GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS

FILE: 37-08559
DATE: 7-13-79
BY: JE Stanton

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (\text{H.P.}) \times (\text{EFF.})}{\text{TDH}}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) \times (30) \times (0.70)}{[(35) + (59 \times 2.31)]} = 1.15 \text{ cfs}$$

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08559

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck

PROOF DUE NOTICE

RE: PERMIT NO. P37-08559

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P37-08559

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

MEMORANDUM

TO: FILE/APPLICATION NO. 37-8559

FROM: TIM LUKE

RE: SWAN FALLS PROCESSING

DATE: 01-02-90

This application is eligible for processing out of sequence. The aerial photo attached to the application is a 1984 NHAP photo and does provide evidence of irrigation and use of a center pivot system. I worked with the applicant earlier this year in trying to reinstate a lapsed permit for the same use and number of acres. Proof on the lapsed permit was originally due in 1983. The applicant had no evidence of development prior to the proof due date and did not believe the project was completed until 1984.

A review of the department's remote sensing data from 1986 shows that the land under this application was classified as irrigated in that year. A well log in the lapsed file also shows that the well described in the application was constructed in 1981.

As per the Directions of the Department's Policy and Implementation Plan for Processing Trust Water Rights, issued November 3, 1988, for filings made after July 1, 1985, to validate use prior to October 1, 1984, the public interest criteria of Section 42-203C must be evaluated. The acreage under the filing however does not count toward the 20,000 acre annual depletion limit. Since this application does not individually or cumulatively cause a significant reduction, the criteria of 42-203C(2)(a) I.C. also does not require evaluation.

Based on all of the above information, this application can be processed out of sequence. However, since the application was filed after July 1, 1985, certain trust water conditions are applicable.

Re: Application for Permit No. 37-08559

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 10/18 & 10/25/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer

SUBJECT App. 37-0 , Wood River Ranch

I discussed this application with the ranch manager today. He stated that the acreage figure shown on the 1984 aerial photo only cover grains (wheat, barley, etc.) involved in federal crop programs. During 1984 (the first year the system was used), 40 acres of wheat were watered with the pivot. The rest of the ground was in pasture and was untillied. Due to the shallow nature of the soil, all of the ground is now in pasture. The ground is too rocky for row crops.
