PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 37-08571 Telephone No. (208) 726-9022

2. Name(s) of Permit Holder(s): WILLIAM A. MCMAHAN, Trustee

3. Mailing Address: Post Office Box 3125, Ketchum, Idaho 83340

4. Source of Water: Groundwater

If **GROUNDWATER**, Well Driller's Name: Walker Water Systems, Inc. April 25, 1990 to
Vollmer Well Drillers (sub) Date Drilled: July 25, 1990

OPTIONAL:

Pump horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft.): _____

5. Extent of Use (as authorized by the permit):

Domestic _____ (No. of households) Stockwater _____ (No. and type of stock)

Irrigation _____ (No. of acres) Other Wildlife and Fish propagation

6. Total rate and/or volume for which proof is submitted 5.0 cfs OR _____ acre/feet

7. Refer to the approval conditions on your permit and respond accordingly:

Measuring device: Required? ☒ Yes ☐ No Installed? ☒ Yes ☐ No

OR

Flow Measurement Port: Required? ☐ Yes ☒ No Installed? ☐ Yes ☐ No

8. Fee Enclosed: \$ 200.00 (See License Fee Schedule on back of Instruction Sheet)

9. Person to contact to accompany the Department representative during field examination of the water system.

Publication approved T. Gasper Date 12-18-89

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

MICROFILMED

JUL 27 1992

ADDENDUM TO
APPLICATION FOR PERMIT - GROUNDWATER
BY
WILLIAM A. MCMAHAN

10. Other Water Rights. Applicant is concurrently applying for the right to divert 3.8 cfs from Loving Creek to be used in the same streams and ponds for the same purposes as the groundwater which is the subject of this Application.

12. Remarks. A large well will pump groundwater into an upper pond, approximately thirty-five thousand (35,000) square feet in surface area with a maximum depth of twelve (12) feet. The water will then flow by gravity through an open stream bed for approximately 1/4 mile to the lower pond of approximately the same size as the upper pond. Approximately 4.0 c.f.s. will be periodically re-cycled by pumping from the lower pond to the upper pond through a buried pipeline to assure a minimum flow in the system for fish and wetlands habitat.

The system of ponds and connecting stream will be used for non-commercial fish propagation and as a wetlands habitat for ducks, geese and other native wildlife.

During the irrigation season, the 5.0 cfs for this application will be a portion of the water diverted for Permit 37-07810, which is a permit to divert 6.0 cfs for the irrigation of 300 acres and will use the same well as the point of diversion. Water for Permit 37-07810 will be pumped from the lower pond into a mainline to wheelines and/or handlines for irrigation. During the non-irrigation season, the entire 5.0 c.f.s. will be returned from the lower pond to Loving Creek through another buried pipeline.

RE: PERMIT NOS. 37-07810/37-08569/37-08571

Dear Water Right Holder:

We acknowledge receipt of the correspondence changing ownership of the above referenced water rights to you. We have modified our computer records to reflect these changes in ownership.

If you have any questions regarding this matter, please feel free to contact us.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address **PRIOR** TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

JIM JOHNSON, Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 37-08571

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as

MICROFILMED

JUL 27 1992

far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.

Sincerely,

PAMELA SKAGGS
Water Resource Agent

JUL 27 1992

MEMORANDUM

TO: Files Nos. 37-8569 and 37-8571
FROM: Gary Spackman *Gary*
DATE: June 18, 1992

Applications for permit nos. 37-08569 and 37-8571 propose diversion from an unnamed drain and from groundwater, respectively, to maintain two small fish ponds located in the area of Loving Creek, which is tributary to Silver Creek in the Big Wood River Basin. The nature of use for both applications is fish propagation (non-commercial) and wildlife habitat.

Jim Speck has submitted some information about the physical characteristics of the area. I conclude that the project will not result in a significant loss of water. Any percolation will find its way back into Loving Creek or into Silver Creek. The change in the evaporation by the ponds is not significant enough to warrant rejecting the application.

