MEMORANDUM

TO: File 37-08561 / Peter Trust
FROM: Brenda Chapman
DATE: May 25, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

Per telephone conversation today with the certified examiner, Charles Brockway, this permit will not be recommended as a supplemental groundwater right. He stated that no surface water has ever been used on that land.

Also, there is no irrigation around the caretaker's residence at all. The 2.6 acres ~~is~~ the total amount irrigated. There is a second domestic well west of the caretaker's house that supplies the house's internal needs. However, the examiner did not include any information on that one. It will be listed only as a second point of diversion in the conditions.

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	4-15 to 10-15	.08	9.1
Domestic	1-01 to 12-31	.02	.6

The irrigation season dates and annual diversion volume have been adjusted to coincide with the currently used Field Headgate Requirement and Season of Use chart standards.

Reducing the domestic rate to an internal use only rate of .02 cfs conforms the recommendation to the current guidelines for processing combination domestic and irrigation rights.

Permit 37-08561
Peter Trust aka River Grove Farm

The point of diversion and place of use under this permit is included on Lot 5 and Lot 6 of Flying Heart Subdivision, Blaine County, Idaho. The well is located on the west side of Lot 5 as shown on the attached plat map. The 8 inch diameter well was drilled by Scott Drilling in March 1991 under drilling permit 37 91S 018. A 5 h.p. submersible pump was installed in September 1994 and was tested by Scott Drilling at 336 gpm @ 60 psi pressure.

This well has been fitted to supply water to one fire hydrant which provides fill-up water for tanker trucks of the Wood River Rural Fire District for fire protection on the Flying Heart Subdivision and adjacent areas.

The irrigation system consists of a buried sprinkler system with 12 pop-up heads rated at approximately 7 gpm. Total irrigated area is 2.6 acres. Allowable diversion rate based on the permit is 0.03 cfs/acre. Therefore allowable for 2.6 acres=0.8 cfs.

Domestic water is served from the well to the caretaker quarters located on the west side of Lot 6 of the Flying Heart Subdivision.

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 37-08561

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating your permit since proof of beneficial use was received after the proof due date. Please note that the priority date has been advanced to November 17, 1989.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning the field examination, please feel free to contact the SOUTHERN Regional Office in Twin Falls, at (208) 736-3033.

LAPSE NOTICE

RE: PERMIT NO. 37-08561

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated December 31, 1994. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 37-08561

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1995.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

RE: PERMIT NO. P37-08561

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue

FEB 21 1990

card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor

Re: Application for Permit No. 37-08561

Dear Mr. Thomas:

The Department of Water Resources acknowledges receipt of the water right application for permit on behalf of Peter M. & Thomas A. Thomas. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 11/15 & 11/22/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer
