STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

Ident. No. 37-08493

APPROVED

To appropriate the public waters of the State of Idaho

1. Name of applicant Idaho Department of Fish & Game Phone 334-3730
Post office address P. O. Box 25, Boise, ID 83707
2. Source of water supply Groundwater which is a tributary of _____
3. Location of point of diversion is SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of SW $\frac{1}{4}$, Govt. Lot _____
Sec. 9 Township 2 S. Range 12 E. B.M. Camas County; additional
points of diversion if any: _____
4. Water will be used for the following purposes: ^{AS per pt/w/Jepson 2/24}
Amount 1 cfs for wildlife habitat purposes from May 1 to Nov. 15 (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) 1 cfs and/or (b) ~~390~~
cubic feet per second acre feet per annum
6. Proposed diverting works:
- a. Description of ditches, flumes, pumps, headgates, etc. A 25 hp (approx.) vertical turbine pump would be utilized with open ditches to convey the water.
- b. Height of storage dam N/A feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.
- c. Proposed well diameter is 16" existing well inches; proposed depth of well is > 300 feet.
- d. Is ground water with a temperature of greater than 90°F being sought? no
7. Time required for the completion of the works and application of the water to the proposed beneficial use is
3 years (minimum 1 year).

AUG 22 1989

8. Description of proposed uses (if irrigation only, go to item 9):

- a. Hydropower; show total feet of head and proposed capacity in KW. 000 100 000
- b. Stockwatering; list number and kind of livestock. 000 000 000
- c. Municipal; show name of municipality. 000 000 000
- d. Domestic; show number of households. 000 000 000
- e. Other; describe fully. Wildlife. Provide nesting, rearing and feeding habitat for migratory waterfowl.

9. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 37-8493, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 19 92.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Prior to the diversion of water under this permit a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 13th day of July, 1989.

J. Glen Saylor

GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS

FILE: 37-08493
DATE: October 1998
BY: Satterlee

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{T.D.H.}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
T.D.H. = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) \times (40) \times (0.70)}{[(20) + (50 \times 2.31)]} = \frac{246.4}{135.5} = 1.82$$

LIFT FROM:	PSI FROM:	NOTES ON PUMP:
measurement ()	measurement ()	Motor Make, Serial or ID
owner ()	owner ()	SEE PHOTO
area estimate ()	estimate (X)	Pump Make, Serial or ID, rating
well logs (X)	owner gage ()	
Booster (Y) (N)		

REMARKS

ANNUAL VOLUME ANALYSIS

POTENTIAL Acre Feet/Acre/Annun = $\frac{(\text{DAYS IN SEASON}) \times (1.98) \times (Q)}{(\text{RECOMMENDED ACRES IRRIGATED})}$

(season)	(days)	
3/15 - 11/15	246	POTENTIAL = $\frac{(\dots) \times (1.98) \times (\dots)}{(\dots)}$
4/1 - 11/1	215	
4/15 - 10/15	184	
3/1 - 12/1	276	

POTENTIAL =

REQUIRED Acre Feet/Acre/Annun =
(AF/Ann/Ac irrigation requirement from chart for area)
NOTE that this is NOT Consumptive use

IF POTENTIAL IS GREATER THAN REQUIRED THEN NO MEASUREMENT NECESSARY ()
IF POTENTIAL IS LESS THAN REQUIRED THEN MEASUREMENT IS NECESSARY ()

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08493

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck
Secretary/Records Manager

Publication approved M. Baldwin Date 6/2/89

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 37-8493, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 19 92.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Prior to the diversion of water under this permit a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 13th day of July, 1989.

Re: Permit 37-08493

Dear Dale:

In regard to your request for clarification of authority granted under the permit, the permit authorizes the diversion of 1 cfs of groundwater to maintain wildlife habitat in a series of man-made ponds.

The plan indicates that the ponds are to be constructed outside of stream channels and wetlands, therefore no other permits should be required for construction.

Under this permit only groundwater is appropriated and only for the purpose of filling and maintaining the level and flow of water in the ponds. The volume of water diverted annually is not specified in the permit. This is normally determined when the right is perfected (licensed).

If the ponds are to be designed to capture and hold surface flows for release at other times of the year, an additional appropriation under another application may be necessary.