I propose we approve the applications with standard conditions, and the following specific conditions:

Application for Permit No. 37-08569:

1. Fish propagation under this right shall be for non-commercial, recreational purposes.
2. Use of water under this right shall be non-consumptive.
3. The Director of the Department of Water Resources retains jurisdiction over this right to require compensation to other rights, or to the hydrologic system for losses which may occur as a result of this use.

Application No. 37-08571:

1. Fish propagation under this right shall be for non-commercial, recreational purposes.
2. Use of water under this right shall be non-consumptive.
3. The Director of the Department of Water Resources retains jurisdiction over this right to require compensation to other rights, or to the hydrologic system for losses which may occur as a result of this use.
4. The applicant must comply with the drilling permit requirements of Idaho Code, § 42-235A. The proposed well must be constructed according to Idaho Well Construction Standards.

MEMORANDUM

TO: FILE NO. 37-08569, 37-08571

FROM: GEORGE AUSTIGUY *ga*

DATE: JUNE 6, 1992

RE: POTENTIAL LOSSES

I have reviewed the allegations in Mr. Speck's letter of April 27, 1992 regarding information to evaluate potential losses.

Using available aerial photographs and a width of ten feet, the surface area of the old drainage ditch is estimated to be approximately 29,000 square feet. This compares favorably with Mr. Speck's estimate of "in excess of 26,000 square feet". Assuming the acreage claimed for the project's ponds and streams (one acre) is correct, the resulting increase in area is 14560 square feet or approximately 1/3 of an acre. Thus the increase in potential evapotranspiration is less than what would occur under a domestic permit.

The USGS report "Ground Water - Surface Water Relations in the Silver Creek Area" identifies the project's reach along Loving Creek as a gaining reach. Therefore it is likely that any seepage loss will eventually reach Loving Creek.

In summary, the allegations contained in Mr. Speck's April letter appear to be reasonable.

Re: Application Nos. 37-8569 and 37-8571 for William McMahan

Dear Mr. Luke:

The above referenced application by Mr. McMahan consists of appropriations of waters to develop a manmade stream and storage system of ponds for fish and wildlife habitat.

The DEQ Twin Falls office reviewed the related stream channel alteration work with Terry Blau. Based on our site reviews and assessment of potential water quality impacts, this project should not result in violations of Idaho Water Quality Standards. An EPA NPDES waste discharge permit would not be required for a discharge into Loving Creek.

Should any questions arise, please contact me.

Sincerely,

Michael J. McMaster

Re: Application no.s 37-8569 & 37-8571 in name of William McMahan

Dear Jim:

Per our conversation this morning, I am writing to remind you that the Department wishes to request comment from the Idaho Department of Health and Welfare, Division of Environmental Quality (DEQ) concerning the project identified under the above referenced applications. DEQ should comment as to whether the intended project will satisfy both Idaho Water Quality standards and any requirements of an NPDES permit.

We will hold the applications until the additional information is submitted. As I also mentioned this morning, Gary Spackman had recommended holding approval on these applications until the Loving Creek transfer application controversy between McMahan and the Idaho Fish and Game Department is resolved. Questions concerning expedited approval of the applications after the DEQ information is submitted should be addressed to Gary.

Sincerely,

A handwritten signature in cursive script that reads "Tim Luke".

FROM: TIM LUKE *TL*

RE: APP. NO. 37-8569 & 37-8571/Rule 4,5,3 Information

DATE: 2-15-92

These applications seek to appropriate groundwater and drain water (subwater) for non-commercial fish and wildlife purposes. The proposed groundwater well is an existing well covered by a permit for irrigation. The drain is an existing structure which is used for irrigation under several rights. It appears that both applications have the effect of adding fish and wildlife uses to the existing diversions and rights. Since the uses are essentially non-consumptive uses (other than pond evaporation which will be perhaps four or five acre-feet per year for this project), the filings can be considered for approval despite the groundwater and surface water management designations in the area. Policies for management of both sources generally allows for new non-consumptive uses.

The applications include some detailed remarks describing the proposed use, diversion works and operation. The department recently required submittal of Rule 4,5,3 information. This information, along with the descriptions on the applications, appears to be acceptable as meeting the requirements of Rule 4,5,3. Continued processing of the applications is recommended. I would recommend adding at least our standard water quality conditions. We might also consider measuring device requirements. Also, because of the fish propagation use, we should check with Gary Spackman and ask if the applicants need to get any DEQ approvals prior to any approval of this water permit application.

Re: Applications for Permit Nos. 37-08569 and 37-08571
(the "Applications") - William A. McMahan

Dear Tim:

This letter is in response to your December 6, 1991 letter to me requesting certain additional information for the Applications pursuant to Rule 4,5,3. I will first address the specific questions raised in your letter and then the requirements of the Rule.

1. There will not be a continuous flow of 5 cfs from the well during the non-irrigation season. A very precise device for regulating the flow from the well has been installed and will be used to provide the best flows for fish spawning and habitat. The well diversion will be combined with recycled water from the lower pond to manage the water temperature of the system. Silt control is also a consideration in determining flow rates during the non-irrigation season.

2. There will essentially be no "return" flow to Loving Creek from the well diversions during the irrigation season. However, during the non-irrigation season, an amount equal to the well diversion will be "returned" to Loving Creek.

3. The well exists and is fully operational. Furthermore, the entire system of ponds and connecting streams has been completed.

4. Enclosed is a copy of a USGS map for the area showing the approximate (at least to the nearest 40 acre tract) locations of those wells in closest proximity to the project. It is possible none of them are within the one-half mile radius referred to in Rule 4,5,3,1,2.

5. Enclosed are copies of the well driller's report and drawdown calculations which were submitted to Fish & Game to assist in the resolution of its protests to the Applications.

RECEIVED
JUL 27 1992

Mr. Tim Luke
February 13, 1992
Page 2

These documents should satisfy the requirements of Rules 4,5,3,1,3 and 4,5,3,2,2.

6. Rule 4,5,3,3 does not apply. The project is entirely on Mr. McMahan's property and all other permits, licenses and approvals required for the project have been obtained.

7. Rule 4,5,3,4 does not apply. Construction of the project has been completed, including drilling the well and installing the pump, measuring and control devices.

8. Rule 4,5,3,5 has been satisfied. Fish & Game protested the Applications, but has withdrawn the protests. If you believe comment from any other governing body is necessary to your review of the Applications, please advise.

Please let me hear back from you on the Applications as soon as possible. thank you.

Sincerely yours,

HOGUE, SPECK & AANESTAD

RE: Application no.s 37-8569 & 37-8571/William A. McMahan
Rule 4,5,3. Information

Dear Jim:

Our office recently received the above referenced applications from the region. In April of 1991, the region requested submittal of certain information under Water Appropriation Rule 4,5,3. We have not yet received this information.

As I review the application files I find that there is not a lot of information concerning the proposed uses other than the project description contained in the addendums attached to the original applications. In reviewing the addendums, I am a little confused about the amounts of water which will be used specifically for the fish/wildlife ponds. Will there be a continuous flow of 5 cfs from the groundwater well to the ponds during the non-irrigation season? What is the estimated return flow to Loving Creek during the irrigation and non-irrigation seasons? Is the well to be used in this project an existing well? If not, is there a well drilling plan?

At this time we ask that you submit all of the information required under water appropriation rule 4,5,3. The information should be definite enough to address the above questions and generally provide a more clear understanding of the operation or project along with the existing permits and projects. Given the fact that the proposed use is within the Big Wood River Groundwater management area, the information submitted should address impacts on other uses as well as aquifer characteristics in this area.

Enclosed with this letter is a copy of the information requirements under rule 4,5,3. Enclosed also is a guideline which may assist you with submittal of the information. The guideline however is more suited to irrigation projects. Please submit the additional information at your earliest convenience but no later than 45 days from the date of this letter.

Sincerely,

Tim Luke

Sr. Water Resource Spec.

COMMENTS

MEMORANDUM

DATE: 19-Apr-1991

FROM: Loren Holmes *LH*

TO: Files 37-8569, 8570, 8571; Mc Mahan

SUBJECT: Action to date and current status

The three applications were advertised on December 6 & 13, 1989 with final date for protests December 26, 1989.

Timely protests were received from Bill Molyneux, Fish & Game, and Big Wood Canal Co. Molyneux did not protest application 37-8571.

A protest was received from Nick Purdy on December 28, 1989. He was advised that he had no standing as an original party, and has not filed any motion to intervene.

All timely protests have been withdrawn with the exception of Fish & Game's protest on 37-8570. Fish & Game's withdrawal on 37-8571 is conditional based on an agreed-on condition of approval.

It was noted during file review that the applicant had not been notified of the additional information requirements for fish propagation applications.

SUMMARY OF PROTEST & WITHDRAWAL DATES:

PROTESTANT	37-8569	37-8570	37-8571
	PROTEST W'DRAWN	PROTEST W'DRAWN	PROTEST W'DRAWN
Molyneux	12/18/89 2/12/90	12/18/89 2/12/90	-- --
F & G	11/20/89 12/20/90	11/20/89 Cont.	11/20/89 12/20/90 (Condition)
BWCC	12/19/89 2/6/90	12/19/89 2/6/90	12/19/89 2/6/90
Purdy	12/28/89	12/28/89	12/28/89
(late protest, not a party)			

FURTHER ACTION:

- 1) Region will notify applicant of the Rule 4,5 and administrative requirements for information on fish propagation.
- 2) Applications 37-8569 & 37-8571 will be forwarded to the State Office and the applicant directed to send the additional information there.
- 3) Application 37-8570 will be scheduled for pre-hearing conference.

Re: Applications 37-8569, 37-8570, 37-8571, Mc Mahan

Dear Mr. Speck:

I have reviewed the files and determined that all protests in the matters of 37-8569 and 37-8571 have been withdrawn. Those files are being forwarded to the state office for further action.

On review, I found that you had not been notified of the additional information requirements of Rule 4,5,3. of the Water Appropriation Rules & Regulations. A summary of the rule requirements for these applications is attached. Responses should be sent directly to the state office.

The Department of Fish & Game is the only continuing protestant on 37-8570. I will proceed to schedule a pre-hearing conference for some date after May 16.

If I can be of any further assistance, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Loren O. Holmes".

ADDITIONAL INFORMATION REQUIREMENTS
FOR FISH PROPAGATION APPLICATIONS
FIVE (5) CFS AND LESS

The following additional information is required to be made part of the application file pursuant to IDAHO CODE section 42-203A and the Rules and Regulations for Water Appropriation:

- 1) Copies of deeds, leases, easements, or other information documenting that you have a possessory interest in the place of use. (Rule 4,5,3,3,1)
- 2) Copies of plans and specifications for the project works. The plans must be definite enough to allow for determination of project impacts and implications. For fish propagation facilities the plans must show the number of ponds proposed and give the length, width and depth dimensions of all ponds. (Rule 4,5,3,4,2)
- 3) You must seek comment on the effects of the construction and operation of the proposed project from the city and/or county within which the project is to be located, the Idaho Department of Fish and Game, the Idaho Department of Health and Welfare, Division of Environment, and any irrigation district or canal company within which the project is to be located. (Rule 4,5,3,5,1) A copy of your application is enclosed for your use in seeking comments.

RE: Water Right Applications for Permit Nos. 37-08569, 37-08570, and
37-08571

Dear Mr. Higgenson:

In late 1989, Mr. William McMahan filed three Applications to appropriate water. These were 37-08569 for 2 cfs from an unnamed drain, 37-08570 for 3.8 cfs from Loving Creek, and 37-08571 for 5 cfs of groundwater. These applications were for year-round water use for wildlife habitat and fish propagation.

The Idaho Department of Fish and Game (hereinafter Fish and Game) timely filed protests to the applications because of the possible impact of the withdrawals on the operation of its Hayspur Fish Hatchery.

After discussions with counsel for McMahan, Fish and Game agrees to withdraw its protest to Application 37-08569 for water from an unnamed ditch.

Fish and Game and McMahan stipulate and agree that the following condition be placed on the permit issued for Application 37-08571 for groundwater.

The holders of senior water rights may seek review and amendment of the Permit and subsequent License in the event the withdrawal of groundwater pursuant to the permit or license adversely affects the senior water right holders or water rights for the Hayspur Hatchery. The burden of proof shall be upon the persons seeking such review and amendment.

MICROFILMED

JUL 27 1992

SPECIAL CONDITION

Mr. Keith Higgenson, Director
December 18, 1990
Page 2

If this condition is placed on this permit, Fish and Game will withdraw its protest. The attached letters reference the discussions and also the agreed upon language.

However, Fish and Game continues its protest of Application 37-08570 to divert 3.8 cfs of water, year-round from Loving Creek. Fish and game also intends to challenge Transfer Nos. 3198, 3199, and 3200 which transferred the diversion points for licensed rights 37-0252 (2.5 cfs) and 37-0712 (1.3 cfs) from Aubrey Spring and Aubrey Creek to Loving Creek because the diversion from Loving Creek would harm Fish and Game. Fish and Game also will challenge the transfers on the basis 3.8 cfs had not been put to beneficial use and that forfeiture may have taken place. During our discussions, Mr. McMahan was informed that Fish and Game would raise these challenges at the hearing on Application 37-08570. Since the parties were unable to resolve the issues surrounding the Application 37-08570, this matter should proceed to a hearing.

If you have any questions or desire further clarification, please let me know.

Sincerely,
Stephen V. Goddard

Re: William A. McMahan - Applications for Permit Nos.
37-08569 and 08571

Dear Steve:

This letter will confirm our recent telephone conversations concerning the above-referenced Applications for Permit. First, the Department of Fish and Game (the "Department") will withdraw its protest to Application 37-08569 for the use of water from the unnamed ditch.

Second, the Department will also withdraw its protest to Application 37-08571 for the use of groundwater provided an appropriate condition is imposed on the Permit regarding pumping levels. I suggest the following language:

The holders of senior water rights may seek review and amendment of the Permit or subsequent License in the event the withdrawal of groundwater pursuant to the Permit or License causes such senior water right holders to pump groundwater from below established reasonable pumping levels. The burden of proof shall be upon the persons seeking such review and amendment.

Please let me know if this proposed language is acceptable. Thank you.

Dear Mr. Speck:

This is written in response to your letter of October 2, 1990 and our earlier telephone conversations. The Department will withdraw its protest to Application 37-08569 for 2 cfs from an unnamed drain. The Department will also withdraw its protest to Application 37-08571 for the use of groundwater providing that an appropriate condition is added to the permit and subsequent license. The Department would agree to the following language in the condition:

The holders of senior water rights may seek review and amendment of the Permit and subsequent License in the event the withdrawal of groundwater pursuant to the permit or license affects the senior water right holders or water rights for the Hayspur Hatchery.

As you are aware from our earlier conversations, the Department is continuing its protest of Application 37-08570 and intends to challenge approval of the transfer of water rights from diversions on Thompson Creek (Aubrey Creek and Aubrey Springs, Transfer Numbers 3198, 3199, and 3200) on several grounds. The Department intends to challenge any diversion of water that reduces the amount of its water right to the Hayspur Hatchery.

