E. NARRATIVE/REMARKS/COMMENTS

This system consists of a buried collection box which feeds into 2.5" buried pipe and extends approximately 1/2 mi down hill to the house. (according to the owner, the buried collection box and pipeline was not detectable except by a piece of re-bar with a yellow tag attached. I did not attempt to locate or photograph the spring because of its inaccessibility.

The diverting works located at the home consists of one horse-head spigot from the main pipe, reduced to 1" pipe and connected to the house. However, there is a domestic well located at the home that is uaed as a main water supply with the spring water used as a back-up source and is disconnected during the winter months.

Domestic well is covered by AJ claim 37-13185