Very Truly yours,

A handwritten signature in cursive script, reading 'Loren O. Holmes'.

RE: Clarification of Hill City Water Right

Dear Mr. Holmes:

There seems to be some confusion in the department as to exactly what can be done with the water from our well. We've received an approved water right for lcfs. to be used for wildlife benefits, permit #37-08493.

The marsh is supplied by Camas Creek, an intermittent stream. As inflow diminishes the marsh dries up, stranding our young unflighted birds. Predators then cause heavy losses on our annual production. The construction of brood ponds would greatly alleviate these losses.

We would like to excavate ponds of approximately two acres in surface area and to a maximum depth of three feet, refer to drawing. The ponds will be located in the uplands surrounding the marsh, with the spoils spread adjacent to the ponds and seeded to provide nesting cover. The location, out of the wetlands, will exempt us from 404 permits.

The ponds will receive snowmelt and a limited amount of runoff. The remainder of the water would come from the well, by pipe and level ditching. The well would be used periodically through the spring, summer and fall to maintain the ponds.

We would greatly appreciate your comments on our proposal as quickly as possible. We would like to dig the ponds this fall and are running short of time.

Sincerely,

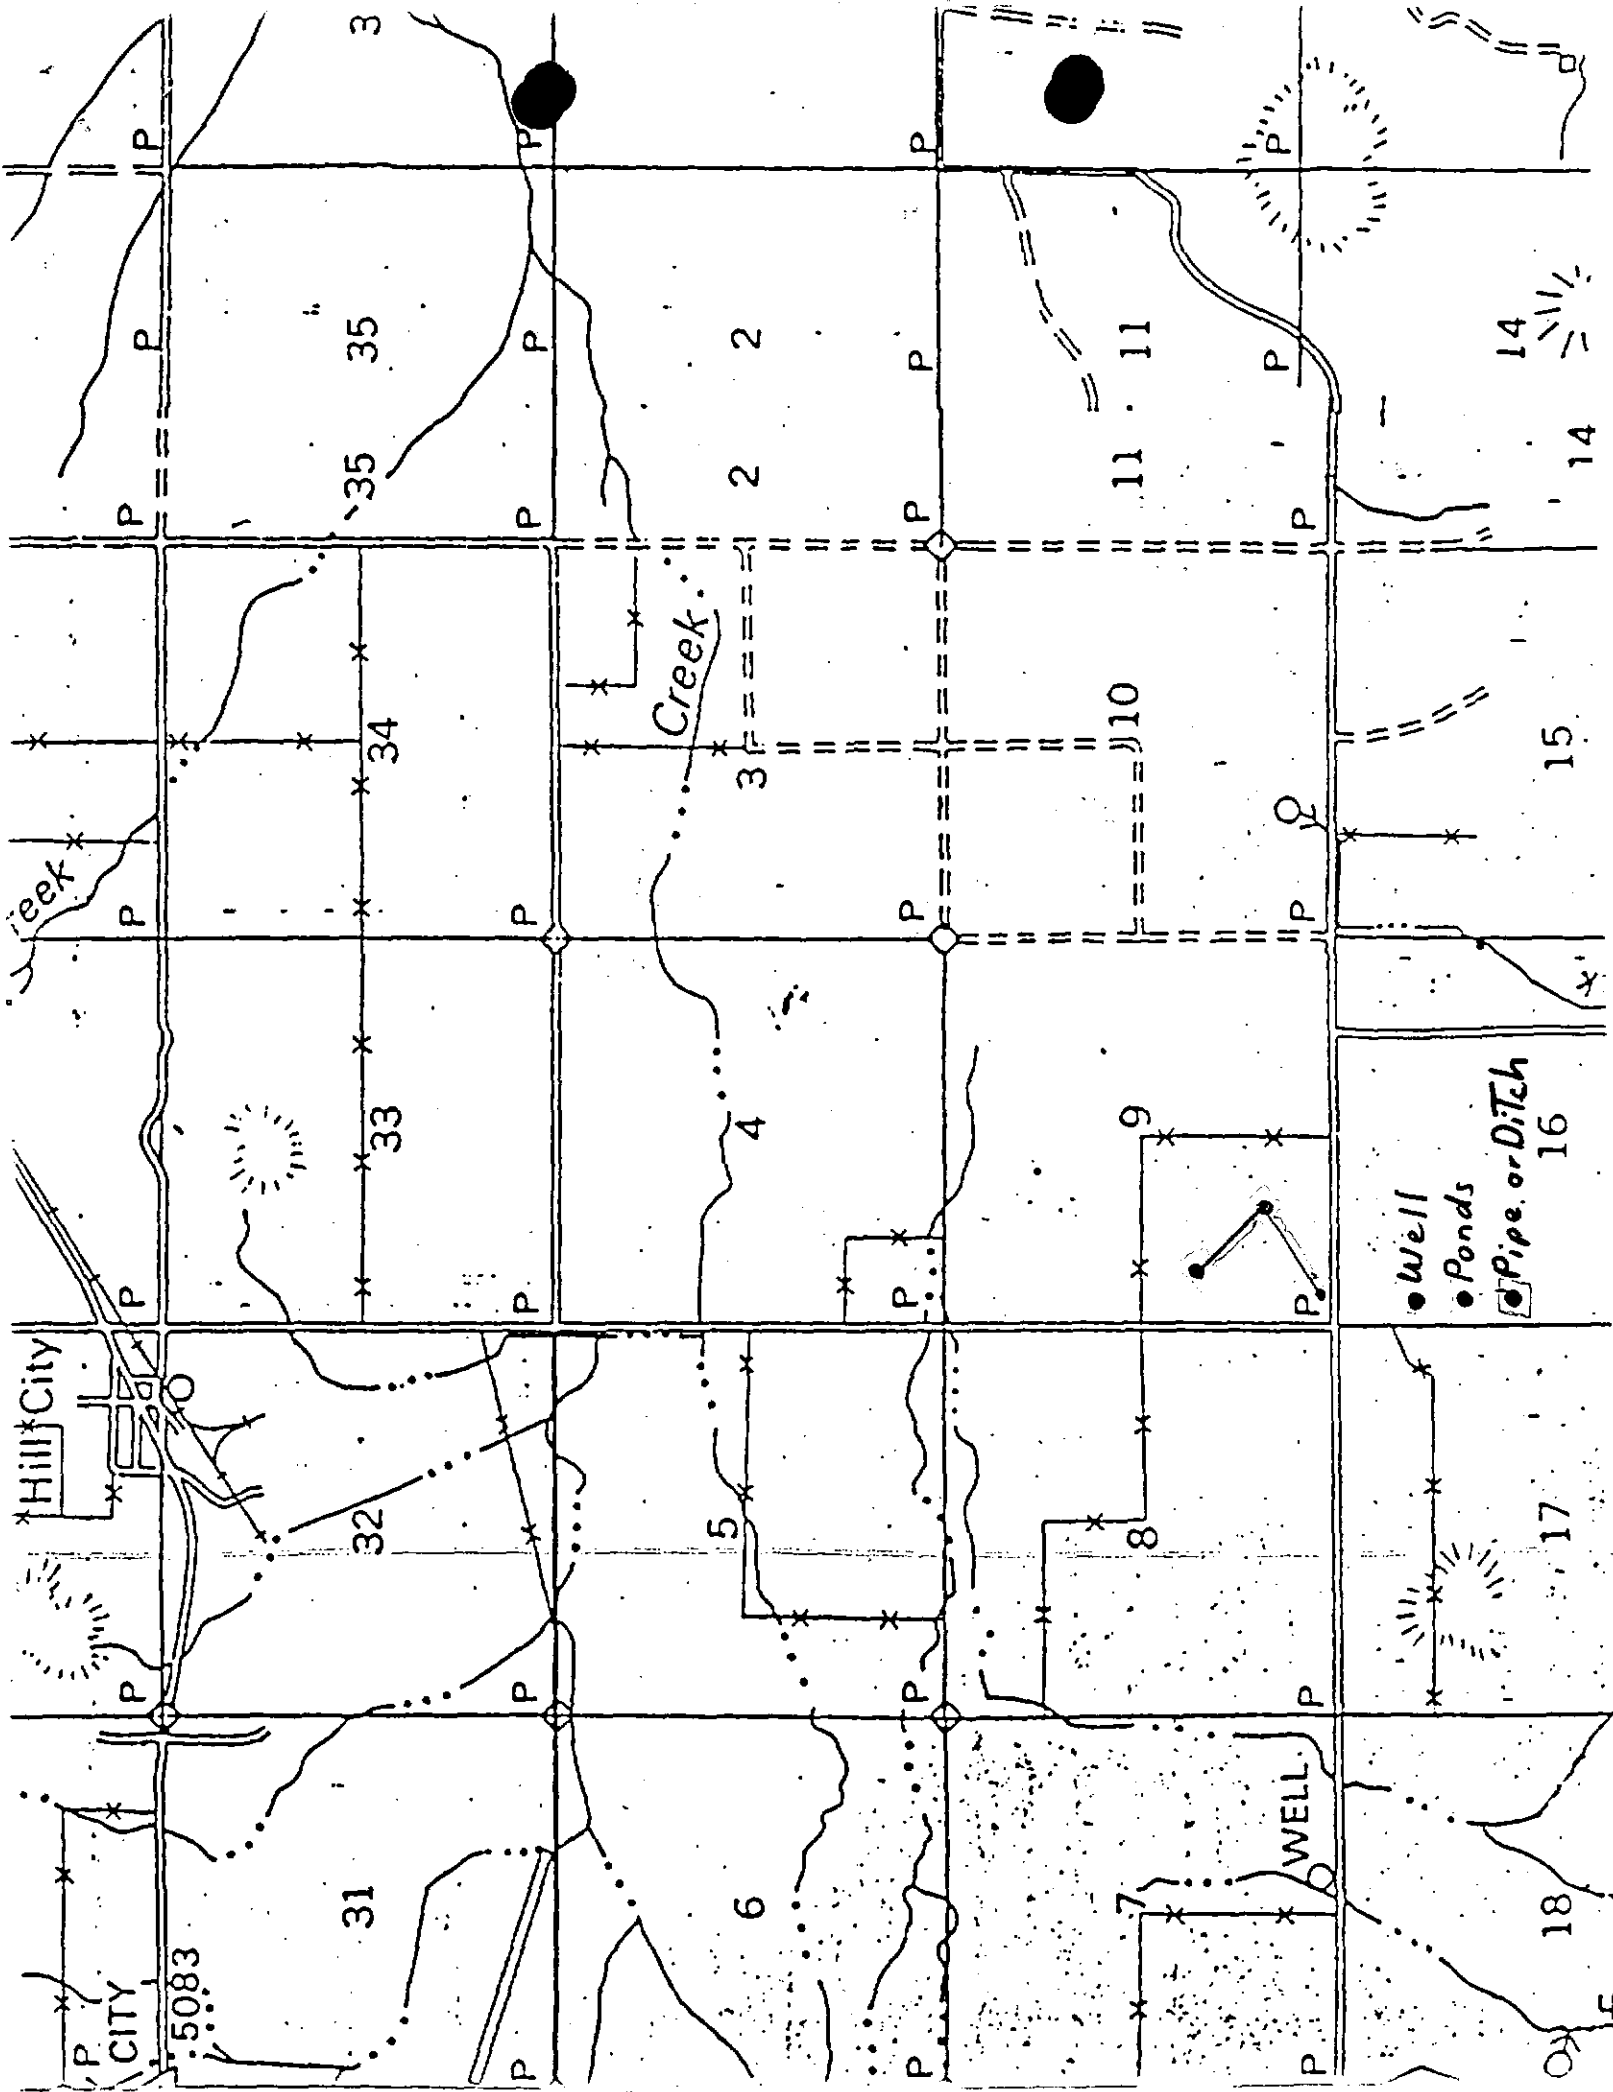

Terry Gregory

From: John Freitag, Water Resource Agent

Re: Fuji measurement

Date: 10/11/00

On this day I met Terry Gregory at Camas Prairie Centennial Marsh. I used the Fuji to obtain a measurement averaging 0.81 cfs. The pipe measured (see attached photos) is approximately 8000 feet from the well. This is the closet point accessible to attach the Fuji.

E. NARRATIVE/REMARKS/COMMENTS

E. NARRATIVE/REMARKS/COMMENTS

FROM: Georgia Satterlee
DATE: 29 September 1998
RE: 37-08493

On 04 September 1998, I met with Terry Gregory, who oversees the Camas Prairie Centennial Marsh for the Department of Fish and Game. The permit allows several ponds to be filled from a well for wildlife habitat. The examination revealed only two ponds filled by one well.