Re: William A. McMahan - Application for Permit Nos.
37-08569 and 08571

Dear Steve:

This letter will confirm our telephone conversation on November 26, 1990. Mr. McMahan will stipulate and agree the following condition may be imposed on the Permit issued pursuant to Application For Permit No. 37-08571:

The holders of senior water rights may seek review and amendment of the Permit and subsequent License in the event the withdrawal of groundwater pursuant to the permit or license adversely affects the senior water right holders or water rights for the Hayspur Hatchery. The burden of proof shall be upon the persons seeking such review and amendment.

In return, it is my understanding the Department of Fish and Game (the "Department") will withdrawal its protest to this Application.

Second, the Department will withdraw its protest to Application for Permit No. 37-08569 for the use of water from the unnamed ditch.

I understand you will take the above-described actions on behalf of the Department by forwarding a letter to the Department of Water Resources. Please be certain a copy is sent to Mr. Loren Holmes, Manager of the Southern Regional office in Twin Falls. I also understand you will state in this same

Re: William A. McMahan - Application for Permit
Nos. 37-08569, 08570 and 08571

Dear Steve:

I called your office September 28, 1990 to see if you had an opportunity to review and respond to my September 20, 1990 letter. I was hoping to resolve the protest to 37-08569 and 37-08571 before I left the office. I will return November 5, 1990 at which time I want to continue to attempt to resolve the protest to 37-08570. I will contact you at that time.

Thank you.

Sincerely yours,

HOGUE, SPECK & AANESTAD

Re: William A. McMahan - Application for Permit Nos.
37-08569 and 08571

Dear Steve:

This letter will confirm our telephone conversation on November 26, 1990. Mr. McMahan will stipulate and agree the following condition may be imposed on the Permit issued pursuant to Application For Permit No. 37-08571:

Insert { The holders of senior water rights may seek review and amendment of the Permit and subsequent License in the event the withdrawal of groundwater pursuant to the permit or license adversely affects the senior water right holders or water rights for the Hayspur Hatchery. The burden of proof shall be upon the persons seeking such review and amendment.

In return, it is my understanding the Department of Fish and Game (the "Department") will withdrawal its protest to this Application.

Second, the Department will withdraw its protest to Application for Permit No. 37-08569 for the use of water from the unnamed ditch.

I understand you will take the above-described actions on behalf of the Department by forwarding a letter to the Department of Water Resources. Please be certain a copy is sent to Mr. Loren Holmes, Manager of the Southern Regional office in Twin Falls. I also understand you will state in this same

NOTICE OF
PRE-HEARING CONFERENCE

SOURCE: Unnamed Drains
& Streams Tributary
to Loving Creek,
Groundwater

COUNTY: Blaine

On September 22, 1989 and October 12, 1989, William A. Mc Mahan, applicant, filed applications with the Department of Water Resources to appropriate the public waters of the State of Idaho. The Department, having received protests against the approval of said applications from Idaho Dept. of Fish & Game on Nov. 20, 1989; A. W. Molyneux on Dec. 18, 1989; and Big Wood Canal Co. on Dec. 19, 1989, has set the combined matters for pre-hearing conference.

The conference is set for Friday, February 2, 1990, at 10:00 AM, in the Blaine County Planning & Zoning Commission room, in the Old Courthouse, First & Croy Streets, Hailey.

The purpose of the conference is to formulate and simplify the issues, obtain admissions of fact and of documents which will avoid unnecessary proof, arrange for the exchange of proposed exhibits or prepared expert testimony prior to the hearing, limit the number of witnesses, consolidate the examination of witnesses, and advise the parties of the procedure which will be followed at any subsequent hearing.

The conference will be held in accordance with chapter 2, Title 42 of the Idaho Code and the adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded to all parties to respond and present evidence and argument on all issues involved.

Dated this 19 day of January, 1990.

CONFERENCE AND HEARING PROCEDURE

IN THE MATTER OF A PROTESTED APPLICATION FOR PERMIT

In accordance with IDAHO CODE, Section 42-203, the following issues are involved in the consideration of the application and protest(s):

- 1) Will the proposed use reduce the quantity of water under existing rights?
- 2) Is the proposed water supply insufficient for the purposes intended?
- 3) Is the application made in good faith or for delay or speculative purposes?
- 4) Has the applicant sufficient financial resources with which to complete the proposed project?
- 5) Will the proposed use conflict with the local public interest?

