectfully,

A handwritten signature in cursive script that reads 'Gary Spackman'.

DIRECTOR

August 14, 1991

Dr. Donald Levin
P.O. Box 699
Hailey, ID 83333

Dear Dr. Levin:

The Department of Water Resources recently designated a ground water management area which encompasses the upper Big Wood River Valley, the Bellevue Triangle, a portion of the Silver Creek drainage, and the Camas Prairie. Our records show that you have filed an application for permit to appropriate water with the Department which proposes a point of diversion within the ground water management area.

The Department intends to process pending applications within the ground water management area. Any applicant who proposes consumptive use, other than domestic use not exceeding one-half acre of irrigation, must show that his proposed use will not reduce flows in the Big Wood River or Silver Creek, or he must propose a reasonable plan to mitigate the reduction in flow.

Our records show that you have applied for a consumptive use of water. Prior to processing your application, or conducting a hearing if the application is protested, you must submit the following information:

1. Hydrologic evaluation of the ground water aquifer at the proposed point of diversion and its relationship to surface water, including timing of potential impacts.
2. If the hydrologic evaluation results in a conclusion that a well can be constructed without impact, a prospectus discussing well construction methods and standards must be submitted which will be implemented to prevent depletion of surface flow.
3. If the hydrologic evaluation results in a conclusion that a well cannot be constructed without depleting surface flow, a plan of mitigation and/or compensation must be submitted that will replace depletions of surface water caused by proposed ground water withdrawal.

RECEIVED

FEB 07 1992

If you do not wish to submit the above information, you may withdraw your application by completing the enclosed withdrawal form. If your application includes a domestic component, and you wish to limit the application to domestic use, please inform the Department.

Failure to respond to this inquiry within thirty (30) days, with either the withdrawal or a schedule for submittal of the above information, is cause for the Department to void the application for failure to submit requested information.

Respectfully,

A handwritten signature in cursive script that reads "Gary Spackman".

Re: Application for Permit No. 37-08675

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 10/17 & 10/24/90. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Gary Funderburg
Sr. Water Resource Agent