The well is located SWSW $\frac{1}{4}$ Section 09, T02S, R12E. Terry Gregory says, "...due to the high expense and the late rainy season, the well was not turned on in 1998". However he supplied power records. It appears the well was mostly used in 1993 and in 1994.

The field examination for 37-08493 verified two ponds. The well discharges into a mainline, which then diverts to laterals leading to ponds. The larger pond is in the NWSW $\frac{1}{4}$ and smaller pond is in the SESW $\frac{1}{4}$, both in Section 9, T02S, R12E.

Recommendation for the diversion rate is based on an average from the power use records. The capacity of the system can be computed by a theoretical, but a theoretical rate will not be recommended until a valid measurement of the system can be achieved.

If the applicant balks at the recommended (computed from the Power Use Record Analysis) diversion rate, a measurement would be gladly taken of the system when they have the well in full operation.

POWER USE RECORD ANALYSIS:

1993 - 114 days -	118 acre feet=0.52 cfs
1994 - 120 days -	78 acre feet=0.33 cfs
AVERAGE: 117 days	98 acre feet 0.425 cfs

The recommendation for the capacity volume are from actual measurements of the two ponds (14.4 acre feet).

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

Measured Method:

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 37-08493

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck
Secretary/Records Manager

Re: Permit 37-08493

Dear Dale:

In regard to your request for clarification of authority granted under the permit, the permit authorizes the diversion of 1 cfs of groundwater to maintain wildlife habitat in a series of man-made ponds.

The plan indicates that the ponds are to be constructed outside of stream channels and wetlands, therefore no other permits should be required for construction.

Under this permit only groundwater is appropriated and only for the purpose of filling and maintaining the level and flow of water in the ponds. The volume of water diverted annually is not specified in the permit. This is normally determined when the right is perfected (licensed).

If the ponds are to be designed to capture and hold surface flows for release at other times of the year, an additional appropriation under another application may be necessary.

Very Truly yours,

Loren O. Holmes, P. E.
Southern Region Manager

RE: Clarification of Hill City Water Right

Dear Mr. Holmes:

There seems to be some confusion in the department as to exactly what can be done with the water from our well. We've received an approved water right for lcfs. to be used for wildlife benefits, permit #37-08493.

The marsh is supplied by Camas Creek, an intermittent stream. As inflow diminishes the marsh dries up, stranding our young unflighted birds. Predators then cause heavy losses on our annual production. The construction of brood ponds would greatly alleviate these losses.

We would like to excavate ponds of approximately two acres in surface area and to a maximum depth of three feet, refer to drawing. The ponds will be located in the uplands surrounding the marsh, with the spoils spread adjacent to the ponds and seeded to provide nesting cover. The location, out of the wetlands, will exempt us from 404 permits.

The ponds will receive snowmelt and a limited amount of runoff. The remainder of the water would come from the well, by pipe and level ditching. The well would be used periodically through the spring, summer and fall to maintain the ponds.

We would greatly appreciate your comments on our proposal as quickly as possible. We would like to dig the ponds this fall and are running short of time.

Sincerely,

Terry Gregory
Senior Land Manager
Hill City Marsh

RE: PERMIT NO. 37-08493

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

MAILED

AUG 22 1989

~~~~~

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor  
Water Right Permits Section

Re: Application for Permit No. 37-08493

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the The Snowshoe on 5/3 & 5/10/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Gary Funderburg  
Sr. Water Resource Agent

Gentlemen:

Enclosed is an Application for Permit to Appropriate Public Waters of the State, together with the application fee in the amount of \$45. As noted in the application, we plan to use this water to supply shallow ponds yet to be constructed for waterfowl benefits.

Additional materials yet to be submitted are storage permits and waiver of dam design requirements--the maximum height of these dikes will be four feet, and the downstream drainage appears to be low hazard. There is some question regarding whether a 404 Permit will be necessary for the pond construction. The area floods during snow melt, but normally, the area is dry by July 1.

Please advise if more information is needed at this time.

Sincerely,

Philip G. Jeppson  
Fish and Game Engineer Supervisor