PROCEDURE

The procedure normally followed by the department in arriving at a decision on the issues which must be considered is to first hold a conference in the matter and then, if necessary, hold a hearing. If a hearing is held a written decision is issued based on the hearing record.

CONFERENCE

Preliminary to holding a hearing, a pre-hearing conference is held to to familiarize the department and the parties with the matter and to determine if a resolution of the protest(s) is possible without the need for a hearing.

At the conference the department may formulate and simplify the issues, obtain admissions of fact and of documents which will avoid unnecessary proof, arrange for the exchange of proposed exhibits or prepared expert testimony prior to the hearing, limit the number of witnesses, consolidate the examination of witnesses, and advise the parties of the procedure which will be followed at any subsequent hearing.

HEARING

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes at the expense of the requesting party. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

If the hearing is conducted by a hearing officer appointed by the Director, rather than the Director himself, a proposed decision will be issued and the parties will be afforded the opportunity to file exceptions to the proposed decision and present briefs and oral arguments to the Director prior to the issuance of a final decision by the Director. This procedure is required by IDAHO CODE, Section 42-1701A.

The parties by written stipulation, may waive their right to a proposed decision, however, the failure of either party to waive a proposed decision will not prejudice the director's review of a party's evidence and arguments. However, such a waiver will shorten the decision making process and may expedite substantially the issuance of a final decision. Whether compliance with Section 42-1701A is waived will not affect a party's right to petition for a rehearing of the final decision pursuant to rule 11 of the Department's Rules of Practice and Procedure or affect a party's right to appeal the final decision to the District Court.

Under the provisions of the IDAHO CODE, Sections 42-1701A and 67-5215, any court review of the department's decision on appeal shall be confined to the record created before the department.

EFFECT OF FAILURE TO APPEAR AT A CONFERENCE OR HEARING

Failure to appear at the time and place set for a conference or hearing by the applicant or protestant(s) may allow the department to dismiss without prejudice the protest(s) or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Re: Application for permit No. 37-08569, 37-08570, 37-08571;
William A. McMahan

Dear Mr. Nellis:

Your protest against the approval of the above referenced applications has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

This office is tentatively scheduling the matter of protests for a pre-hearing conference for February 1, 1990. Notices formally setting the conference time and place will be mailed about January 18.

At such a conference, the following are the principal items the Department can consider in either approving or denying an application for permit (Section 42-203, IDAHO CODE):

- 1) Will the proposed use reduce the quantity of water under existing rights?
- 2) Is the proposed water supply insufficient for the purposes intended?
- 3) Is the application made in good faith or for delay or speculative purposes?
- 4) Has the applicant sufficient financial resources with which to complete the proposed project?

Re: Application Nos. 37-08569, 37-08570, 37-08571

Dear Mr. Stanton:

Due to the proximity of the Hayspur Hatchery and potential impacts on water sources for the hatchery, we are protesting the granting of the above mentioned water rights. Of special importance is the 3.8 c.f.s. in Application No. 37-08570 since this would result in a 28% reduction in the fish producing capability of the hatchery.

Sincerely,

Re: Applications for Permit Nos. 37-08569, 37-08570, 37-08571 (Mc Mahan)

Dear Mr. Speck:

The Department of Water Resources acknowledges receipt of the water right application for permit on behalf of William A. McMahan. The applications have been assigned the above referenced identification numbers. Please refer to these numbers in all further correspondence.

