GOLDEN EAGLE

(*Aquila chrysaetos*)

The Golden Eagle is a denizen of the mountains and hill regions of Western North America. With a length of thirty to forty inches and a wingspread of eighty to eighty-eight inches, this huge and most magnificent of all eagles is brown, with dark brown eyes and a powerful but relatively small bill. Its golden neck feathers which give it its name are seen only at close range. The broad white tailband and white wing patches of the immature Golden Eagle are distinctive field marks, also. Large wing surfaces let this lone hunter effortlessly lift and soar for hours above mountain ridges, then dive at speeds estimated up to 150-200 miles per hour to catch rabbit, ground squirrel or rodents. Cliffside nests are big and bulky; there may be as many as ten, but only two or three are used in annual rotation.

Natural history artist John D. Dawson's works appear in National Geographic. Other commissions include those of The Audubon Society, The National Wildlife Federation, The National Park Service and The San Diego, Bronx and Pittsburgh zoos.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 3.5 afa per acre for the lands above.
6. Irrigation use under this right is authorized only in connection with a domestic use.
7. Place of use is located within Lot 11, Lake Creek Subdivision.

RE: OWNERSHIP OF RIGHT NO. 37-08458

Dear New Water Right Holder:

We have received correspondence changing ownership of the above referenced water right to you and we have modified our computer records to reflect this change.

Enclosed is a report listing you as current owner of the right and other important information about your water right. **Please review carefully the Conditions of Approval and Remarks.**

Also, please note that as of July 1, 1996, all water right owners are required to report any change in water right ownership and any change of mailing address to the department.

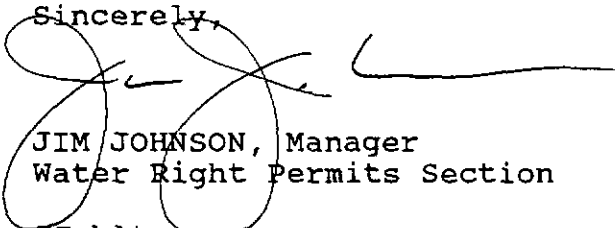

If you have acquired any other water right or have changed your mailing address **PRIOR TO** July 1, 1996, you have until July 30, 1998, to record the ownership and/or address change with the department.

If you acquired other water rights or changed your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes in a timely manner could result in a \$100 late filing fee.

You can contact any office of the department for more information. If you have any questions concerning your water right listed above you can contact me at (208)327-7947.

Dear Mr. and Mrs. Tyson:

Re: Permit No. 37-8458

PROOF ACKNOWLEDGEMENT LETTER

The department received the proof of beneficial use form and your check for \$100. For the diversion rate of 0.09 cfs, there is a license exam fee of only \$50. I have requested a \$50 refund. It should be sent to you in a few weeks.

The next step is for the department to conduct the field inspection to confirm and determine the extent of beneficial use. I cannot tell just when the representative from our Southern Regional office will conduct the exam, but he will try to contact you or your representative prior to being in the area.

If you have questions, please contact me.

Sincerely,

PROOF DUE NOTICE

RE: PERMIT NO. 37-08458

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 37-08458

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Also enclosed is a copy of the approved drilling permit submitted in connection with this water right.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

[Handwritten signature]

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.

Re: Application for Permit No. 37-08458

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 3/1 & 3/8/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.

Re: Application for Permit

Dear Mr. & Mrs. Tyson:

Enclosed please find the application for permit that you recently submitted to our office. However, the application must be signed.

We are also enclosing Check #990. The correct filing fee for the proposed .09 cfs is \$30.00.

We will hold the accompanying well drilling permit and filing fee until we receive the signed application.

If you have any questions or if this office can be of further assistance, please feel free to contact us.

Very truly yours,

Doug Jones, E.I.T.
Water Resources Engineer

GOLDEN EAGLE

(*Aquila chrysaetos*)

The Golden Eagle is a denizen of the mountains and hill regions of Western North America. With a length of thirty to forty inches and a wingspread of eighty to eighty-eight inches, this huge and most magnificent of all eagles is brown, with dark brown eyes and a powerful but relatively small bill. Its golden neck feathers which give it its name are seen only at close range. The broad white tailband and white wing patches of the immature Golden Eagle are distinctive field marks, also. Large wing surfaces let this lone hunter effortlessly lift and soar for hours above mountain ridges, then dive at speeds estimated up to 150-200 miles per hour to catch rabbit, ground squirrel or rodents. Cliffside nests are big and bulky; there may be as many as ten, but only two or three are used in annual rotation.

Natural history artist John D. Dawson's works appear in National Geographic. Other commissions include those of The Audubon Society, The National Wildlife Federation, The National Park Service and The San Diego, Bronx and Pittsburgh zoos.

Dear Mr. & Mrs. Tyson:

This office is in receipt of your application for a drilling permit for a well for domestic and irrigation purposes.

Based on our telephone conversation today, it appears you plan to irrigate more than 1/2 acre. A water use of this extent will also require a water right permit.

Enclosed is an application for permit form and instructions together with a map for your use in completing the application.

We will hold your drilling permit application until receipt of your water right application and process the two together.

If you have any questions, please contact this office.

Very Truly yours,

Loren O. Holmes, P. E.
Southern Region Manager