This office will be advertising the applications in the Wood River Journal on 12/6 & 12/13/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please see enclosed list of additional information requirements. Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent

Re: William A. McMahan - Applications for Permit -
Wildlife Habitat and Fish Propagation

Dear Jim:

This letter will confirm our telephone conversation of November 6, 1989 wherein I explained Mr. McMahan desires to specify wildlife habitat and non-commercial fish propagation as the proposed beneficial uses for the three Applications for Permit he recently filed. We understand the Department does not have specific categories in its computerized database to cover these particular beneficial uses. However, we firmly believe these uses most appropriately describe the proposed project and wish to proceed in that fashion. It is my understanding the processing of these applications will now proceed accordingly.

Thank you again for your continuing cooperation and assistance. Please do not hesitate to call me should you have any further questions about these Applications.

Sincerely yours,

HOGUE, SPECK & AANESTAD

RE: William A. McMahan
Applications for Permit - Fish Propagation and Wildlife
Habitat

Dear Loren:

Enclosed you will find the following:

1. Application for Permit for Fish Propagation and Wildlife Habitat using waters of the unnamed drain;
2. Revised first page of Application for Permit for Fish Propagation and Wildlife Habitat using waters of Loving Creek;
3. Revised first page of Application for Permit for Fish Propagation and Wildlife Habitat using groundwater; and
4. A check in the sum of \$30.00 payable to the Department for Application fee for item 1.

As we discussed during our on-sight meeting on September 25, 1989, Mr. McMahan is proceeding with the construction of the pond and stream system and the ditches and pipelines necessary to divert the waters from Loving Creek into this system and return water back to Loving Creek. It is my understanding this work does not require any stream alteration permits. The proper "404 Permit" has been applied for through the U.S. Army Corps of Engineers. The pond excavation work will also improve the diversion works for Idaho Water License No. 37-02575, an irrigation right owned by Mr. McMahan.

I would like to have all three of these Permits processed and notice published at the same time since they are all part of the same wildlife habitat and fish propagation system project.

Page 2

Mr. McMahan and I again thank you for taking the time and energy to visit the site of the project and thoroughly discuss the various possibilities as well as the legal requirements for perfecting all the necessary water rights to do this project. As you know, Mr. McMahan is very excited about creating a "natural" system for the fish and other native wildlife. We certainly hope you will again come visit the project once it has been completed.

Please call me if you have any questions. Thank you.

Sincerely yours,

HOGUE, SPECK & AANESTAD

RE: Applications for Permit
William A. McMahan

Dear Loren:

Enclosed you will find two Applications for Permit which have been prepared for and signed by Mr. William A. McMahan together with our check payable to the Department of Water Resources in the sum of \$230.00, representing the filing fees for the groundwater Application (\$125.00 for 5cfs) and the Loving Creek Application (\$105.00 for 3.8cfs). These two Applications seek to divert waters to be used in a non-consumptive wildlife habitat and fish propagation stream and pond system. In each case, the waters proposed to be diverted will be the same as waters diverted under other water rights or permits for irrigation purposes.

If you have any questions concerning these Applications, please call me. Thank you.

Sincerely yours,

HOGUE, SPECK & AANESTAD

Jim

ADDITIONAL INFORMATION REQUIREMENTS
FOR FISH PROPAGATION APPLICATIONS
FIVE (5) CFS AND LESS

The following additional information is required to be made part of the application file pursuant to IDAHO CODE section 42-203A and the Rules and Regulations for Water Appropriation:

- 1) Copies of deeds, leases, easments, or other information documenting that you have a possessory interest in the place of use. (Rule 4,5,3,3,1)
- 2) Copies of plans and specifications for the project works. The plans must be definite enough to allow for determination of project impacts and implications. For fish propagation facilities the plans must show the number of ponds proposed and give the length, width and depth dimensions of all ponds. (Rule 4,5,3,4,2)
- 3) You must seek comment on the effects of the construction and operation of the proposed project from the city and/or county within which the project is to be located, the Idaho Department of Fish and Game, the Idaho Department of Health and Welfare, Division of Environment, and any irrigation district or canal company within which the project is to be located. (Rule 4,5,3,5,1) A copy of your application is enclosed for your use in seeking comments.
